

A Program For Progress A New Day For A New District

As a candidate for the Democratic nomination for State Senator for the 34th Senatorial District, I invite and solicit your support of A Program for Progress, which will stimulate the economic growth of our District, and make it a symbol of progress for the entire State.

LET'S ALL WORK TOGETHER FOR:

1. Honest and clean Government both at home and in Raleigh.
2. The extension and improvement of our primary road system through Madison, Mitchell and Yancey Counties, linking the primary roads in those counties with key highways in this and our adjoining states, thus unlocking our mountain country, improving the facilities of our existing industries, and encouraging new industry to come into our District.
3. The extension and improvement of our secondary road system in our rural areas, thus making them more prosperous, making our churches and schools accessible, and removing the dirt and dust from the homes of our rural people.
4. I am now, and always have been a great believer in quality education, and will enthusiastically support all legislation which will improve educational standards in our public school systems. In this connection, I will insist upon increasing funds for use of TV education in our public schools and particularly in our new District so that this new and modern method of teaching will be available to every public school in this District.
5. The establishment of Industrial Education Centers in key sections of our new Senatorial District, which will give our laboring people and young people who cannot attend college new and additional skills which will enable them to hold better jobs, attract new industry, and keep our young people at home.
6. REA CO-Ops have done a wonderful job in bringing electricity into our rural areas, and have rendered a great service in increasing the prosperity and bettering the living conditions of our rural people. I heartily endorse the aims for which REA was created, and believe that our REA Co-Ops should be protected in the territories which they are serving so that they can better and more efficiently serve our rural people. I will not support any legislation which would take their territory away from them.

I invite your support of this program, solicit your vote at the polls in the Democratic Primary on May 30th. LET'S WORK TOGETHER FOR PROGRESS.

CLYDE M. NORTON,
DEMOCRATIC CANDIDATE FOR STATE SENATOR FOR
THE 34th SENATORIAL DISTRICT

—Political Advt.

ALCOHOL IN A COMPLEX SOCIETY

Memory Selection: "Wine is a mocker, strong drink is a brawler; and whoever is led astray by it is not wise."—(Proverbs 20:1).

Lesson Text: Proverbs 23:29-35; Matthew 18:5-14; Romans 13:11 through 14:23.

As we can see from the Memory Selection, today's lesson is our Temperance Lesson. It is directed towards helping adults understand what it means to be made in the image of God and to accept responsibility for facing the issues created by the use of alcohol.

In reading our Text for today, we study the stewardship of influence. In Paul's day it was considered by some a sin to eat the flesh of animals that had been offered in sacrifice to pagan gods. Again, by others, it was considered a circumstance of no account.

Paul, however, felt very strongly about this; he therefore proclaimed: "If your brother is being injured by what you eat, you are no longer walking in love. . . Do not let what you eat cause the ruin of one for whom Christ died." (Romans 14:15). And again: "It is right not to eat meat or drink wine or do anything that makes your brother stumble." (Romans 14:21).

The influence of one's act on other people is the guiding principle of the passages we are studying today, and they are no less applicable today than they were in Paul's day.

In this day and time we live under continual, often terrific pressures. We live in an uneasy peace; one nation always seems to be transgressing on another perhaps less fortunate neighbor. A

button can be pressed, and the whole of humanity be lost in a holocaust the like of which history has never before seen.

Closer to home, on a day to day basis, man has to fight for a living for his family; the cost of living climbs slowly but steadily . . . there are mouths to be fed, a roof and clothes to be provided, and one's neighbors are faced with the same problem. A job that hitherto had seemed steady can be snatched by a man more capable than another.

Under these pressures, human beings, being human, can quite easily turn to drink. At first one drink may make the troubles of life seem a little less frightening. But soon it may take two to ease the tension . . . and it doesn't always stop at two! Alcohol can work its insidious destruction on one man's life very quickly, and before he knows it, other innocent victims can be embroiled. His family will suffer, his children run in fear and trembling. And, in this age of automobiles and super highways, other people may be maimed, or even lose their lives, for the adage about gasoline and liquor not mixing is, too sadly, often based on facts and figures.

Many alcoholics argue that they are not hurting anyone but themselves; this is a delusion. They are hurting their loved ones, and setting a poor example for their children. This was what Paul meant when he preached concern for one's neighbors.

And Paul's concern should be the church's concern. Too often people who claim to be Christians fail miserably when it comes to love and concern for their fellow men. An uncharitable attitude on the part of church-goers towards this problem of their neighbor who has succumbed to the temptation of alcohol all too often makes the unfortunate one feel unwanted in his community.

Fortunately, however, the attitude towards alcoholics has changed. In this enlightened day and age the problem is recognized for what it is . . . a sickness. And, like any other disease, it can be treated medically. But there is one ingredient that works miraculously — human concern.

It is this concern for humanity that is the basis of Christianity. Love for mankind was the taproot to Jesus' mission on earth, and we must, in our humble, sometimes seemingly ineffectual way, emu-

ON THE GO
Now that school is about out, it's vacation time for junior, but it puts an end to mother's.

REALITY
The high cost of a vacation makes some people sweat even if they do find a cool place to spend it.
