

STATE COLLEGE HINTS TO FARM HOMEMAKER

By VERNON STANTON
Assistant State Agent

Eliminate farm fire loss by putting into practice the following:

1. Kerosene stored in metal containers outside of house.
2. Metal screen placed in front of open fire place in house.
3. Wiring in dwelling completely rechecked.
4. Fire extinguisher bought and placed in convenient location in house.
5. All dead leaves removed from around buildings on farm to eliminate fire hazard brought about by dry weather.
6. All sparrow nests removed from buildings.
7. Metal containers provided for matches.
8. Ladders stored in convenient place; to be used in emergency in case of fire.

Stubborn starch spots left on the iron can be removed after the iron cools by rubbing lightly with grade 00 steel wool, a mild scouring power, or cloth wrung from soapuds. If the iron sticks during ironing, rub it on a little salt sprinkled on paper or smooth it lightly with paraffin or beeswax. A pinch of starch will help keep starched clothes from sticking to the iron.

Care in use and storage of cleaners goes hand in hand with getting your money's worth. Your cleaners and other equipment, such as mops and brooms, lose much of their usefulness if you have to go all around Robin Hood's barn to get them.

Ideal storage for your vacuum cleaner and other cleaning equipment is near the place where you use it most often.

Empty your cleaner of dust, or you'll have a grand breeding place for moths. Loosen the cleaner belt if the manufacturer suggests it. Always wind the cord loosely around the clips that are provided. Store attachments in a pocketed bag, a basket, or on round pegs.

UNCLE HANK SEZ

IT LOOKS LIKE SOME OF TH' WOMEN NOW-A-DAYS SELECT THEIR HUSBANDS AS TO HOW MUCH ALIMONY THEY CAN PAY.

Select the BUCHANAN AUTO and ELECTRIC COMPANY when you are in the market for a new radio for your house. It pays to deal with a shop that maintains expert mechanics to service your radio and appliances when they grow old... one who keeps a supply of necessary parts.

The greatest loss of life in a single fire in the history of the United States occurred when 1,200 persons lost their lives in a forest conflagration at Peshtigo, Wis., Oct. 9, 1871. This was the same day that the Chicago Fire of 1871 began.

WHERE REDS OF EUROPE REVIVE COMINTERN

NINE COUNTRIES OF EUROPE have been listed by Moscow as being represented in the organization of a re-established Communist International (Comintern). The declared aims of the organization are to co-ordinate the activities of Communist parties and "combat the imperialism of the United States." On the above map, the black areas indicate the Soviet satellite states. The shaded areas show the Russian-occupied sections of Germany and Austria. Czechoslovakia, Yugoslavia and sections of northern Italy and France (indicated by Soviet symbol) are included by Russia as part of their sphere in a "world split in two." (International)

SOUND PLAN URGED FOR SAVING GRAIN

Raleigh, Oct. 20.—Agriculture Commissioner W. Kerr Scott has urged that bakeries eliminate consignment selling of bread and thus save "untold thousands of bushels of wheat daily" to help the emergency food situation abroad.

Scott said in a wire to U. S. Secretary of Agriculture Clinton P. Anderson that the bakeries' practice of "crowding the market" with consignment bread resulted in the loss of approximately 150,000 bushels of wheat annually in North Carolina alone, and he placed the estimated money value of the loss in this State at about \$1,000,000 a year.

Scott's wire said: "I earnestly urge that the government take immediate steps to get the bakeries of the nation to cooperate fully in eliminating the consignment selling of bread during the food emergency. That will save untold thousands of bushels of wheat daily and in North Carolina alone will result in the saving of approximately 150,000 bushels of wheat annually."

Scott said he got his figures from Department of Agriculture field men in the Pure Food and Drugs Division. Their survey showed, he said, that thousands of loaves of bread were wasted daily in North Carolina through the consignment practice of taking day-old bread off store shelves and withholding it from human consumption, with most of it going to city dumps.

This practice, Scott explained, resulted from the bakeries stiff competition to keep only oven-fresh bread on store shelves.

Scott asked Anderson to send a Department of Agriculture representative into North Carolina for a series of conferences with bakers. At these conferences, the Federal representative would explain the need for food conservation and just how the bakers could cooperate in making more grain available for foreign commitments.

He acted after calling in William C. McIntire, Jr., of Greensboro, secretary of the North Carolina Bakers Council for a conference regarding the big waste of bread. McIntire said he would plan a series of meetings as soon as secretary Anderson notifies him that a Federal representative will be available.

Report of Condition of THE JACKSON COUNTY BANK of Sylva in the State of North Carolina at the close of business on October 6, 1947.

ASSETS	
Loans and discounts (including \$43.92 overdrafts)	511,688.35
United States Government obligations, direct and guaranteed	3,257,427.25
Obligations of States and political subdivisions	114,670.00

TOTAL LIABILITIES (not including subordinated Obligations shown below)	4,681,305.25
CAPITAL ACCOUNTS	
Capital*	100,000.00
Surplus	95,000.00
Undivided profits	29,325.64
Reserves (and retirement account for preferred capital)	50,000.00
TOTAL CAPITAL ACCOUNTS	274,325.64
TOTAL LIABILITIES AND CAPITAL ACCOUNTS	4,955,630.89

*This bank's capital consists of common stock with total par value of \$100,000.00

MEMORANDA	
Pledged assets (and securities loaned) (book value):	
U. S. Government obligations, direct and guaranteed, pledged to secure deposits and other liabilities	795,500.00
TOTAL	795,500.00
Secured and preferred liabilities:	
Deposits secured by pledged assets pursuant to requirements of law	479,273.15
Deposits preferred under provisions of law but not secured by pledge of assets	52,662.79
TOTAL	531,835.94
Subordinated obligations:	
On date of report, the required legal reserve against deposits of this bank was	452,576.36
Assets reported above which were eligible as legal reserve amounted to	1,032,226.22

I, W. J. Fisher, Cashier of the above-named bank, do solemnly swear that the above statement is true, and that it fully and correctly represents the true state of the several matters herein contained and set forth, to the best of my knowledge and belief.

Correct—Attest: W. J. FISHER, Cashier.
S. W. ENLOE, R. L. ARIAIL, D. D. HOOPER, Directors

(Seal)
State of North Carolina, County of Jackson, ss:
Sworn to and subscribed before me this 15th day of October, 1947, and I hereby certify that I am not an officer or director of this bank.
My commission expires December 6, 1948.
J. A. QUEEN, Notary Public.

STATE COLLEGE ANSWERS TIMELY FARM QUESTIONS

QUESTION—When is the best time to remove tobacco stalks?

ANSWER—Just as quickly after harvest as possible. This is a good practice in keeping down diseases and, when combined with crop rotations, is of good service to the tobacco grower. Of course, disease resistant strains of tobacco should be grown on infected soils—the farmer being careful to get just the strain he needs, because no one tobacco is resistant to all diseases. Turning the plant roots up to the sun so that they will dry out will help to reduce all root diseases.

QUESTION—How can I prevent colds and croup in Chickens?

ANSWER—The best thing to do, according to Prof. Roy S. Dearstyn, head of the Poultry Department at State College, is to keep the laying flock in tip-top condition. He explains that colds, bronchitis, and croup infections are generally preceded by some devitalizing factors in the flock. He suggests that the grower make sure that there is adequate Vitamin A in the diet. The litter should be kept dry. Ventilation must be controlled. Failure to do these things will result in a reduction of the vitality of the birds. When these infections hit the flock, egg production drops. The trouble may last for months.

QUESTION—What is a good recipe for making sausage?

ANSWER—Dr. Dan Brady, in charge of meats research at State

College, gives this recipe: 1 pound of table salt, 2 1-2 ounces of finely ground black pepper, and 2 ounces of sage for 50 pounds of pork, three-fourths lean one-fourth fat. Mix the materials thoroughly and then spread evenly over the meat. Stir the meat well before chopping.

Another popular North Carolina recipe includes red pepper. For fifty pounds of trimmings, use 1 pound of salt, 1 1-2 ounces of ground sage, 1 1-2 ounces of black pepper and 1 1-2 ounces of red pepper.
