

CALOMEL WHEN BILIOUS? NO! STOP! ACTS LIKE DYNAMITE ON LIVER

I Guarantee "Dodson's Liver Tone" Will Give You the Best Liver and Bowel Cleansing You Ever Had—Doesn't Make You Sick!

Stop using calomel! It makes you sick. Don't lose a day's work. If you feel lazy, sluggish, bilious or constipated, listen to me!

Calomel is mercury or quicksilver which causes necrosis of the bones. Calomel, when it comes into contact with sour bile, crashes into it, breaking it up. This is when you feel that awful nausea and cramping. If you feel "all knocked out," if your liver is torpid and bowels constipated or you have headache, dizziness, coated tongue, if breath is bad or stomach sour just try a spoonful of harmless Dodson's Liver Tone.

Here's my guarantee—Go to any drug store or dealer and get a 50-cent bottle of Dodson's Liver Tone. Take a

spoonful and if it doesn't straighten you right up and make you feel fine and vigorous I want you to go back to the store and get your money. Dodson's Liver Tone is destroying the sale of calomel because it is real liver medicine; entirely vegetable, therefore it cannot salivate or make you sick.

I guarantee that one spoonful of Dodson's Liver Tone will put your sluggish liver to work and clean your bowels of that sour bile and constipated waste which is clogging your system and making you feel miserable. I guarantee that a bottle of Dodson's Liver Tone will keep your entire family feeling fine for months. Give it to your children. It is harmless; doesn't gripe and they like its pleasant taste.—Adv.

W. L. DOUGLAS

"THE SHOE THAT HOLDS ITS SHAPE"
\$3 \$3.50 \$4 \$4.50 \$5 \$6 \$7 & \$8 FOR MEN AND WOMEN
Save Money by Wearing W. L. Douglas shoes. For sale by over 9000 shoe dealers. The Best Known Shoes in the World.

W. L. Douglas name and the retail price is stamped on the bottom of all shoes at the factory. The value is guaranteed and the wear protected against high prices for inferior shoes. The retail prices are the same everywhere. They cost no more in San Francisco than they do in New York. They are always worth the price paid for them.

The quality of W. L. Douglas product is guaranteed by more than 40 years experience in making fine shoes. The smart styles are the leaders in the Fashion Centers of America. They are made in a well-equipped factory at Brockton, Mass., by the highest paid, skilled shoemakers, under the direction and supervision of experienced men, all working with an honest determination to make the best shoes for the price that money can buy.

Ask your shoe dealer for W. L. Douglas shoes. If he cannot supply you with the kind you want, take no other make. Write for interesting booklet explaining how to get shoes of the highest standard of quality for the price, by return mail, postage free.

W. N. U., CHARLOTTE, NO. 19-1917.

Backache

In spite of the best care one takes of oneself, any part of the human machine is liable to become out of order. The most important organs are the stomach, heart and kidneys.

The kidneys are the scavengers and they work day and night in separating the poisons from the blood. Their signals of distress are easily recognized and include such symptoms as backache, depression, drowsiness, irritability, headache, dizziness, rheumatic twinges, dropsy, gout.

"The very best way to restore the kidneys to their normal state of health," says Dr. Pierce, of Buffalo, N. Y., "is to drink plenty of pure water and obtain from your favorite pharmacy a small amount of Anuric, which is dispensed by almost every druggist." Anuric is inexpensive and should be taken before meals. You will find Anuric more potent than lithia, dissolves uric acid as water does sugar.

WINTERSMITH'S CHILL TONIC

Sold for 47 years. For Malaria, Chills and Fever. Also a Fine General Strengthening Tonic. 50c and \$1.00 at all Drug Stores.

CULTIVATION OF DASHEEN INCREASING

Dasheen Plants Shown Growing in Field Near Brookville, Fla.

(Prepared by the United States Department of Agriculture.)

The dasheen, a root crop introduced into this country from Trinidad within recent years by the United States department of agriculture, is now grown by a considerable number of farmers and truckers in the South, and promises to become a valuable member of the group of domestic vegetables such as the potato which furnish starchy foods. The new vegetable is closely related to the taro, which is an important factor in the food supply in portions of the tropics. The dasheen is itself primarily a tropical plant. It can be grown successfully, however, not only in the warmer portions of Florida, but in other sections of the South as far north as South Carolina. The edible portion of the plant includes a large central corm and a number of tubers, of much smaller size, attached to and around the corm.

The value of the dasheen, it is believed, will be as a crop supplemental to rather than a substitute for the potato. The fact that the dasheen matures in the fall when potatoes must be obtained from Northern producing sections should make the new plant especially valuable in the economics of the Southern farmer.

In food value the dasheen is comparable to the potato, though it contains a smaller proportion of water and a greater proportion of protein, starch and sugar than the latter. The new vegetable may be prepared for the

table as potatoes usually are, or may be made into flour and used in baking. The tender shoots forced from the large corms may be prepared like asparagus, and make a pleasing dish in that form.

Culture and Handling of Dasheens.
The dasheen is grown from whole tubers weighing a few ounces. They require a frostless season of at least seven months with plenty of moisture. A moist but well-drained, rich, sandy loam has been found to be a satisfactory soil for dasheen culture. A large proportion of either clay or muck in the soil produces strong-flavored, tough corms which are often unfit for table use. Large crops are produced under such conditions, however, and make excellent stock feed.

The crop is planted in February in southern Florida and as late as the early part of April in South Carolina. The plants are spaced about 3 1/2 by 3 1/2 feet. Dasheens may be dug for home use by the middle of September and the main crop can be harvested at any time after the last of October. The clumps of tubers are left on the surface of the ground for several days to dry. The tops and small roots are then broken off and the dasheens placed in storage.

The dasheen is a good shipper and is handled by the carriers at the same freight rates as potatoes. The vegetable has already found its way into a number of northern markets.

PARASITES IN SWINE

Mixture Recommended by Expert at Oklahoma College.

Many Breeders Use Straight Arsenic, Form Known as Arsenous Acid Being Most Commonly Employed—Turpentine Is Good.

(By W. P. SHULER, Department of Veterinary Medicine, Oklahoma A. and M. College, Stillwater.)
Treatment of hogs for the kidney worm is usually of little or no avail. According to different reports, seven out of ten hogs slaughtered will be infested either in the region of the kidneys, lungs, the intestinal tract or circulatory system. For intestinal parasites a mixture like the following will give good results:

Powdered nux vomica 1 part, powdered calcium sulpho-carbolate 1 part, powdered black antimony one-half part, powdered charcoal 2 parts, common salt 2 parts, gentian 1 part, oil meal 2 parts.

Many cases of infestation by parasites is charged up to hog cholera. Too little attention is paid to parasitic troubles. As to the arsenic treatment for kidney worms, there is much dispute about its efficiency. Many breeders use the straight arsenic, the form known as arsenous acid being most commonly employed. It is given in 10 to 20-grain doses. A teaspoonful of arsenic would be a sufficient dose for a half dozen average-sized hogs. Care should be exercised in its use, and it ought to be stirred into slop, or if mixed with mash care should be taken that the mixture is quite complete. This treatment is continued for eight or ten days at a time. Some seem to think that where arsenic is beneficial, the parasites are not located in and around the kidneys, but rather on account of the purging and vomiting produced by large-sized doses of arsenic, the parasites are located in the stomach and intestines, or the bile ducts of the liver. Excessive purging and vomiting would have a tendency to eliminate them. Turpentine is also thought to have a beneficial action. A teaspoonful of oil of turpentine for each hog twice or three times daily for a period of eight or ten days should be given. The best method, however, of handling conditions of this sort is to keep the animals away from infected feed and pens. If they feed on acorns, keep plenty of copperas and charcoal, especially charcoal, convenient for them to eat. The formula for parasites in general has given very good results.

Almost the Same.
"You're crazy about George, aren't you, sis?"
"Huh! Mother says I'm crazy to have him about."

The purgative forces within the body sometimes slow up through Winter and need stimulating in Spring. Wright's Indian Vegetable Pills are just the thing to make Nature's forces easy. They are tonic as well as laxative. Adv.

Many so-called hair tonics raise more hopes than hair.

PLAN FOR SOUTHERN STATES

Farmers Urged to Follow Safe Agricultural Program—Raise Live Stock and Food Crops.

In view of the high prices of food-stuffs, farmers in the Southern states are being urged to follow what is termed a safe agricultural program, comprising the raising of live stock and the growing of food crops as well as cotton.

ROTATE TO ERADICATE PESTS

Most Available and Economical Plan in Control of Intestinal Worms and Fever Tick.

(By G. M. BENTLEY, Associate Entomologist, Tennessee Agricultural Experiment Station.)
In sections affected with contagious diseases of live stock pasture rotation is essential. In the control of stomach and intestinal worms in sheep, hogs and cattle, intelligent rotation covering definite periods, based upon longevity and life history of the pests, is now recognized as the most available and economical plan.

The fever cattle tick may be permanently eradicated by positive rotation. It has been found that if cattle and horses are removed from a pasture during the summer months it becomes free from ticks. During the winter if infested cattle are run upon a cornfield or other cultivated field upon which no animals have been during the summer all the ticks will drop off, after which the animals may be placed upon the pasture that was freed of ticks during the previous summer. The Tennessee experiment station has prepared a bulletin upon the eradication of the tick by pasture rotation methods, which may be had on application.

PROPER RATION FOR SHOTES

Mixture of Corn, Wheat Shorts and Tankage Is Recommended by Expert of Oklahoma Station.

(W. L. FOWLER, Oklahoma Station.)
An excellent ration for young shotes is one consisting of a mixture of corn, wheat shorts and tankage. The first two months feed these grains in the following proportions by weight: Corn, four parts; shorts, two parts; tankage, one part. The second two months feed the following proportions: Corn, six parts; shorts, two parts; tankage, one part. During the last two months feed the following proportions: Corn, nine parts; shorts, two parts; tankage, one part.

I would mix this together and moisten with water. This will be a well-balanced ration and the pigs should be fed twice a day just as much of this mixture as they will clean up well. The younger the pigs the more rich feed or protein substances they need. During the last few weeks of the fattening period they will do better and put more fat on with a greater proportion of corn in the ration. If you have no corn you can substitute kafir or feterita. It would be well, of course, to grind all the grain.

COTTON CATERPILLAR

The cotton caterpillar, where they exist in sufficient numbers to entirely denude the cotton fields of all foliage and squares late in the season, may considerably accelerate the movement of the weevil and extend the territory infested, since the food supply has been cut off and much longer distances are covered in search of subsistence.

Is Your Back Stiff, Lame and Achy?

Do Weak Kidneys Keep You Sick, Tired and All Worn Out?

IF YOU have a constant, dull ache, or sharp pains whenever you bend or twist your back, and the kidney secretions seem disordered, too, don't waste time plastering or rubbing the bad back. It's likely that the cause is kidney weakness, and delay in treating the kidneys may invite uric acid poisoning, gravel, dropsy or fatal Bright's disease.

Get Doan's Kidney Pills, a special remedy for weak kidneys, used around the world and publicly recommended by 50,000 people in the U. S. A.

Personal Reports of Real Cases

RELIEF HAS LASTED.
John W. Glover, 123 S. Long St., Salisbury, N. C., says: "Doan's Kidney Pills are the best remedy I know of for kidney trouble. I suffered awfully from spells of backache. I had pains across my loins. At times these attacks were so severe that I couldn't get out of bed without help. An old friend told me to try Doan's Kidney Pills and I did. They soon stopped the pain and made me well again. For quite awhile now, I haven't had any need of a kidney medicine. I don't hesitate to say that Doan's Kidney Pills are unequalled."

KEEPS DOAN'S ON HAND.
Mrs. Anna E. Deane, 1012 Marion St., Columbia, S. C., says: "For two and a half years I was laid up with kidney trouble and doctors failed. I had awful dizzy and nervous spells, my back ached and there were severe pains in my sides. My feet and limbs swelled so badly I couldn't stand and my back was terribly weak. For two years, I walked with crutches. Doan's Kidney Pills gave me relief from the first and continued using them until I was well. Since then, I have kept Doan's Kidney Pills in the house and give them all the credit for my cure."

DOAN'S KIDNEY PILLS

The Winner.
"You seem to be pretty intimate with Jinks, the broker. Does he ever give you any tips on the market?"
"Oh, yes; lots of them."
"Have you made any money on his tips?"
"No, not exactly; but I've saved a lot by not playing them."

CUTICURA STOPS ITCHING

Instantly in Most Cases—Write for a Free Sample.

Cuticura is wonderfully effective. The Soap to cleanse and purify, the Ointment to soothe and heal all forms of itching, burning skin and scalp affections. Besides these super-creamy emollients if used daily prevent little skin troubles becoming serious. Free sample each by mail with Book. Address postcard, Cuticura, Dept. I, Boston. Sold everywhere.—Adv.

Skeptical.

"Who's that old guy goin' around with a lantern in broad daylight?" asked the visitor from Sparta. "What kind of a nut is he, anyhow?"
"Oh, that Diogenes," replied the Athenian. "He says he's looking for an honest man."
"And you poor hicks fall for that press-agent stuff?" sneered the Spartan. "Bet you ten to one he'll be doin' a turn in vaudeville at the Odeon next week."

BOSCHEE'S GERMAN SYRUP

Panacea of the Home the World Over.

Why will you allow a cold to advance in your system and thus encourage more serious maladies, such as pneumonia or lung trouble, when by the timely use of a few doses of Boschee's German Syrup you can get relief. This medicine has stood the test of fifty years. It induces a good night's sleep with easy expectoration in the morning. For sale by druggists in all parts of the civilized world in 25 and 75 cent bottles.—Adv.

The manufacture of oil from birch bark is becoming an important industry in the southern states.

Dr. Pierce's Favorite Prescription makes weak women strong, sick women well, no alcohol. Sold in tablets or liquid.—Adv.

Leather waste is an important ingredient of the best grade wallpaper.

Servitude.
"Would you marry a man who would try to use matrimony to avoid military service?"
"Sure I would," replied the girl with thin, hard lips. "That's the kind of man you could soon teach to make up beds and wash dishes."

Many people imagine that Worms or Tape-worm cannot be gotten rid of entirely. Those who have used "Dead Shot"—Dr. Peery's Vermifuge, know that they can. Adv.

Government Issues Warning Against Fly Poisons

Following is an extract from "The Transmission of Disease by Flies," Supplement No. 29 to the Public Health Reports, April, 1916.
"Of other fly poisons mentioned, mention should be made, merely for a purpose of condemnation, of those composed of arsenic. Fatal cases of poisoning of children through the use of such compounds are far too frequent, and owing to the resemblance of arsenical poisoning to summer diarrhoea and cholera infantum, it is believed that the cases reported do not, by any means, comprise the total. Arsenical fly-destraining devices must be rated as extremely dangerous, and should never be used, even if other measures are not at hand."
106 fly poisoning cases have been reported by the press within the last three years. As stated above this number is but a fraction of the real number. Protect your children by using the safe, efficient, non-poisonous fly catcher
