IN MEMORY OF MRS. LEE HOLDEN

Mother is gone, but not forgotten. Never will her memory fade. Sweetest thoughts will ever linger Round the grave where she is laid.

It is sad to part with loved ones. And so hard to see them die. But we trust some day to meet her. In the land beyond the sky.

When the Pearly gates were opened And a gentle voice said come, And with sad farewells unspoken, She was safely entered home.

Yes we loved her, But the Savior loved her more, So the angels sweetly called her, To that bright and happy shore.

The homes dearest friend has left them, In this sad world to roam, We trust she has gone to live with Jesus, In his eternal home.

BY MRS. H. P. HOUSED.

More People Killed By Acidity Than War Say Scientists

"All deaths from so-called natural causes are merely the end-point of progressive acid saturation" says well-known authority

SCIENCE DISCOVERS The Human Body Consists of Eleven Essential Minerals. A Deficiency of Any of These Causes Many Human Ills.

Most Stomach Disorders, Indigestion, Gas, Bloating, Heartburn, Headaches, Constipation, Bileusness, Nervousness, Rheumatism, Sleeplessness, Loss of Strength and Vigor Are Caused by a Lack of Some Essential Mineral Element and a Deficiency of Vitamins.

In the light of recent scientific discoveries, leading Physician and Health authorities agree that the human race could be practically free from most ailments, and could live to a ripe old age if the system could be regularly supplied with a sufficient quantity of the essential Minerals and Vitamins.

DEFICIENCY IN MODERN FOODS

The process of refining modern foods; bleaching of flour, rice, sugar, etc.; together with improper cooking takes out of our foods the very things that God intended we should have.

ACIDITY TEARS DOWN HEALTH

As the Mineral content of the body is lowered, slowly but surely the acid content of the system is increased until it finally reaches the point where the organs of assimilation and elimination cannot perform their natural functions. Our powers of resistance are lowered. Disease germs creep into the blood. The system becomes clogged with impurities. Various aches and pains appear, and before we realize what is happening we are on the very verge of a physical breakdown.

SCIENCE PERFECTS NEW FORMULA

Fortunately for humanity, science has found a way to prevent most of these conditions. After years of careful research and experimentation, a new and remarkable formula has been perfected. This preparation, known as LEE'S MINERAL COMPOUND is a scientific combination of the eleven most essential Mineral Elements of the human body combined with Vitamins. It is not in any sense a patent medicine. It is a natural product of the earth, and its use is in the nature of a FOOD VITAMINIZER. It is the only preparation which contains the necessary Minerals and Vitamins in the quantities which nature intended to be in the food which we eat.

LEE'S MINERAL COMPOUND

A Scientific Preparation Containing in Balanced Proportion Eleven Essential Minerals of the Human Body Combined with Necessary Vitamins

- IRON - which purges the system of impurities, purifies the blood, improves nutrition, exerts a tonic influence upon the nerve centers and increases the haemoglobin of the blood.
- IODINE - which acts as an element in the blood, is essential to the thyroid gland, and is valuable in the treatment of chronic rheumatism, bronchitis, asthma and neuritis.
- COPPER - which exerts a tonic influence on the blood-making organs and is valuable in the treatment and prevention of anaemia.
- CALCIUM - which is essential for proper nutrition of bone, cartilage, tendons and ligaments and of valuable reconstructive value for feeble, undernourished people.
- MAGNESIUM - which acts as a stimulant to the growth of the intestinal tract and helps to combat the effects of dangerous metabolic poisons. A valuable tonic against indigestion and remains a delicate nerve nutrient.
- PHOSPHORUS - which exerts a tonic effect upon the nervous system, helps in the building of bone, assists in correcting skin diseases such as acne and eczema and stimulates the blood-making organs.
- POTASSIUM - which has a marked effect upon metabolism and is essential to vital activity.
- SODIUM - which assists in supplying a deficiency of phosphate, helps in the correction of constipation, infantile diarrhea and jaundice.
- SULPHUR - which is essential to the growth of albuminous organs and tissues plays an important part in the physiological processes of the body, increases the intestinal secretions and is an important element in nutrition.
- CARBON - which plays an essential part in the building of tissues.
- VITAMINS - without which, it is now believed, the human body could neither eat nor die.

Eliminates Excessive Acids, Clears the System of Toxins Builds Blood, Bone and Tissue.
