

Patrol.
 Little Dorothy's uncle is both at the war, and she has a great admiration for soldiers. The other day in a crowded street car she was sitting on her mother's lap when a wounded soldier entered. Dorothy immediately slipped to the floor.
 "Here, Soldy," she offered, "you can sit on mamma's lap."—Harper's Magazine.

Deceitful Biddies.
 Fogg is rather disgusted with poultry farming. He says that when he left home yesterday morning forty of his hens were bragging about what they were going to do; but on his return he found that only eight had laid—the rest of the bunch had simply lied.—Boston Evening Transcript.

Philadelphia wants to continue daylight saving plan for duration of the war.

Don't Poison Baby.

FORTY YEARS AGO almost every mother thought her child must have PAREGORIC or laudanum to make it sleep. These drugs will produce sleep, and a FEW DROPS TOO MANY will produce the SLEEP FROM WHICH THERE IS NO WAKING. Many are the children who have been killed or whose health has been ruined for life by paregoric, laudanum and morphine, each of which is a narcotic product of opium. Druggists are not selling either of the narcotics named to children at all, or without labelling them "poison." The definition of "narcotic" is "a drug which relieves pain and produces sleep, but which in poisonous doses stupor, coma, convulsions and death." The taste and odors containing opium are disguised, and sold under the names "Cordials," "Soothing Syrups," etc. You should not permit any child to be given to your children without your or your physician's knowledge. **CASTORIA DOES NOT CONTAIN NARCOTICS, if it bears the signature of J. C. Fletcher.** Castoria always bears the signature of *J. C. Fletcher*.

Disastrous.
 "How is your son getting along in the army?"
 "First rate now. But in his ignorance the poor boy made a mistake when he first reached the cantonment that came very near spoiling his career as a soldier."
 "He didn't commit an offense involving moral turpitude?"
 "No. He called his colonel 'Old Top.'"—Birmingham Age-Herald.

Work or Fight.
 Dey's liable fer ter be trouble 'twixt Mandy and Rastus; kaze Mandy done lay holt er rollin' plin en' she say when dat good-fer-nuthin' Rastus come home she gwine pintedly tell him he got ter work er fight.—Dallas Times-Herald.

GOOD-BYE BACKACHE, KIDNEY AND BLADDER TROUBLES

For centuries all over the world GOLD MEDAL Haarlem Oil has afforded relief in thousands upon thousands of cases of lame back, lumbago, sciatica, rheumatism, gallstones, gravel and all other affections of the kidneys, liver, stomach, bladder and allied organs. It acts quickly. It does the work. It cleanses your kidneys and purifies the blood. It makes a new man, a new woman, of you. It frequently wards off attacks of the dread and fatal diseases of the kidneys. It often completely cures the distressing diseases of the organs of the body allied with the bladder and kidneys. Bloody or cloudy urine, sediment, or "brickdust" indicate an unhealthy condition.

box of imported GOLD MEDAL Haarlem Oil Capsules. They are pleasant and easy to take. Each capsule contains about one dose of five drops. Take them just like you would any pill. Take a small swallow of water if you want to. They dissolve in the stomach, and the kidneys soak up the oil like a sponge does water. They thoroughly cleanse and wash out the bladder and kidneys and throw off the inflammation which is the cause of the trouble. They will quickly relieve those stiffened joints, that backache, rheumatism, lumbago, sciatica, gallstones, gravel, "brickdust," etc. They are an effective remedy for all diseases of the bladder, kidney, liver, stomach and allied organs. Your druggist will cheerfully refund your money if you are not satisfied after a few days' use. Accept only the pure, original GOLD MEDAL Haarlem Oil Capsules. None other genuine.—Adv.

Packers' Profits — Large or Small

Packers' profits look big—
 when the Federal Trade Commission reports that four of them earned \$140,000,000 during the three war years.

Packers' profits look small—
 When it is explained that this profit was earned on total sales of over four and a half billion dollars—or only about three cents on each dollar of sales.

This is the relation between profits and sales:

Profits █
 Sales █

If no packer profits had been earned, you could have bought your meat at only a fraction of a cent per pound cheaper?

Packers' profits on meats and animal products have been limited by the Food Administration, since November 1, 1917.

Swift & Company, U.S.A.

IT PROVIDES WINDBREAK AND SUPPLY OF FIREWOOD, FENCE POSTS AND LUMBER

Not Only is a Well-Managed Farm Timber Stand a Source of Fuel, but it Shelters the Farmstead From the Prevailing Winter Winds.

(Prepared by the United States Department of Agriculture.)
 Trees and shrubs about the home and farmstead not only increase the value of the property but make conditions pleasanter and more healthful. A limited amount of planting may be done, therefore, for comfort alone irrespective of other returns. Where a considerable plantation is contemplated, however, it is essential to know what material may be grown economically and the uses to which it may be put.

On the average farm in the plains region the first effort in planting is to provide a small grove plantation which will protect the buildings from severe winds and furnish shade for greater comfort of both man and animals. Sometimes when such a windbreak has been established the owner tries to make it furnish a supply of material for use on the farm. This is a mistake, for if a belt of trees is planted primarily as a protection against the wind the pruning and removal of much large material may lessen or even destroy its protective value.

Value of Plantation.
 The value of a plantation, other than a windbreak, on the farm lies in its ability to furnish fuel, posts and a limited amount of lumber and repair material. Within a very few years after planting the plantation will need to be pruned and the pruning will furnish considerable fuel, depending upon the size of the plot. If good care is given the trees they will develop rapidly and some thinning will have to be done to prevent harmful crowding. The material thus removed will contribute materially to the upkeep of the farm by furnishing posts and stakes. When the plantation is still older more valuable material may be harvested. Small timbers for building construction, poles for implements, also tool handles, neckyokes, eveners, whiffletrees and, in favorable situations, a limited amount of lumber is provided at home as needed.

Throughout the plains region there is a marked scarcity of timber which will produce even a fair grade of lumber and this fact should be taken into account when species are selected for planting. When a large planta-

tion is established care should be taken to put out such trees as will give the maximum amount of body material and to arrange them so as to derive the greatest benefit.

Secure Best Results.
 In windbreak planting the best results usually are secured when the shortest trees are placed on the side facing the wind, so that a sloping face is presented and the air currents are deflected upward. These short trees should have low-branched habits and dense foliage, in order that they may offer as much hindrance to the passage of air currents close to the ground as is possible. The Russian olive is probably the best for this. Not infrequently, when complaints are made of the reputed ineffectiveness of windbreaks it develops upon examination that the planter has either used unsuitable species and given them poor care or has failed to establish belts of sufficient width.

Species for Northern Region.
 The northern half of the plains region, which includes the eastern portion of Montana, Wyoming and Colorado and the western portions of the Dakotas and Nebraska, is characterized by lower temperatures, heavier precipitation, and a shorter growing season than the southern half. The species recommended for it are: Hackberry, honey locust, white elm, cottonwood, narrow-leaf cottonwood, white poplar, white willow, diamond willow, Russian olive, buffalo berry, Siberian pea tree, Jack pine, western yellow pine.

Species for Southern Region.
 All the species recommended for the northern portion of the plains region may be planted in the southern portion, which includes southeastern Colorado, western Kansas and Oklahoma and northern Texas, and on account of the more moderate temperatures it is possible to extend the list. The following additional species are recommended: Box elder, green ash, black locust, red cedar, Chinese arbor vitae.

Specific information on these species is published in Farmers' Bulletin No. 888, a copy of which can be obtained by applying to the United States department of agriculture, Washington, D. C.

CABBAGE WORM MOST DESTRUCTIVE ENEMY

Spraying Is Effective Remedy in Combating This Pest.

Community Action Is Desirable Wherever Related Crops Are Grown Extensively—Leave Few Poisoned Stalks for Traps.

(From the United States Department of Agriculture.)

The common cabbage worm, the most destructive enemy of cabbage and related crops in the United States, begins its depredations as soon as the young plants are set out in the spring and continues its work throughout the summer. Control measures, to be effective, should begin as soon as the insect makes its appearance. Although the insect caused the total destruction of cabbage, cauliflower, and other crops in large areas in the years immediately after its first appearance in this country in the sixties, control measures have now been perfected to such a degree and adopted to such an extent that losses need not be great. Spraying with a solution of two pounds of powdered arsenate of lead, four pounds of arsenate of lead in the paste form, or one pound of paris green to 50 gallons of water should be begun as soon as the plants are set out and should be repeated as often as examination of the plants shows it to be necessary.

The common cabbage "worm" is the larva of a white butterfly having black-tipped wings. The butterflies appear on warm spring days, and continue about gardens and fields until after several severe fall frosts. In the Gulf region they are present throughout the season. Eggs are laid on cabbage and related plants where they hatch in from four to eight days.

The caterpillar is velvety green, about the color of the cabbage foliage. It eats voraciously and grows rapidly, becoming full grown to ten to fourteen days after hatching. Three generations occur each season in the northeast and probably six in the extreme South. The first generation usually develops on wild plants.

Hand picking may be practiced successfully in small gardens. Where sprays are employed they should be

applied in a fine mist, since coarser applications tend to gather in drops on the leaves and run off.

Community action in combating the cabbage worm is desirable wherever cabbage and related crops are grown extensively. Agreements should be entered by the truckers of the community for each to spray throughout the season and to carefully clean the fields of the bulk of the old stalks as soon as the crop is harvested. A few stalks should be left at regular intervals as traps on which the last generation of female butterflies will deposit eggs. Such stalks should be poisoned freely with arsenicals so that the worms of the last generation will not develop.

INCREASE SUPPLY OF CHICKENS AND EGGS

(Prepared by the United States Department of Agriculture.)

Every commercial breeder, every farmer, every back-yard poultry raiser, is urged to keep these aims steadily in view:

1. Keep better poultry. Standard-bred poultry improves the quality and increases production.
2. Select healthy, vigorous breeders to produce strong chicks.
3. Hatch early to produce fall and winter layers.
4. Preserve eggs when cheap for home use.
5. Produce infertile eggs, except for hatching.
6. Cull the flocks to eliminate unprofitable producers.
7. Keep a small back-yard flock to supply the family table.
8. Grow as much poultry feed as possible.
9. Eat more poultry and eggs to conserve the meat supply.

Preserve Eggs for Winter.
 It is the duty of every farmer not only to preserve eggs for his own use, but to urge his friends living in town to preserve eggs for next fall and winter use.

Hens in Confinement.
 Hens like freedom, but good feed and care reconcile them to confinement. Mature, rugged birds often lay more eggs in close confinement than when at liberty.

Listen to me! Take no more sickening, salivating calomel when bilious or constipated. Don't lose a day's work!

Calomel is mercury or quicksilver, which causes necrosis of the bones. Calomel, when it comes into contact with sour bile, crashes into it, breaking it up. This is when you feel that awful nausea and cramping. If you are sluggish and "all knocked out," if your liver is torpid and bowels constipated or you have headache, dizziness, coated tongue, if breath is bad or stomach sour, just take a spoonful of harmless Dodson's Liver Tonic.

Here's my guarantee—Go to any drug store and get a bottle of Dodson's Liver Tonic for a few cents. Take a spoonful tonight, and if it doesn't

feel fine and you don't want you to go back and get your money. Dodson's is destroying the sale of calomel because it is real liver medicine; entirely vegetable, therefore it can not sicken or make you sick.

I guarantee that one spoonful of Dodson's Liver Tonic will put your sluggish liver to work and clean your bowels of that sour bile and constipated waste which is clogging your system and making you feel miserable. I guarantee that a bottle of Dodson's Liver Tonic will keep your entire family feeling fine for months. Give it to your children. It is harmless; doesn't gripe and they like its pleasant taste.—Adv.

Confused.
 Gen. Leonard Wood said at a luncheon:

"There are so many rewards for bravery and devotion on the other side that a poor soldier naturally gets confused among them.

"There's the V. C., or Victoria Cross; the M. M., or Medaille Militaire; the D. S. O., or Distinguished Service Order; the C. G., or Cross de Guerre, and so on almost indefinitely.

"A doughboy had a grudge against his captain, who was a bit of a martinet. Well, in the Y. M. C. A. one night a waitress said to the doughboy: "Did you know they've given your old captain the C. G.?"

"The doughboy laughed aloud. "Served him darn well right," he said. "How many days?"—Washington Star.

A Meadow Stunt.
 Nebuchadnezzar was eating grass. "I hope to make a hit with Maud Muller," he explained.

When Baby Is Teething.
 GROVE'S BABY BOWEL MEDICINE will correct the Stomach and Bowel troubles. Perfectly harmless. See directions on the bottle.

Divorce pulls the feathers from the wings of love.

Squeezed Small.
 "What's this?"
 "That's your condensed milk."
 "But I ordered a quart. That's no quart."
 "Yes, it is. It's a condensed quart."

Watch Your Stomach In Hot Weather

A Cool, Sweet, Strong Stomach Your Best Safeguard Against Summer Sickness

"Keep your stomach in good working order during the hot summer months and you will have little to fear in the way of sickness" the advice many physicians give as hot weather approaches.

Good, sound, common sense advice, too. For very frequently, and especially in hot weather, these common stomach disorders which so many people seem to regard as of minor importance, do open the way for serious illness.

So keep your stomach sweet, cool and comfortable all summer long. The extra work—change of diet—poisons that come with hot weather—all hit us in the stomach. The strongest stomach will need help this summer as never before.

The one easy way if you have the right remedy is to rid the stomach of too much acid. Because it's superacidity that interferes with digestion and assimilation, and this causes about all those stomach miseries you are so familiar with—heartburn, food-repeat-

ing, indigestion, sour, gassy stomach and that miserable, bloated, puffed-up condition after eating.

Now here is good news. An easy, sure relief has been found to get rid of the harmful acidity and gases in the stomach. It is called EATONIC, a good tasting compound that you eat just like candy. A tablet or two of EATONIC after meals will work wonders. You can have no idea of what sure, quick comfort EATONIC brings until you do try it. Use EATONIC after your meals, enjoy a good appetite and get full strength from the food you eat. At the same time protect yourself from summer stomach and bowel miseries.

Get a big box of EATONIC from your druggist today. He will tell you that people who have used EATONIC say that they never dreamed that anything could give such quick and wonderful results. It costs only 50c a box and if it fails in any way, your druggist, who you know and trust, will return your money.

What Makes You Feel Tired?

If it isn't hard work or exercise, then it's your blood. Your blood has been poisoned by the bite of a malaria mosquito or by stomach and liver disorders. In some cases low vitality and lack of energy is due to thin, weak blood.

Grove's Tasteless chill Tonic

Enriches the Blood and Purifies the Blood; by this means it Strengthens the body from head to toe and you can soon feel its Strengthening, Invigorating Effect. It contains just what the blood needs, Iron and Quinine, in a form acceptable to the most delicate stomach.

GROVE'S TASTELESS chill TONIC is an exceptionally Good General Strengthening Tonic for the Child, for the Mother or any of the Family, young or old. Pleasant to take. Price 60c.

Perfectly Harmless. Contains no Nux-Vomica or other Poisonous Drugs.

Grove's chill Tonic Tablets

You can now get Grove's Tasteless chill Tonic in Tablet form as well as in Syrup, the kind you have always bought. The Tablets are intended for those who prefer to swallow a tablet rather than a syrup, and as a convenience for those who travel. The tablets are called "GROVE'S chill TONIC TABLETS" and contain exactly the same medicinal properties and produce exactly the same results as Grove's Tasteless chill Tonic which is put up in bottles. The price of either is 60c.
