

# UGH! CALOMEL MAKES YOU SICK! CLEAN LIVER AND BOWELS MY WAY

Just Once! Try "Dodson's Liver Tone" When Bilious, Constipated, Headachy—Don't Lose a Day's Work.

Liven up your sluggish liver! Feel fine and cheerful; make your work a pleasure; be vigorous and full of ambition. But take no nasty, dangerous calomel, because it makes you sick and you may lose a day's work. Calomel is mercury or quicksilver, which causes necrosis of the bones. Calomel crashes into sour bile like dynamite, breaking it up. That's when you feel that awful nausea and cramping.

Listen to me! If you want to enjoy the nicest, gentlest liver and bowel cleansing you ever experienced just take a spoonful of harmless Dodson's Liver Tone. Your druggist or dealer sells you a 50 cent bottle of Dodson's Liver Tone under my personal money-

back guarantee that each spoonful will clean your sluggish liver better than a dose of nasty calomel and that it won't make you sick.

Dodson's Liver Tone is real liver medicine. You'll know it next morning, because you will wake up feeling fine, your liver will be working, your headache and dizziness gone, your stomach will be sweet and your bowels regular.

Dodson's Liver Tone is entirely vegetable, therefore harmless and cannot salivate. Give it to your children. Millions of people are using Dodson's Liver Tone instead of dangerous calomel now. Your druggist will tell you that the sale of calomel is almost stopped entirely here.—Adv.

### MAKE BIG GUNS OBSOLETE

Western Inventor Devises an Aerial Torpedo That Gives Promise of Effectiveness.

What may eventually prove to be a highly effective war implement, and, if so, possibly render present heavy artillery obsolete for long-range operations, is a self-controlled aerial torpedo that has lately been developed in Colorado. It is described in the August number of Popular Mechanics Magazine. In a general way, the instrument attempts to accomplish over land what the United States navy's new wireless torpedo does at sea. Its principle and method of operation, of course, are entirely different. As is to be inferred, it consists of a small aircraft—much like an ordinary bi-plane—carrying a large, high-explosive torpedo which it is designed to drop at any predetermined spot within a certain radius. The projectile, which is about twelve feet in length, forms the body of the machine and is divided into two compartments. The propeller is mounted at the front end of it, while the shaft extends through the entire torpedo to the rear compartment, where an 18-horsepower motor is housed. The speed and course of the machine are regulated by means of a gyroscopic mechanism, while a timing device of some sort releases the engine containing missile at the proper instant for it to strike its target.

#### Its Sort.

"Did you see where in the storm the other night the jail was struck?"  
"Well, what better place for a lightning bolt?"

Because a man growls at his wife it is no sign that she is afraid of him.

### Russia's Natural Roads.

Russia is almost a roadless land. It is inconceivable to the foreign visitor who has never left the beaten track of the railways in Russia how a great empire can have subsisted so long and so successfully without even a pretense at roads. The secret lies in the fact that for five or six months in the year nature herself provides roads over the greater part of Russia—admirable, smooth, glassy roadways over hard-worn snow.

The traffic is further cheapened over these roads by the substitution of a sledge-runner for the wheel and axle. This brings the cost of land carriage as near the cheapness of water-borne freight as possible and it is the principal reason why Russia in the twentieth century is still a roadless land.

### A Ton-Weight Turtle.

That turtle "weighing nearly a ton" (fisherman's weight?) lately landed at Penzance cannot be either the green turtle, associated with civic feasts, or the hawk's bill, from which we get tortoise shell. These two belong to tropical seas, and are of smaller dimensions. The ponderous "hinsack" caught off Scilly must be a "loggerhead" turtle, which occurs in the Mediterranean and sometimes visits our southern coasts. The "loggerhead" is the only carnivorous turtle, and distinguished from the green variety by size, shape of head, and number of plates on the armor. But he is occasionally cooked in mistake for his edible cousin, with disastrous results to the diners.—London Chronicle.

The bore can head off all effort to forget that he is a bore.

Never judge women and cigars by their wrappers.

## Three Words To Your Grocer— "New Post Toasties"

will bring a package of breakfast flakes with a delicious new corn flavour—flakes that don't mush down when milk or cream is added, nor are they "chaffy" in the package like the ordinary kind.

These New Post Toasties are manufactured by a new process using quick, intense heat which raises tiny bubbles over each flake, the distinguishing characteristic. And the new process also brings out a new corn flavour, never tasted in corn flakes of the past.

Try a handful dry—they're good this way and the test will reveal their superior flavour. But they're usually served with milk or cream.

## New Post Toasties

—for tomorrow's breakfast.

Sold by Grocers everywhere.

## PROGRESS MADE IN AGRICULTURAL CLUBS

Jack Starr of Midland, Tex., and His Registered Duroc-Jersey Pig—Age of Pig Eleven Months, Weight 450 Pounds.

(By B. LARA.)

There has been an increase of more than 41,100 in the membership of various boys' and girls' agricultural clubs conducted by the state agricultural colleges and the department of agriculture.

Two years ago there were 210,077 members of the various agricultural club projects in the 33 states covered by this work. One year ago the membership had grown to 151,194, exclusive of the enrollments in the mother-daughter canning clubs.

This work is being carried on co-operatively in 26 of the 33 states in the northern, central and western territory by the department of agriculture and the extension departments of the state colleges of agriculture. In practically every state short courses for boys and girls and special demonstration schools have been held at the colleges and in the field. During the past year, 1,557 club members attended the midwinter courses at the colleges, 968 of these having their expenses paid by local contributions as a recognition of their achievements in club work. Of the 88 club members who, as champions in their states, districts or counties two years ago, have become recognized as National All-Star club members, 31 are now attending high schools, agricultural or other colleges, three of the remaining seven have already graduated from high school, and one will go to an agricultural college this next fall.

Experience has shown that the work in the boys' and girls' clubs can be carried on with even greater success without the aid of large cash prizes

and awards. The net profits from the work itself have been found to be the best possible incentive. The members have their attention directed to problems of farm and home management, crop rotation, soil building, etc., and in practically every state in which the work is being carried on a large number of club members are now working out three and four-year rotations of crops. The profits which they derive from club work they are spending on getting an education, or for purchase of purebred stock and labor-saving

Prize Winner Raised by Oklahoma Boy.

machinery. Many are even buying land and thus acquiring an invaluable sense of dignity and independence.

In the canning work, 938 public demonstrations were held during the year, with a total attendance of 118,367. These demonstrations were held primarily for the club members, but parents were always invited and, as a matter of fact, more than half of those present were grown men and women. One of the great advantages of this club work, indeed, is the fact that it serves to stimulate the parents as well as the children.

### CONSERVE ALL FARM MANURE

Necessary for Farmer to Save All Fertilizers Produced—Sheltered Pit Should Be Made.

During the present potash famine it is necessary for every farmer to conserve carefully all the farm manures produced. It is a well-known fact that farm manures contain a large proportion of the potash that was originally in the plants consumed by the animals. The amount of potash in the manure varies directly with the amount in the plants. Those animals fond of plants running high in potash produce a manure running high in this element. Goat manure is a striking illustration. Animals fond of plants running high in ammonia produce a manure high in ammonia. Horse and cattle manure are in this class. Poultry manure runs high in ammonia and phosphoric acid.

Dean P. H. Rolfs of the University of Florida college of agriculture calls attention to the fact that the ammonia, potash and phosphoric acid content of the manures of these farm animals is in the best condition for use as a fertilizer. If the manures are not protected against leaching rains, the soluble fertilizers or the fertilizing

elements available to plants will be washed out and the manures will lose a large amount of their value.

A manure pit, sheltered against rain, should be provided on every farm. There is no better fertilizer and at the same time there is no more profitable form of fertilizer to employ than farm manures.

### HOGS ARE MOST PROFITABLE

Pork Can Be Raised at Less Cost Than Cotton—Animals Will Gather Their Own Feed.

Hogs are worth about ten cents a pound on the market—almost as much as cotton. You can raise twice as many pounds of hogs per acre as you can of cotton and at less cost. Take the hog end of the proposition.

Plant peas, peanuts, clover, grasses, chufas, sweet potatoes, sorghum and the like for hogs. They will gather their own crop without waste and every pound they gather is at once converted into a finished product ready for the market at a good profit.

### Wheat Bran for Fowls.

Give the young growing fowls all the pure wheat bran they will consume.

### EXPENSE OF FEEDING MULES

Result of Test Made at Hays Substation—Animals Made Increase of 109 Pounds Per Head.

During the past winter a feeding test was conducted at the Hays substation of Kansas, in which weanling mules were fed for a period of 130 days for an average of \$8.16 per head. The total cost of maintaining the 31 mules used in the experiment was \$252.96, including labor. The average initial weight was 545 pounds, and during the experiment there was an increase of 109 pounds per head.

The mules were fed 6,510 pounds of sudan hay, valued at \$4 per ton; 3,380 pounds of cane hay at \$2.50 per ton; 10,115 pounds of alfalfa hay at \$6 per ton; 12,660 pounds of kafir tallings at \$2 per ton; 6,890 pounds of sorghum fodder at \$1.50 per ton; 201 pounds of oats at 45 cents per bushel; 10,664 pounds of corn-and-cob meal at 93 cents per cwt.; 1,000 pounds of oil-meal at \$1.54 per cwt.; 50 pounds of salt at 75 cents per cwt.; and were given alfalfa pasture 1½ months at 35

cents per head per month. In addition to these costs there was a charge of \$8 for veterinary expenses, 146 hours of man labor at 21 cents per hour, 150 hours of horse labor at 10 cents per hour and 100 hours' use of equipment at 3½ cents per hour.

### KEEP ALL FARM TOOLS SHARP

Tends to Conserve Horse Feed and Strength—Saves Time, Temper and Human Vitality.

By keeping the farm tools sharp you save horse feed and horse strength. It does better work, more of it in one day and pays a better profit. It saves time, temper and human vitality. A good emery stone will pay for itself in one season—get you one and keep the tools sharp.—Clemson College Bulletin.

### Make the Home Attractive.

No one can afford to have a doorway devoid of trees or shrubbery. If you sell, your place will bring less for the lack of ornamentation.

It seems to take on from its lining a sort of velvety tone. Ribbons and flowers, sparingly used, are the principal decoration of these hats. They are mostly sailor or shepherdess forms.

### Quaint Novelties.

The smartest modistes are displaying novelties which surely come under the heading "quaint"—hoops on the hips, for example, and mantles which mold the shoulders after the manner of the dolman of yesteryear.

## RELIABLE REMEDY RESTORES KIDNEYS

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder remedy.

It is a physician's prescription. Swamp-Root is a strengthening medicine. Dr. Kilmer used it for years in his private practice. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it will help you. No other remedy can successfully take its place.

Be sure to get Swamp-Root and start treatment at once.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

In the United States 2,000,000 children, ten to fifteen years of age, are employed in gainful occupations.

## MAN GOT A BATH OF EGGS

Ten Crates of Hen Fruit Bury Philadelphia When Car Hits Wagon.

Covered from head to foot with broken eggs, and in a dazed condition, Anthony Capola, thirty-six years old of 904 Pierce street, was carried into the Methodist hospital last night. After the eggs had been scraped from his clothing and body it was discovered Capola was suffering from lacerations and contusions of the body.

Capola was riding in a wagon along Moyamensing avenue and was buried beneath a wreck of ten crates of eggs when the vehicle was struck by a trolley car. John Downey, an egg and poultry dealer of Chester, driver of the wagon, failed to see the approach of the car and drove across the tracks directly in its path.—Philadelphia Record.

Like attracts like; an empty purse usually goes with an empty stomach.

## Don't Poison Baby.

FORTY YEARS AGO almost every mother thought her child must have PAREGORIC or laudanum to make it sleep. These drugs will produce SLEEP FROM WHICH THERE IS NO WAKING. Many are the children who have been killed or whose health has been ruined for life by paregoric, laudanum and morphine, each of which is a narcotic product of opium. Druggists are prohibited from selling either of the narcotics named to children at all, or to anybody without labeling them "poison." The definition of "narcotic" is: "A medicine which relieves pain and produces sleep, but which in poisonous doses produces stupor, coma, convulsions and death." The taste and smell of medicines containing opium are disguised, and sold under the names of "Drops," "Cordials," "Soothing Syrups," etc. You should not permit any medicine to be given to your children without you or your physician knowing what it is composed. **CASTORIA DOES NOT CONTAIN NARCOTICS**, if it bears the signature of Chas. H. Fletcher.

Genuine Castoria always bears the signature of *Chas. H. Fletcher*

## HEAD HUNTERS GETTING BUSY

Natives of Solomon Island Take Advantage of War to Gather Trophies.

At first sight there does not seem to be a very close connection between the war in Europe and head hunting in the Solomon Islands. Nevertheless, the one arises from the other.

Previous to the outbreak of the war, according to a Vancouver World's Sydney (N. S. W.) correspondent, British, and occasionally German warships patrolled the islands and endeavored to keep down cannibalism among the natives, who are largely of Papuan or Malaysian stock. However, the requirements for the transport of troops led to the recall of the British warships—and the happy head hunter has been free to follow his own devious courses.

In one raid made by a mountain tribe upon a small village near the coast no less than 26 heads were secured. No punishment followed because the whites were unable to organize in time. As a consequence the raids are growing more dangerous and, although as yet no Europeans have been attacked, planters have constantly to keep on their guard.

## Tetterine Conquers Poison Oak.

I enclose 50 cents in stamps for a box of Tetterine. I have poison oak on me again, and that is all that has ever cured it. Please hurry it on to me.

Montalba, Tex., May 21, '08.  
Tetterine cures Eczema, Tetter, Ring Worm, Itching Piles, Old Itching Sores, Dandruff, Chills and every form of Scalp and Skin Disease. Tetterine 50c; Tetterine Soap 25c. Your druggist, or by mail from the manufacturer, The Shuptrine Co., Savannah, Ga.  
With every mail order for Tetterine we give a box of Shuptrine's 10c Liver Pills free. Adv.

## Frog Catchers Busy.

It seems that the home side of the frog-catching industry is looking up, because there are disadvantages to people hunting for frogs on parts of France that are battlefields. A handful of men, whose fathers were in the business before them, work frog catching in Epping forest with Seven Dials as base, and it is one of the most highly specialized industries in London. With frog catching, small catching is allied; the frogs go to some restaurants and to the anatomical laboratories of the hospitals, and the snails are chiefly bought as cleaners of suburban domestic aquariums. The snail that is eaten in Soho comes from the vineyards of France.—London Chronicle.

Every man who knows it all seldom gets a chance to tell it after he gets married.

Sometimes it is easy, and sometimes it is impossible to raise money on a bond of sympathy.

## An Unproductive Visitor.

"Say, young feller," said Bronch Bob, "have you got a gun on you?"  
"No, sir," replied the man with the brand-new cowboy uniform. "I was told that it was better to be unarmed, so as to avoid any impression that I was seeking a quarrel."

"Well, that's a big disappointment. I needed a brand-new gun an' thought you'd be bringin' along at least a pair of 'em. Don't you let anything like this occur again."

## READ THIS FROM A PROMINENT RAILROAD MAN

Mr. John W. Hager, Fuel Inspector of the N. C. & St. L. Ry., living at 3028 Carlisle, Nashville, Tenn., writes: "During the fall of 1914 I had the gripe for six weeks and had three doctors. One bottle of Lung-Vita did me more good than all of the medicine they had given me. Last winter my little boy had the whooping cough and we thought he would never be well again. We tried everything we could think of, with no results, until we used Lung-Vita. After using this medicine he is well and hardy and has never been bothered any more. We would not be without it in our home." Use Lung-Vita for consumption, asthma, coughs, croup, whooping cough, and whooping cough. If your dealer does not have it send \$1.75 for a thirty-day treatment today. Nashville Medicine Co., Dept. C, Nashville, Tenn. Adv.

## A Wise Provision.

A good story is being told, apropos of preparedness, on a clever labor orator who lately spoke in Baltimore. In a speech made in another city he absentmindedly put his finger in his mouth and in an outburst of energetic eloquence inadvertently bit it. Later on, exigencies more or less common to suffering humanity caused him to part with the offending teeth and replace them with a good brand of artificial ones. But the remembrance of the former still rankled, and when he began his preparations to speak in Baltimore he removed the teeth carefully, and putting them on the table beside him, looked at the audience and quietly remarked: "Safety first."

## What is Coming?

Mr. R. G. Wells is more interested, so he tells us in his latest book, "What is Coming?" in the tomorrow than in the today. The past he regards simply as material for future guessing. Remembering his many successful forecasts of previous years, this latest volume, in which he deals with social conditions after the war, is possessed of great significance. How are people going to make up the waste of the world's resources, the killing of so large a majority of the men in nearly every European country, universal peace and unhappiness? What, in short, is in store for the next generation?

If a girl knew how pretty she doesn't look when she cries, she wouldn't do it.

## Had Severe Kidney Trouble

Engineer J. E. Fellows of the C. N. O. & T. P. Ry., of Chattanooga, Tenn., writes that when he was firing he was attacked with kidney trouble. He took various medicines and tried doctors, but neither did him any good. A friend advised him to try

## Dr. Thacher's Liver and Blood Syrup

He did so, and improved from the first. He has never been troubled since, and what it did for him it will do for you. It is the safest and surest treatment for indigestion, kidney and liver trouble. 50c and \$1, at all druggists.

## WINTERSMITH'S CHILL TONIC

Sold for 47 years. For Malaria, Chills and Fever. Also a Fine General Strengthening Tonic. 50c and \$1.00 at all Drug Stores.
