

Get Your Car Ready for Winter

The Temperature Is Going Downward
Says the Weather Bureau
and COLD WEATHER IS COMING!

You who own automobiles know what this announcement means. To some people it means trouble with their cars; to others it has no meaning at all. Many people here long ago learned to bring their cars to our place BEFORE cold weather really gets here, and have the radiator inspected, ignition parts adjusted, and the radiator filled with a fluid that DOES NOT FREEZE!

For Real Comfort, too, let us install an
ARVIN HEATER

That will keep you as warm in the car as you would be by your own fireside. Better come in NOW and have this necessary work done.

Let us furnish you with Firestone Brake Lining, and may we also supply you with Replacement Parts for your Car.

McCrary Tire and Battery Service

SMALL LEAKS DANGEROUS

You car owners can save so much money and terrible annoyance by having your cars prepared NOW for the cold weather that is just around the corner. Officials of the A. A. A. have pointed out the practice of so many people waiting until the freeze comes, and then rushing around to the garage to have their cars filled with anti-freeze. This is not satisfactory, either to the garage man or to the car owner. You should let us remove all rusted parts from the engine, jacket, radiator, and other parts of the cooling system that gathered during the summer. Then we can prepare your car for winter, save you much money and promote your happiness and peace of mind. Talk it over with us now.

A Stitch In Time Saves Nine

That's an old proverb, true as life itself. We have coined a new phrase that is just as true as that old proverb. It is this:

**Bring Your Car to the Foot of the Hill
and Save Money on Your Garage Bill**

It will take us but a short time to fix your car for the cold of winter—and winter is right here upon us, according to the weather man. A dollar spent now may save you many dollars, if you wait until you force your car to stand cold weather in an unprotected manner.

**Don't let us or any one else put Anti Freeze
into your Car until the Car has been
prepared for it!**

We are in our new place, with lots of room and little expense, and we want to show you just how reasonably we can do your repair work.
