CHANGES NEEDED IN PRIMARY LAWS

Every time a primary election is held in the sown to a legur state, somebody rises up to say that the old convention method of nominating was preferable to scarce, if peas or beans are planted the primary. The wonder is that we do not hear more objections to the primary than we do. It is as much hay as if the peas or beans are sown broadcast. This will cerby no means an ideal way of selecting candi- tainly make the seed go further and dates. It means that two or three elections must payments under the Soil Conservabe held to elect our officers, when one election tion program. would be sufficient if the nominations could be to whether sorghum or Sudan grass made satisfactorily otherwise. But those of us who remember the old convention methods are predominate the aware that they had some serious objections al-Sudan grass predominates and is cut so. It is true that the nation still clings to the deleting. convention method, and a national primary would be rather clumsy, it seems to us. But we that sorghum and rye have yet to fall upon anything connected with ified as soil conserving for 1936. politics that is altogether satisfactory. It is a choice between evils, and with our present se compens as conserving crops; even cret ballot, the primary is preferable to the convention. But some changes should be made in the laws governing the primary. For instance, we grower the importance of seeding, can see no real benefit to be derived from holding the election from sunrise until sunset these qualify for the soil conserving payment and as large a soil building paylong days in June. It would be as fair for one ment as possible. side as the other if the time of holding the polls open were changed from the present plan to, say ten hours—from eight in the morning until six in the afternoon. This might cause some inconven- many of the other legume crops ience for mill workers, but if the hours were fix- usual weather conditions. ed that way, the voters could make some arrangements to vote if they really wished to vote. The time will come when sunrise to sunset for voting will be looked back upon as an ancient custom. We would like to see our next legisla- to make most profit. When sold diture start something more modern than our pres- ing the cockerelsent out-of-date method.

WITH LANDON AND KNOX"

The above is a slogan used at the Republican Convention held last week in Cleveland, Ohio. Before Knox was nominated for the running ducers using this practice find it mate of Landon, the North Carolina delegation ays well to fatten for extra profits. had originated the slogan, "Land Safe With Landon". Mr. S. B. Roberts, of Marshall, had suggested several weeks ago that a good slogan would be "Land With Landon". However, this the crop properly. With frequent slogan was not made public until the North Car-from losing the leaves, especially olina delegation had an opportunity to cast a complimentary vote for its favorite son, Judge Isaac M. Meekins. When that matter was disposed of, the North Carolinians were free to shout with the vesterners, "Land Safe With Landon" until Publisher Knox became the nominee for Vice-President. The Convention then began for Vice-President. The Convention then began mow. shouting "Off the Rocks With Landon & Knox". Mr. Roberts tells us that he figures that about! 350 North Carolinians were at the Convention, of the churches. It is said farm Those who "listened in" and read the daily past pers know that it was a great show filled with enthtsiasm. And now comes Postmaster General Farley crying that the Republicans should have adopted as a slogan, "Lose with Landon". The November election will show which slogan was prophetic.

FINISHING BROILERS

broilers should be properly finished rect from the brood without fattengets all the profit.

First, cockerels should be seperated from the pullets to do the best. Second, about ten days before marketing the cockrels should be fed a fattening mash. A mixture meal and some kind of fluid milk is used by many poultry producers. This should be fed wet 5 or 6 times day regularly, all broilers will clean up in about five minutes. Do not leave any mixture in trough to sour. The mash should be of a crumby slop condition. Broiler pro-

CURING HAY

After cutting hay at the proper time the next most important step in making a good crop of hay is to cure

. GOOD FARM BUTTER

This should be of special interest besides good cream are the main ctors in making good farm butter

This next week, Mr. Farnham, dairy pecialist, will be in the county to ut on two farm churning demontrations, and to see the 4-H dair

On June 23, he will conduct a hurning demonstration at the farm

HOT SPRINGS, N. C.

and eight pure bred heifers. Most of these heifers have been purchased by 4-H club members. This goal has already been attained by cooperation. Practically all calves came from one herd where the prices were reason-

It is in place to state that a good foundation has been started for the Jersey breed . previously, and plans were made to continue this good work: The Jersey is an ideal dairy cow for several reasons in Madison County: The major reason is that

she is a small individual and does not require as much feed. It is not due to the fact farmers do not have feed, but because of inclination to under feed especially during the winter months.

Farmers active in this campaign were: Emmett Davis, who bought a well bred bull calf, and two outstanding heifers; Mr. Crawford Bryan and son bought a bull calf and heifer besides constructing a safety breeding pen; Mr. T. A. Woody, who bought one of the best bred bulls in the county from the T. V. A. herd and a registered heifer; Mr. C. E. Forester bought a registered bull calf and Mr. J. F. Bryan has bought a registered bull calf.

Besides these other calves bought for 4-H Club members were: One heifer bought by Mr. Bryant Wallin, he had a registered bull at the time

heifer bought by Dr. Ditmore one heifer bought by K. A. Haney; one heifer bought by John L. Miller; one heifer bought by Homer Bryan; and Edith Silver bought a heifer calf.

Mr. J. E. Carter already has a registered foundation herd of six cows and a bull.

There are other pure bred Jersey cattle in the county, but with the stock bought during this year there al all the time. sep daine breed is brighten.

LIMETLIMET LIMET

With Federal aid for liming soil you should take advantage of this opportunity before it is too late.

To the farmers who have filled in work sheets for the soil conservation program for 1936, and have received letters about pooling their lime orders please try to let this office find out your intentions to lime b y July 1. There is already an order of 500 tons of lime to be applied this summer. One township is taking over 200 tons of lime for soil improvement.

There ought to be 1000 tons of

lime used in Madison County this year. Pool your order with your your order with your neighbor to help reduce the price. RUSHING THE WATERS TO THE

When the United States was dis-

overed our forefathers did not find it as it is today. Nature for thousands of years had employed every posible means of promoting life and growth to plants and animals. Grasses, herbs, trees, shrubs, and leaves served as agencies to keep the water from running off to the seas. By the conserving of moisture, floods were and streams flowed natur

eral mere pure bred Jersey. As the population increased with the future for ex and play comes: interth and plow comes: into the picture B cover was started Fre egan and from that day to this the generation has taught the world to try to beat nature by foul play. Now we must break away from what we have been taught and shown all our lives.

The soil erosion specialists report hat on May 11, 1934, the dust storm wept 300 million tons of fertile top oil off the great wheat plains; that 00 million tons of soil materials vashed annually into the Gulf of dexico by the Mississippi River; hat generally water and wind ero-ion together each year remove be-ond use, 3 billion tons of soil.

They find that 100 million acre nce fertile farming land have been sentially destroyed for supposedly rofitable farming. This area is qual to Illinois, Ohio, Maryland, rofitable -(Carried to last page)
