FARM INCOME GOING UP

—Etinger Research
IF 1943 farm production goals are attained, the estimated cash farm income for 1943 will reach \$17,500,000,000, exclusive of benefit payments. In the chart above this figure can be compared with the cash income to farmers in other recent years. Cost of production has also risen over the period since 1939, but even taking this into consideration the general farm picture is regarded as satisfactory. For the first time in 20 years farm prices have reached parity with other prices. (International)
