MARKED INCREASE SHOWN IN SCHOOLS

Records Given By School Facts Show Tremendous Growth In State.

Raleigh, June 22.—School attendance on North Carolina has increased from 51.7 per cent of the enrollment 31 years ago to 82.1 per cent of enrollment now, during which interval the compulsory attendance law was passed, the current issue of State School Facts, published by Supt. A. T. Allen, shows.

The school population increased from 695,629 for the school year 1899-1900 to 1,045,230 for 1930-31, the enrollment increased from 400,452 to 842,706 and the average daily attendance increased from 206,918 to 691,995 in the 31 years.

Dr. Allen points out that many duplications appear in earlier school records which are eliminated by a new system started in 1930-31, which designates whether a child is being registered for the first time, previously was in a different grade or room in the same school unit, in another county or charter system within the State. This gives different figures for enrollment for the school year, the local school, the county or charter school and the State.

Forsyth county made the best rural white school record for 1930-31, with a 95.4 per cent attendance, while Clay, the lowest, had an attendance of 81.2 per cent. Alleghany had the best colored attendance record and Cherokee the poorest, but neither of these counties has many negro pupils in them.

Transylvania county, taking 82nd place in white pupil attendance among the 100 county rural systems, had 2,375 white pupils enrolled in 1930-31, with an average daily membership of 2,086, an average daily attendance of 1,818, and 87.1 per cent attendance. The colored rural schools of this county took 70th place among the 100 county systems, showing enrollment of 278, daily membership of 218, daily attendance of 177, or a 81.2 per cent attendance record.
