Members Of The Madison County Farm Bureau Are Urged To Vote FOR The ROAD BOND ISSUE ON NOVEMBER 2 If You WANT Better Roads VOTE FOR THEM. It's As Simple As That! William "Bill" Roberts, President

"BIG JOHN" REDUCED GRAIN RATES APPROVED! Great news for the South—and for the Midwest, too! Approval by the Interstate Commerce Commission of Southern Railway's low freight rates for hauling grain in its "Big John" cars - averaging 60 per cent below former rates - now clears the way for the explosive growth of a huge and urgently-needed livestock industry in the grain-deficit Southeast. It can be a \$2 billion-a-year industry! The door of opportunity is now wide open for enterprising people to participate in its development. New and expanded feed lots will be needed, as well as feed mills, grain elevators, packing plants and other facilities for handling grain and processing feed and meat. If you want a part in this development, the time to act is now! The Commission's decision is also great news for the farmers of the grain-surplus Midwest. The demands of this fast-growing livestock industry in the Southeast will open large and profitable new markets for their grain. In addition, Southern's low "Big John" freight rates will also help cut down on imports of meat from other countries. American grain now can be used to feed and fatten American animals, producing meat to be sold at home and abroad. All America will benefit from this decision by the Interstate Commerce Commission. This is regulation in the public interest, and the Commission deserves the thanks and praise of the American people. Southern Railway System
