Sewing Hint.

Every woman who has ever attempted to lay hem on nappies or tablecloths or to hem them after they are laid knows the impossibility of doing them quickly or well if the stiffening is not first removed. One way to get them in proper condition is to rub the hem between the fingers and thumbs along the entire length of the hem. This gets out the stiffness and prevents needles from breaking.

Another and better method is before the hem, napkins particularly, is cut apart, wet it along the line of division and for about an inch on each side with a small toothbrush dipped in soapuds. Not only will the thread draw with few if any breaks, but the hem can be laid with much greater ease. Never attempt to cut hem by the eye. It takes little more time to draw a thread, and that is easily made by the children's and is money with which the hem is laid.

The Epiphany is the manifestation of Christ to the Gentile world, and its meaning for us as believers, is the same as it was to the apostles. "Ye shall be witnesses unto me." On all Christians is imposed the blessed and merciful duty of telling in their own way, according to the gifts which God has given to them and the opportunities He opens out before them, the old, old story. A New Model Typewriter!

BUY IT NOW

Yes, the crowning typewriter triumph is here!

It is just out—and comes years before experts expected it. For makers have striven a life-time to attain this ideal machine. And Oliver has won again, as we scored when we gave the world its first visible writing.

There is truly no other typewriter on earth like this new Oliver "9." Think of touch so light that the tread of a kitten will run the keys!

CAUTION!

The new-day advances that come alone on this machine are all controlled by Oliver. Even our own previous models—famous in their day—never had the Optional Duplex Shift.

It puts the whole control of 84 letters and characters in the little fingers of the right and left hands. And it lets you write them all with only 28 keys, the least to operate of any standard typewriter made.

Thus writers of all other machines can immediately run the Oliver Number "9" with more speed and greater ease.

WARNING!

This brilliant new Oliver comes at the old-time price. It costs no more than lesser makes—now out-of-date when compared with this discovery.

For while the Oliver's splendid new features are costly—we have equalized the added expense to us by simplifying construction.

Resolve right now to see this great achievement before you spend a dollar for any typewriter. If you are using some other make you will want to see how much more this one does.

If you are using an Oliver, it naturally follows that you want the finest model.

17 CENTS A DAY! Remember this brand-new Oliver "9" is the greatest value ever given in a typewriter. It has all our previous special inventions—visible writing, automatic spacer, 6 1/2-ounce touch—plus the Optional Duplex Shift, Selective Color Attachment and all these other new-day features.

Yet we have decided to sell it to everyone everywhere on our famous payment plan—17 cents a day! Now every user can easily afford to have the world's crack visible writer, with the famous PRINTYPE, that writes like print, included FREE if desired.

TODAY—Write For Full Details and be among the first to know about this marvel of writing machines. See why typists, employers, and individuals everywhere are flocking to the Oliver. Just mail a postal at once. No obligation. It's a pleasure for us to tell you about it.

"The sleeping brain," says the physiologist, "causes no end of trouble among that mass of school children whose knowledge of English is limited to words which figure in the ordinary street conversation, and many curious results have followed. One curious result observed by the teachers is to require such a definition of the word, then its derivation, and finally a sentence in which the word is properly used. The word 'ligament' fell to the lot of a rather diffident boy recently. He lunched it properly as 'a band,' but followed up the correct derivation with this remarkable sentence: 'I was awakened up last night by aearler a brass ligament going down the street.'

Sleeping Brain Active Thinker.
It is only with children and the primitive races that the dream says right out what it means without disguise and symbolism. What the child cannot have by day he gains by night in his dreams. Savages are simple in their mental activities—their dreams are like those of children. We adults have in our subconscious mental life, condensed and slumbering, our whole childhood history. By a wish we can awaken our sleeping childhood—it flowers in our dreams. But usually in our dreaming the mind has work to do; the sleeping brain thinks logically with most complex activity. It unfolds adult dream motives by myriad wrappings of associated ideas.
