THOROUGHLY dependable mower is a big A asset at having time. A good mower should be able to cut grass in any condition satisfactorily, and in this respect the Deering New Ideal is a pronounced leader.

The flexible movement of the cutter bar which permits close cutting over rough ground, the one-piece main frame with all holes drilled in one operation to secure perfect alignment of parts, the covered gears and the special quality steel ball and roller bearings, etc.

Still another point—the ledger plate on the Deering mower extends the full length of the cutting surface of the guard, giving the advantage of a complete shear cut, whether the knife section is old or new. This does away with all clogging of the grass between the knife section and

the rear end of the ledger plate.

Drop in and see us and we will show you the mower in detail.
