TIRE VALUES versus TIRE DEFINITIONS

WE KNOW that car owners are interested in real TIRE VALUES, but are not particularly interested in tire definitions which manufacturers and distributors of special-brand mail-order tires had the National Better Business Bureau adopt that they could use to their advantage in their advertising.

When the National Better Business Bureau realized that the public was being misled—and an attempt was being made to keep the truth about real tire values from car owners, they issued a bulletin July 10th which in substance retracted their sponsorship of tire definitions.

Firestone extra values are the result of great savings in buying—great savings in efficient and economical manufacturing and distributing, plus the patented process of Gum-Dipping—the patented two extra cord plies under the tread—and a more efficient non-skid tread, which makes them safer than any other tire.

We have sections cut from Firestone Gum-Dipped Tires and Special-Brand Mail-Order Tires, and invite you to come in and judge for yourself the extra values we give you—values that you can see and understand instead of "definitions." Then we know you too will buy Firestone Tires as thousands of other car owners have done to the extent that during May, June and July they bought more Firestone Tires than during any like period in history—Drive in today!

*When the National Better Business Bureau realized that their Bulletin No. 634 was being taken advantage of by some advertisers they issued a Bulletin dated July 10th as follows:

"In our Bulletin No. 634 entitled 'Definitions of Terms Used in the Tire Industry' we published definitions of First Line—Second Line—Third Line—Heavy Duty and Super Heavy Duty Tires.

"Our definitions pointed out, 'Although each manufacturer's or distributor's first line tire may represent his best standard size 4 or 6 ply tire, there is not necessarily any equality of competitive first line tires as to materials, workmanship or price.' This interpretation also applies to all lines of tires.

"We therefore recommend that advertising to the consumer shall avoid the use of these terms for the purpose of comparing competitive products."

*A "Special Brand" tire is made by a manufacturer for distributors such as mail order houses, oil companies and others, under a name that does not identify the tire manufacturer to the public, usually because he holds his "best quality" tires under his own name. Firestone puts his name on EVERY tire he makes.

Double Guarantee—Every tire manufactured by Firestone bears the name "FIRESTONE" and carries Firestone's unlimited guarantee and ours. You are doubly protected.
