

Rubber Stamp

The rubber stamp Chairman of the Board of County Commissioners tells the voters of Madison County through The News-Record that this is not a rubber stamp administration. That statement amuses me and others who have observed how this administration is operated.

Mr. Doyle Cody, the so-called independent, self-made Republican Chairman of the present Republican County Board of Commissioners, failed and refused to buy 100 steel traps at \$.90 per trap in order to make at least a token effort to protect the citizens, children, and the domestic animals of Madison County. I cannot believe that Madison County is that near broke. I do believe that Mr. Cody had not received permission from Mr. Clyde M. Roberts who uses Mr. Cody and the others to carry out his wishes. Oh, incidentally, I am a life-long Republican from No 7 Township; however, my son, Cordell Massey, used his judgment and registered as a Democrat and I think served the County well as janitor of the Courthouse. At least, Mr. Doyle Cody, who is Clyde M. Roberts' rubber stamp, told my son, Cordell, that he had done a good job and the only reason he was being fired was because of his politics.

Why get two rubber stamps when you have one that is readily available, Mr. Doyle Cody.

Signed: JONAH MASSEY,
A Little Pine Republican, No. 7 Township

Science Show Friday Morning At School Here

"Liquid sunshine" powers a portable radio. A small platform slides across the floor on a thin layer of air. And a "misbehaving" suitcase illustrates principles used in modern guidance systems. Marshall students will see these and other interesting demonstrations when the famed General Motors science show, Previews of Progress, appears at the school on Friday, February 19, at 9:30 a. m.

"We seek through Previews to inspire more young people to make science and engineering their career and provide the trained talent America must have to keep pace with the promise of the future," John P. Gordon, president of General Motors, declares. Mr. Rick Olshove, of General Motors Public Relations Staff will narrate the 45-minute, non-commercial presentation. The public is invited.

Dairymen Did Fine Job In Increasing County Income

The year of 1964 was not a very good growing season, as it is evidenced by a reduction in the pounds of tobacco produced, in the amount of feed produced, and the amount of beef produced in this area. In the face of these adverse growing conditions and the decreased number of dairymen in Madison County, the remaining dairymen increased the entire income in Madison County by \$94,384 over 1963 income figures. The dairymen of Madison County have a right to feel proud of the fine job they have done in 1964, and we hope that they can do an even better job in 1965.

Dairying, although a confining and hard business, enjoys a rather stable market and above average standard of living. If the dairymen are to maintain their position economically, they must continue to move forward in their individual business and as a smooth running organized group. Anytime a group enjoys the position such as our Western North Carolina Dairymen have, there will always be other groups which will be trying to gain some of their prosperity; and only as an organized functioning association can our dairymen maintain their position.

The family black sheep was at one time the petted lamb.

BUSINESS OPPORTUNITY

Dealership

Tobacco Insect Control

National Organization desires Dealer interested in entering into a Partnership in Madison County, N. C. Prefer person with an agricultural background preferably in tobacco.

This project will require at least one man practically full time for next 3 months. No investment required, however, a \$1,000 cash deposit is required upon signing of agreement. This program is most important to the tobacco growers in this county.

For full details, please submit a brief application to Agrilight Systems, Inc., P. O. Box 6107, Forest Lake Branch, Columbia, S. C.

Chevrolet

workpower

"walks" right over bumps and trouble

Independent front suspension takes the "truck" out of truck ride. It smooths rough roads, protects truck, driver and cargo from excessive jolting. And on Chevrolet pickups it's a proved system with millions of miles of user experience behind it. Try it out on one of Chevrolet's great Fleetside or Stepside pickups. It's one of the big reasons that Chevrolet is first choice with pickup users from coast to coast.
