

# ASPIRIN

Introduced by "Bayer" to Physicians in 1900

You want genuine Aspirin—the Aspirin prescribed by physicians for nineteen years. The name "Bayer" means the true, world-famous Aspirin, proved safe by millions of people.

Each unbroken package of "Bayer Tablets of Aspirin" contains proper directions for Colds, Headache, Toothache, Earache,

Neuralgia, Lumbago, Rheumatism, Neuritis and for Pain generally. Always say "Bayer" when buying Aspirin. Then look for the safety "Bayer Cross" on the package and on the tablets.

Handy tin boxes of twelve tablets cost but a few cents. Drug-gists also sell larger packages.

Aspirin is trade mark of Bayer Manufacture Monocaceticacidester of Salicylicacid

Shoes at \$14 a pair can't seem to keep back gaiters.

Anything worth having is worth working for.

Roosters do a lot of crowing, but the egg them on.

Adam also got his eyes open after his marriage.

## WOMEN WILL TALK

For three generations women have been talking about Stella Vitae—"Woman's Relief," "Mother's Cordial." Telling each other what Stella Vitae has done for them, and their daughters, and their friends. Any woman may try Stella Vitae on the positive guarantee that if the first bottle doesn't help, the druggist will refund the money. Ask your druggist.

What Some Women Say About

## STELLA-VITAE

MR. H. L. HALL, of Larkinsville, Ala., a well-known merchant who sold STELLA VITAE and used it in his family, writes: "STELLA VITAE has proved to be the best medicine my wife has ever used for a run-down system."

MRS. LILLIE REYNOLDS of Madison, S. C., says: "I have been using your STELLA VITAE with wonderful results. It is the most wonderful medicine for women that I have ever used. I want all my friends to try STELLA VITAE."

THACHER MEDICINE CO., Chattanooga, Tenn., U. S. A.

## FAIRNESS IS GOVERNMENT'S ONE GREAT OBJECT IN MARKET NEWS DISTRIBUTION

Telegraphic Reports From Many Centers Regarding the Movement of Many Products Form the Basis of Federal Market Dispatches.

(Prepared by the United States Department of Agriculture.)

The authority back of a market report largely determines its value. Reports from the bureau of markets, United States department of agriculture, are counted of peculiar value in the maintenance of healthful economic conditions in America because they supply information that is comprehensive, always up-to-date, and unbiased.

What may be characterized as the key positions in the government's market-reporting organizations are the market stations. These are branches of the bureau of markets maintained in nearly a score of the larger cities, and one of their chief functions is to collect and distribute market news relating to several or all of the following products: Fruits and vegetables, live stock and meats, dairy products, hay, grain, and mill feeds and seeds.

Most of the branch offices are connected by leased wire with Washington and receive and distribute market news daily. The original data are assembled and condensed into reports, reviews and press articles which are distributed according to the needs of the market. Most of the men in charge of this work have had technical training and considerable experience either in production or marketing.

**Station Men Understand Selling.**  
The work of these men resembles that of the county agent in that it is localized, but it differs from it since it deals primarily with the selling and not the producing phase of agriculture. In other words, the market station man begins where the county agent, in most cases, leaves off. He is able to analyze market problems comprehensively because he meets dealers, shippers, and buyers and is in daily touch with local trade conditions.

The co-operation which the market stations maintain with State marketing agents in 27 states is a decidedly helpful feature of the market news service. The national service is concerned chiefly with the wholesale marketing of produce shipped from one state to another, but the state agents are interested in local produce, both wholesale and retail. The national and state forces often unite not only in securing information, but in helping to solve special marketing problems and conditions, such as the more rapid movement of crops in seasons of heavy production.

The service of the market stations

and state agencies tends to displace many of the private agencies whose scope of operation is apt to be less comprehensive, prompt, and reliable. In addition to this general information, which might be called routine market news, various sections in the bureau of markets render important service by securing data regarding special commodities. The fertilizer sections, for example, have conducted inquiries and made reports on the supply and demand for fertilizers and fertilizer material. The transportation sections have rendered valuable aid in securing complete and regular reports on shipments, and also by expediting the unloading and return of cars. Without information on these related subjects, buyers and sellers often would go far wrong in their bargaining.

Prompt distribution of the information which the bureau of markets' representatives secure is essential to its value. Reports are collected early in the morning and are telegraphed from city to city so that they can be published the same day. In this way market information for the entire country is placed in the city dealers' hands a few hours after it is collected, and often shippers at remote country points have the data the morning following its compilation. The reports show not only actual sales or shipments of various commodities, but other important items which have a bearing on the markets.

**Scope of Information.**  
In the course of the year the information made available through the United States department of agriculture has to do with the marketing of between 1,500,000 and 2,000,000 carloads of live stock and 500,000 to 750,000 cars of fruits and vegetables. The movement of cotton, dairy products, dressed meat, grain, and feed is covered in the same comprehensive fashion. It has been estimated that the department's market news reaches from 4,000,000 to 5,000,000 readers through the newspapers, while the market bulletins, reports, reviews, and special articles go to tens of thousands of growers and dealers. Obviously, the growers and dealers profit directly from the market news service because of its completeness and fairness, but of no less importance is the benefit to the public at large, resulting from healthful, above-board competition promoted by easily obtainable market information.

### STEERS STARTED ON SILAGE

Material Is Bulky Enough to Eliminate Danger From Overfeeding and Is Much Relished.

Silage has largely solved the problem of starting steers on feed. It is bulky enough to eliminate danger from overeating and unless cattle are accustomed to it they rarely eat greedily of it at the start, according to George W. Godfrey of Iowa State college.

Western range cattle that never saw corn take to silage as quickly as those of our native cattle that are not accustomed to it. When fed fodder these western cattle at first pick off the ears and husks, leaving the stalks and ears. With silage they get acquainted with the corn taste at the start.

When grain is added to the ration, if spread over the silage, it is more evenly shared by the steers. Even when cattle are going at once onto a heavy grain feed a start with silage is best, as it allows a more rapid increase in the grain ration without danger.

A short preliminary feed of silage also puts them in good condition to make the best use of the grain ration later. Silage has a place in every feed lot that nothing else can quite fill.

### MORE PROTEIN IN LEGUMES

Also More Carbohydrates in Alfalfa, Cowpeas and Such Crops Than in Johnson Grass.

Alfalfa, clover, lespedeza, cowpeas, soy beans, peanuts, all contain considerably more protein and more carbohydrates as well, than the non-legume hay, such as Johnson grass, timothy, prairie sorghum, etc.

### COLTS REQUIRE MUCH GRAIN

If Animals Are Compelled to Consume Large Quantities of Silage They Develop Slowly.

At the University of Missouri, colts have grown from 562 pounds in weight on September 15 to 897 pounds on April 21, on a daily ration of 8.42 pounds of one-half shelled corn and one-half oats and 7.8 pounds of hay. Colts can consume small quantities of silage, but if they are forced to eat large quantities of silage they cannot be expected to grow as much as they would if fed more liberally on grain.

Bran, when available, and a small quantity of oilmeal may be fed to advantage to colts. Exercise, fresh water and good quarters must be furnished if best results are to be expected, but it should be borne in mind that the colt which arrives at its yearling form stunted and thin will be handicapped for the next two or three years of its life and may, perhaps, never fully recover.

### DIGESTIBLE HAY NUTRIENTS

Nearly Three Times as Much in Timothy as in Corn Silage—Latter More Palatable.

In 100 lbs. of timothy hay there are 48.8 lbs. of digestible nutrients, or nearly three times as much as there is in corn silage. Corn silage, being a succulent feed and more palatable, is, on the whole, more easily digested. We have always calculated that one ton of timothy hay is equivalent to about two and a half tons of corn silage. Putting it in another way, when timothy hay is worth \$10 a ton corn silage is worth \$4.

# WRIGLEYS

Bright eyes, rosy cheeks and red lips come from good digestion.

Wrigley's is a delicious aid to the teeth, breath, appetite and digestion.

Sealed Tight Kept Right

The Flavor Lasts

A13

Brutal Conduct. "Does Mayme's husband treat her badly?" "Yes; never gives her a chance to find fault with him."

## "Diamond Dyes" Tell You How

A Child can Follow Directions and get Perfect Results

Each package of "Diamond Dyes" contains directions so simple that any woman can diamond-dye a new, rich, fadeless color into worn, shabby garments, draperies, coverings, whether wool, silk, linen, cotton or mixed goods. Buy "Diamond Dyes"—no other kind—then perfect results are guaranteed even if you have never dyed before. Druggist has color card.—Adv.

**An Inducement.**  
"The prices in this fashionable restaurant are very steep."  
"Maybe that is why so many climbers are to be seen here."

The occasional use of Roman Eye Balm at night upon retiring will prevent and relieve tired, watery eyes, and eye strain.—Adv.

It is difficult for a young man to understand what attractions his sister has for other young men.

## Welcome Relief From the Tortures of Rheumatism

Can Come Only From the Proper Treatment.

Many forms of rheumatism are caused by millions of tiny germs that infect the blood, and until the blood is absolutely freed of these germs, there is no real relief in sight.

The most satisfactory remedy for rheumatism is S. S. S. be-

cause it is one of the most thorough blood purifiers known to medical science. This fine old remedy cleanses the blood of impurities, and acts as an antidote to the germ of rheumatism.

S. S. S. is sold by druggists everywhere. For valuable literature and advice address Chief Medical Adviser, 107 Swift Laboratory, Atlanta, Ga.

## The Right Way

in all cases of DISTEMPER, PINKEYE INFLUENZA, COLDS, ETC.

of all horses, brood mares, colts and stallions is to

"SPOHN THEM"

on the tongue or in the feed with

SPONN'S DISTEMPER COMPOUND

Give the remedy to all of them. It acts on the blood and glands. It routs the disease by expelling the germs. It wards off the trouble, no matter how they are "exposed." A few drops a day prevent those exposed from contracting disease. Contains nothing injurious. Sold by druggists, harness dealers or by the manufacturers. 60 cents and \$1.15 per bottle. AGENTS WANT.

SPONN MEDICAL COMPANY, GOSHEN, IND.

## INDEPENDENT FOR LIFE

This is the story vast numbers of investors in North Louisiana oil leases are telling today. They bought ahead of the drill and sold for huge profits. During the past month 3 wildcat wells made thousands of dollars for such investors. The opportunity is still here for you. There are 500 odd wildcat wells now drilling with many new locations made each week. Acreage which cost a few dollars now undoubtedly will be worth thousands in the near future.

### COULDN'T FORGET THE GREEN

Mrs. Flannigan's Neat Expression of Loyalty to Her Native and Her Adopted Land.

Mrs. Flannigan for years has proudly exhibited from her front window a row of geraniums, in pots wrapped in bright, Irish green crepe paper, says the Indianapolis News. But the other day when her neighbor, whose car was in France for several months, pulled back her window curtain and revealed her flower pots, decorated in red, white and blue paper, Mrs. Flannigan was visibly troubled. She worried and worried. It is quite hard to the loyal to two countries at the same time, yet Mrs. Flannigan desired to do so.

Then one morning her wide Irish smile came back to her face. And guess-by saw in the Flannigan front window a row of flower pots brave in red, white and blue coverings and every covering was tied to the pot with a wide band of green ribbon.

To Be Washed Out.

Wags—Wrote a ballad on my cuff the other day. What would you advise me to do with it?

Wags—Send it to the laundry.—London Tit-Bits.

Usually one or two long visits contrast one to short visits for the rest of his life.

### DEW HAS VITALIZING EFFECT

Abundant Proof That It Possesses Invigorating Action That Affects Growth of Plants.

Dew is vitalizing, not entirely because it is water but because it possesses an invigorating action due partly at any rate to the fact that it is saturated with oxygen, and it has been stated that during its formation peroxide of hydrogen and some ozone are developed. It is not improbable that the peculiarly attractive and refreshing quality that marks the early-morning air has its origin in this way. The difficulty of inducing grass to flourish under a tree in full leaf is well known and is generally explained by saying that the tree absorbs the nourishing constituents of the soil or that it keeps the sunlight away from the grass and protects it from rain. It is doubtful whether any of these explanations is true, the real reason most probably being that the vitalizing dew cannot form upon the grass under a tree, whereas as a rule both rain and light can reach it.

Its Class.

"What steed do you suppose was most popular in the days of chivalry?" "It must have been a knight-mare."

Laws of health are simple. They consist in not enjoying anything a great deal.

## A Food That Builds! Grape-Nuts

A staunch food made of wheat and malted barley, ready to eat, easily digested, and full of sound nourishment

For those who work with brain or brawn there is no better breakfast or lunch than

Grape-Nuts "There's a Reason"

Sold by Grocers

Made by Postum Cereal Co., Inc., Battle Creek, Michigan.
