

# FRUIT LAXATIVE FOR SICK CHILD

"California Syrup of Figs" can't harm tender stomach, liver and bowels.

Every mother realizes, after giving her children "California Syrup of Figs" that this is their ideal laxative, because they love its pleasant taste and it thoroughly cleanses the tender little stomach, liver and bowels without griping.

When cross, irritable, feverish, or breath is bad, stomach sour, look at the tongue, mother! If coated, give a teaspoonful of this harmless "fruit laxative," and in a few hours all the foul, constipated waste, sour bile and undigested food passes out of the bowels, and you have a well, playful child again. When its little system is full of cold, throat sore, has stomach-ache, diarrhoea, indigestion, colic—remember, a good "inside cleaning" should always be the first treatment given.

Millions of mothers keep "California Syrup of Figs" handy; they know a teaspoonful today saves a sick child tomorrow. Ask at the store for a 50-cent bottle of "California Syrup of Figs," which has directions for babies, children of all ages and grown-ups printed on the bottle. Adv.

## German Coal Supply Twice Britain's.

Professor Letiner, an Austrian, estimates that at the present rate of consumption the coal mines of Great Britain will be exhausted in 720 years, whereas Germany has enough coal, including the invaded territory, for eighteen hundred years.

## ANY CORN LIFTS OUT, DOESN'T HURT A BIT!

No foolishness! Lift your corns and calluses off with fingers—it's like magic!

Sore corns, hard corns, soft corns or any kind of a corn, can harmlessly be lifted right out with the fingers if you apply upon the corn a few drops of freezone, says a Cincinnati authority.

For little cost one can get a small bottle of freezone at any drug store, which will positively rid one's feet of every corn or callus without pain.

This simple drug dries the moment it is applied and does not even irritate the surrounding skin while applying it or afterwards.

This announcement will interest many of our readers. If your druggist hasn't any freezone tell him to surely get a small bottle for you from his wholesale drug house.—adv.

**Auto Lifts Itself.** By using a new jack with a rocker-like base an automobile can be made to literally lift itself.

**The Quinine That Does Not Affect The Head** Because of its tonic and laxative effect, Laxative Bromo Quinine can be taken by anyone without causing nervousness or ringing in the head. There is only one "Bromo Quinine." B. W. GROVE'S signature is on each box. 30c.

**Loop the Loop With a Load.** Lieutenant Nagorski of the Russian army aviation corps has looped the loop with a passenger and 1,100 pounds of extra weight.

# ENDS DYSPEPSIA, INDIGESTION, GAS

"Pape's Diapepsin" cures sick, sour stomachs in five minutes—Time It!

"Really does" put bad stomachs in order—"really does" overcome indigestion, dyspepsia, gas, heartburn and sourness in five minutes—that—just that—makes Pape's Diapepsin the largest selling stomach regulator in the world. If what you eat ferments into stubborn lumps, you belch gas and eructate sour, undigested food and acid; head is dizzy and aches; breath foul; tongue coated; your insides filled with bile and indigestible waste, remember the moment "Pape's Diapepsin" comes in contact with the stomach all such distress vanishes. It's truly astonishing—almost marvelous, and the joy is its harmlessness.

A large fifty-cent case of Pape's Diapepsin will give you a hundred dollars' worth of satisfaction.

It's worth its weight in gold to men and women who can't get their stomachs regulated. It belongs in your home—should always be kept handy in case of sick, sour, upset stomach during the day or at night. It's the quickest, surest and most harmless stomach doctor in the world.—Adv.

**Friendship.** Mabel—Do you know anything about Tom Brown? Arthur—Why Tom is my best friend. Mabel—I know that, but is he all right otherwise?

**To Drive Out Malaria** And Build Up The System Take the Old Standard GROVE'S TASTELESS CHILL TONIC. You know what you are taking, as the formula is printed on every label, showing it is Quinine and Iron in a tasteless form. The Quinine drives out malaria, the Iron builds up the system. 50 cents.

The United States yearly spends \$100,000,000 in building public schools.

# CZAR ABDICATES AFTER BIG REVOLT; SON ON THRONE

Russian Duma in Control of Great Empire—500 Persons Killed.

## GRAND DUKE MADE REGENT

Simultaneous Uprisings in Petrograd and Moscow—Empress Placed Under Guard—Emperor Heeds Demand to Quit—Soldiers Join Revolutionists and Two Statesmen Are Slain.

Petrograd, March 19.—Czar Nicholas of Russia has abdicated and the Grand Duke Michael Alexandrovitch, his younger brother, has been named as regent of the empire.

Nothing official regarding the dynasty's future has been given out, but it is understood the Grand Duke Alexis, heir apparent, is to be recognized formally when conditions become settled.

**Corrupt Ministry Ousted.** The Russian ministry, charged with corruption and incompetence, has been swept out of office.

One minister, Alexander Protopopoff, head of the interior department, is reported to have been killed, and the other ministers, as well as the president of the imperial council, are under arrest.

A new national cabinet is announced, with Prince Lvoff as president of the council and premier, and the other offices held by the men who are close to the Russian people.

**No Peace Movement.**

The duma joined hands in the revolt which aimed at the reactionary conduct of the war and the ineffective distribution of food. Its success means a more aggressive part in the war and is said to put an end to German hopes for a separate peace with Russia.

The British and French ambassadors here already have established official business relations with the new cabinet and with the executive committee named by the duma. It was this committee that forced the czar's abdication.

**Czar on Way From Front.**

London, March 19.—A Reuter dispatch from Petrograd says that the emperor is expected to arrive at the Tsarskoe-Selo palace and that several regiments with artillery are hastening to the same place.

The Grand Duke Nicholas is reported to have reached the Russian capital. The dispatch says that he will probably take command of the troops.

According to information received here the Russian people have been most distrustful during recent events of the personal influence of Empress Alexandra. She was supposed to exercise the greatest influence over Emperor Nicholas.

The Empress Alexandra, before her marriage to the emperor of Russia in 1894, was the German Princess Alix of Hesse-Darmstadt.

A popular revolution has been successful and the government of Russia rests temporarily with a self-appointed committee of the duma.

After three days of battle, in which the majority of the 30,000 troops in Petrograd mutinied and supported the revolutionists, calm has returned.

The czar's abdication was in compliance with the urgent demand of the committee of the duma, which notified him that upon his assent depended the fate of the dynasty.

**Troops Back the Duma.**

Telegraphing from Petrograd Wednesday, Reuter's correspondent says Kronstadt, the fortress and great naval station at the head of the Gulf of Finland, 20 miles west of Petrograd, has joined the revolutionary movement. Two deputies, Popelauff and Taskine, on instructions from the duma committee, proceeded to Kronstadt, where the troops placed themselves at the disposal of the duma.

The Copenhagen Ekstrabladet reports that the Russian consul in Haparanda, Sweden, says that former Premier Sturmer and Minister of the Interior Protopopoff were killed in Petrograd. Both were charged with pro-German sympathies.

**New Cabinet Announced.**

A new national cabinet is announced, with Prince Lvoff as president of the council and premier, and the other offices held by the men who are close to the Russian people.

The members of the new national cabinet are announced as follows:

Premier, President of the Council and Minister of the Interior—Prince Georges E. Lvoff.

Foreign Minister—Prof. Paul N. Milboukoff.

Minister of Public Instruction—Prof.

**EAGER TO PROSECUTE WAR**

English Correspondent Asserts That All Classes of Russians Favor Continuation of Hostilities.

London, March 19.—Reuter's Petrograd correspondent sent the following dispatch concerning the Russian revolution under date of March 14:

"Your correspondent has been in the streets both night and day for the last three days. He has seen long lines of hungry men, women and children, and

has seen the wanton firing of rifles and machine guns, and a civil war in the main thoroughfares, but has not heard a single word against war.

"A shortage of food, the lack of organization and the neglect of the most elementary provisions are popularly ascribed to German influences. This is a word of warning on every lip.

"The killing of Rasputin was the match that set fire to the vast heap of patriotic detestation that Russia would desert her well of her allies if she would give herself the chance.

Professor Manuiloff of Moscow university Minister of War and Navy, and interior—A. J. Guchkoff, formerly president of the duma.

Minister of Agriculture—M. Ichingarov, deputy from Petrograd.

Minister of Finance—M. Tereschchenko, deputy from Kiev.

Minister of Justice—Deputy Kerenki of Saratoff.

Minister of Communications—N. V. Nekrasoff, vice president of the duma. Controller of State—M. Godneff, deputy from Kazan.

**Control Is Complete.** That control by the new government is complete is undoubted. Telegrams from generals commanding at the various fronts have displayed an astonishing unanimity of support of the new order.

Demonstrations against the government have been frequent during the last few weeks. The attempted proroguing of the duma fanned the fires, which spread rapidly from class to class and from civilians to troops.

Sunday it broke forth in flame. Panic-stricken, the government ordered the mounted patrols to fire on the people. The patrols refused, and a battle between the police and the troops followed, regiment after regiment joining the revolutionists, seizing and throwing the heads of the secret police into prison.

For three days open battle raged in the streets of Petrograd. Strikes in factories and on street cars were called in sympathy with the revolution.

Wednesday the week's nightmare of revolution ended more suddenly than it had begun. Planks were pulled from windows, doors were unbarred, factories, stores and banks reopened.

**500 Slain in Revolt.**

The only evidence that a revolution had been fought and won was the smoldering ruins of a few public buildings. The cost in life is unknown. It is believed, however, that it did not exceed 500.

Magical and sudden as was the transition from the old to the new, it is believed here that its results will be almost immediately visible in the institution by the new Russia of a more vigorous and efficient prosecution of the war against Germany.

**Appeal Made to Czar.**

The duma telegraphed the principal generals at the front to use their influence with Emperor Nicholas in support of the duma's appeal for a popular government, says Reuter's Petrograd correspondent.

General Brussiloff, commander in chief of the armies on the southwestern front, replied: "Your telegram received. I have fulfilled my duty to my emperor and my country."

Gen. Nicholas V. Ruzsky, member of the supreme military council, replied: "I have carried out your request."

M. Rodzianko, president of the duma, sent the following telegram to Emperor Nicholas: "The situation is becoming worse. Measures must be taken immediately, for tomorrow it may be too late. The hour has arrived when the fate of the country and of the dynasty is being decided."

M. Chtchegivoff, president of the council of empire, was arrested in his home and temporarily held in the ministerial room of the duma.

A telegram received by the naval attaché of the Russian embassy in Paris reported that the railways and public services in Petrograd had resumed work.

The revolution, which evidently was carefully prepared, broke out simultaneously in Petrograd and Moscow. The garrisons, which obeyed the instructions of the revolutionaries, immediately took possession of these cities after comparatively little fighting and equally small amount of destruction of property.

**Petrograd Bridge Blown Up.**

In Petrograd one bridge was blown up. Strict military rule prevails and the army has the situation so well in hand that it is not expected adherents of the late government will be able to offer any serious resistance, even in remote provinces.

After receiving word of the revolution, it is reported, Emperor Nicholas returned to the palace, where he arrived on Wednesday.

The soldiers refused to act against the crowd which started trouble when it heard of the ukase issued by Emperor Nicholas proroguing the duma. On Sunday the committee which had met to discuss the food situation was partly transformed into a provisional government under the presidency of President Rodzianko of the duma and included representatives of the duma council of the empire and of the municipality. The garrison agreed to support the provisional government.

The proclamation by the military governor in Petrograd forbidding any street assemblies and declaring that any disorders would be ruthlessly suppressed made it appear that affairs were graver than the dispatches allowed by the Russian censorship would indicate.

## GIVING AN UPWARD SQUEEZE

Illustration Given Herewith Shows How One of Standard Milk Machines Is Operated.

The drawing shown here illustrates how one of the standard milking machines draws the milk from the cow's teat. Any method of drawing the milk from the udder down through the teat also tends to draw blood from the veins of the udder down into the smaller veins of the teat. It is necessary that something shall keep massaging this blood back from the teat, so that it will continue in circulation. The comfortable upward squeeze does exactly this. This squeeze is adjustable, so that the

Machine in Operation.

operator, by turning a little lever, can give a heavier squeeze to a big-eared cow and a lighter squeeze to a small-eared cow. Thus each cow gets just the squeeze needed in her individual case—a feature that makes each cow give her maximum.

When the calf milks, its tongue has a squeezing action on the teat, the same as your tongue does if you place your finger in your mouth and suck it. This squeezing action of the calf's tongue keeps the blood in the teat in circulation. If the calf stopped squeezing, just sucked each swallow, it would slowly suck so much blood down into the veins of the teat that the teat would appear red and swollen.—Farmers Mail and Breeze.

## RECORD OF PIG IMPORTANCE

Small Amount of Work Required to Keep Books if Done Regularly—Profit or Loss Shown.

It is a good thing to keep records of all the farm operations. They may seem trivial at the time, yet some day are sure to be of great value and are a great help and satisfaction in clearing up difficulties that frequently arise. It requires only a small amount of work to keep them if the work is done regularly and systematically. The very fact that records are kept makes one careful of details and interested in making the things of which the records are kept turn out the best. It helps one to have a firm grasp on his affairs and to know just where he stands in all his work. He knows whether he is running his farm or any branch of his farming at a profit or at a loss.

In no branch of farming are records of more importance than in dairying. It is of actual money importance to know whether a cow is making a profit or the feed she consumes or is eating more than she is worth.

## VENTILATION OF DAIRY BARN

Where Air Is Good, Cows Should Remain in Stalls at Night Both in Summer and Winter.

If ventilation of the barn is good, cows should remain in the stall all night, both in summer and in winter. If ventilation is imperfect in very hot weather it would be advisable to turn them out in some clean lot or pasture, but in doing this considerable manure is lost.

During some of the colder days of winter it would be advisable not to turn cattle out except during short periods for watering. Chilly weather has considerable influence in reducing milk flow and a good cow should not be exposed to too severe climatic changes.

## CULL OUT ALL THE LOAFERS

Dig Increase in Profits Made by Farmer Who Weeded Out All Unprofitable Animals.

Merely by culling out the unprofitable cows one farmer reports that he was able to raise the milk receipts per cow from \$50 one year to \$120 the next, and the live-stock receipts per \$100 worth of feed from \$76 to \$176. This made it possible for the farmer to increase the profit \$1,500 on his farm in addition to what the farm contributed toward the living and after 1 per cent interest on the investment had been subtracted. The year profits the farmer had lost money.

# FARM STOCK

## PLACE FOR FARROWING SOWS

That Animal May Not Be Disturbed She Should Be Kept Separated From Other Swine.

The less a sow is disturbed at farrowing time the better, and for this reason she should be kept separate from the other swine. While someone should be on hand, unless she needs assistance, it is best to keep away from her. If it does become necessary to help, do it as quietly as possible. As the pigs are not able to take much milk, the flow should not be stimulated for a few days. Give the sow plenty of water, as she is in feverish condition, but take the chill off of it if the day is cold.

It is not necessary to feed the sow for a day or two, and the first feed given should consist of a small

Sow in Healthy Condition.

amount of thin slop, which should be gradually increased as the pigs become able to take more milk. In two weeks' time she should be on full feed, which should consist of a good, laxative, milk-producing ration. There is no better way of feeding the pigs than through the mother, so feed the sow for the greatest amount of milk.

## ARRANGE QUARTERS FOR RAM

His Rough Treatment of Ewes Is Source of Great Loss to Farmer—Keep Him Separated.

Allowing the ram to stay with the ewes through the winter and spring until lambing or shearing time is not always the best practice. It's good for the ram in case the ewes are well fed; he will get the lion's share, occupy the space for three ewes at the trough and rack, and grow fat and abusive. He will choose to eat where the ewes have peacefully lined themselves up rather than take an open place where feed is untouched, writes R. A. Hayne in National Stockman and Farmer. He stalks about and bunts the ewes out of his way on all occasions.

His rough treatment, bunting his way and crowding up to feed racks is a source of abortions and premature births.

Sheep values justify every care to increase numbers and values of next year's lamb crop.

Better arrange to put his ramship in other quarters than the ewe fold.

That doesn't mean to isolate him in some small, dark, damp corner of the barn basement or to exile him to a back lot without shelter or regular feed.

## ERADICATE ALL OX WARBLES

Hides Are Lessened in Value and Milk Production Decreased by Presence of Grubs.

When you find small lumps on the back of an animal with round openings in them, squeeze them and the grub that burrows under the hide will be found. These are ox warbles. Kill them, for they are one link in the life cycle of the ox warble fly.

Hides are reduced in value from 1 to 2 cents a pound by the presence of ox warbles. Flesh is sometimes so damaged as to be unfit for sale. Milk production is lessened by the presence of numerous grubs. Cattle in general are annoyed seriously by these warbles. Removing and destroying all the grubs from infested cattle will reduce the number of egg-laying females for next summer.

## SUBSTITUTE SLAG FOR HAY

Can Be Safely and Profitably Done in Rations for Horses and Mules, Says Missouri Station.

Sludge can be safely and profitably substituted for a part of the hay in the ration for work horses and mules at the rate of two pounds for one pound of hay, is the conclusion reached by the Missouri station after two years' trials.

## HORSE CARE IN WET WEATHER

First Scrape Animal, Then Blanket Him, Giving Good Rubbing—Keep Legs Warm and Dry.

When the horse comes in wet with rain, first scrape him, then blanket him, and rub his head, neck, loins and legs. If the weather is cold put on an extra blanket in 20 minutes. Change the wet blanket when the horse dries. It is important to have the legs warm and dry.

# WOMAN NOW IN PERFECT HEALTH

What Came From Reading a Pinkham Advertisement.

Paterson, N. J.—"I thank you for the Lydia E. Pinkham remedies as they have made me well and healthy. Some time ago I felt so run down, had pains in my back and side, was very irregular, tired, nervous, had such bad dreams, did not feel like eating and had short breath. I read your advertisement in the newspapers and the newspapers and

decided to try a bottle of Lydia E. Pinkham's Vegetable Compound. It worked from the first bottle, so I took a second and a third, also a bottle of Lydia E. Pinkham's Blood Purifier, and now I am just as well as any other woman. I advise every woman, single or married, who is troubled with any of the aforesaid ailments, to try your wonderful Vegetable Compound and Blood Purifier and I am sure they will help her to get rid of her troubles as they did me."—Mrs. ELSIE J. VAN DER SANDE, 36 No. York St., Paterson, N. J.

Write the Lydia E. Pinkham Medicine Co., (confidential) Lynn, Mass, if you need special advice.

## Caught the Post.

Pat was walking along the road, when, hearing a whir, he looked back, and saw Larry flying fast and furious on a bicycle.

"Hi! wait a minute!" shouted Pat. "I want to speak to you."

"I can't. I'm in a hurry. I want to catch the post," cried Larry, flying by.

Suddenly the bicycle swerved, and crashed into a telegraph pole on the roadside, and Larry and the bike lay in a helpless tangle. As Pat came on, Larry was extricating himself from the wire puzzle.

"Begorra!" said Pat with a grin, "I see you caught the post."

Dr. Peery's "Dead Shot" not only expels worms or Tapeworm but cleans out the mucus in which they breed and tones up the digestion. One dose sufficient. Adv.

Pure glycerin will help to dissolve fruit stains from linen.

## Rest Those Worn Nerves

"Every Picture Tells a Story" Don't give up. When you feel all unstrung; when family cares seem too hard to bear, and backache, dizzy headaches, queer pains and irregular action of the kidneys and bladder may mystify you, remember that such troubles often come from weak kidneys and it may be that you only need Doan's Kidney Pills to make you well. When the kidneys are weak there's danger of dropsy, gravel and Bright's disease. Don't delay. Start using Doan's now.

**DOAN'S KIDNEY PILLS** 50¢ at all Stores Foster-Milburn Co. Prop., Buffalo, N.Y.

## For Lameness

Keep a bottle of Yager's Liniment in your stable for spavin, curb, splint or any enlargement, for shoulder slip or weeny, wounds, galls, scratches, collar or shoe boils, sprains and any lameness. It absorbs swellings and enlargements, and dispels pain and stiffness very quickly.

**YAGER'S LINIMENT**

This liniment is the most economical to use as a 25 cent bottle contains four times as much as the usual bottle of liniment sold at that price. Sold by all dealers. GILBERT BROS. & CO. BALTIMORE, MD.

## FROST PROOF CABBAGE PLANTS

Early Jersey and Charleston Wakefield, Succession and Flat Dutch, 50¢; 1,000, \$2.00; 5,000, \$10.00. P. O. St. Louis, Postpaid. See No. 100. Satisfaction guaranteed.—TOWN & P. O. ST. LOUIS, MO. Seed and Pepper plants at \$1.50 per 1,000, \$5.00 at \$1.25, P. O. St. Louis, Postpaid. 40¢ per 100.

J. F. JAMISON, SUMMERVILLE, S. C.
