JACKSON FARM BRIEFS W. T. Brown

HAS GOOD YIELD OF STRAWBERRIES Odell Johnson of the Pumpkin-town section, a G-I trainee, reports a good yield from strawberries. Four hundred plants were set out in the spring of 1947. The plants were cultivated throughout the summer and in the spring of 1948 Mr. Johnson and his family picked 70 gallons of berries from the patch. Of course this many berries was not picked from just the 400 plants, because in the meantime hundreds of runner plants had been produced by the parent plants and as a result a matted row was formed.

This instance bears out the fact that Jackson County is suited to the production of strawberries and even with our limited land resources this crop could still be made to produce a sizable cash income for the small farmers of our county. A ready market is available both locally and at the frozen food processing plant at Hendersonville.

SEEKS 100 BUSHEL RECORD Bobby Moore of Speedwell and a Future Farmer of the Cullowhee chapter, reports a good yield of corn. Bobby planted this acre with the intention of becoming a member of the 100 bushel corn club that has been organized in this state.

Any person who produces 100 bushels or more per acre can become a member.

Bobby planted the new white hybrid, Dixie 17, which is a variety that usually has two ears per stalk. The corn was planted April 19. Six hundred pounds of 4-10-6 was applied at planting time and 300 pounds of ammonium nitrate was used as a top dressing. When

SUNBEAM MIXMASTER FARMERS FEDERATION

Leaf Quota For 1949 Increased 5 Per Cent

Secretary of Agriculture Charles F. Brannan has proclaimed a 1949 national marketing quota for flue-cured tobacco of 1,030,000,000 pounds. The proclamation, made in conformity with the Agricultural Adjustment Act of 1938, as amended, would result in an average increase of approximately 5 per cent for most farmers.

Converting the poundage quota to acreage, on the basis of 1943-47 yields, the 1949 acreage allotments will total about 960,000 acres as compared with 908,000 acres allotted in 1948.

Based on the supply and demand situation, the new quota reflects "conservative estimates of the need for flue-cured tobacco during the current year," the Department of Agriculture said.

The quota may be increased as much as 20 per cent at any time up to March 1, 1949, if the Secretary of Agriculture decides that further developments justify such an increase.
