Buy the Best Mower—Deering

W. E.
IN those years when your hay fields and meadows are in the worst shape for cutting—very heavy stand perhaps, lodged and tangled every way—then you will have reason for being glad your mower is a Deering. You will find ball and roller bearings wherever friction or draft could be reduced. Then, the extremely flexible cutter bar means smooth cutting on rough ground, or on hillsides and knolls. It leaves a close stubble without clogging the inner shoe. The draft is parallel with the tongue. Your tilting lever quadrant gives you an unusual number of cutting angles. Width between wheels prevents side draft. The Deering New Ideal mower is the sturdiest and most durable made. It will last through many haying seasons. Come in and see how well it is built.
