WHAT TO LOOK FOR BEFORE YOU LEAP INTO THE NEW IRA.

Starting January 1, 1982, you're going to be able to take advantage of a dramatic new ruling regarding tax-deferred Individual Retirement Accounts. A ruling that is going to provide you with the opportunity to put away more money towards your retirement than you ever thought possible. Just about everybody in the financial industry will be offering IRA's, and you're bound to have questions. We'd like to give you a headstart on finding out some answers.

WHAT IS IT?

An IRA is a tax-deferred investment program designed for retirement income. No matter how old you are or how much you earn, an IRA can substantially reduce your taxable income each and every year you contribute. You'll be able to build a solid retirement foundation during your peak earning years. And you will not have to pay tax on these funds until retirement, when you're most likely to be in a lower tax bracket.

WHO IS ELIGIBLE?

Everyone with earned income may participate. Under the old regulations, only workers who were not covered by a qualified pension or profit sharing plan were eligible. Now, under this new ruling, virtually everyone who works can benefit from a tax-deferred IRA.

WHEN AND WHAT ARE THE LIMITS? After January 1, 1982, you may invest up to \$2,000 in an IRA and reduce your earned income by the same amount before calculating your Federal taxes—even if you don't itemize. What's more, if your spouse works, you can each set up an IRA

and together shelter up to \$4,000. Even if your spouse doesn't work, you can set up accounts for both of you and reduce your taxable income jointly by \$2,250. Deposits may be made anytime during the tax year until taxes are due the following April. But you should open an IRA with an eye to the future: if for any reason other than disability you should have to withdraw the funds before you reach age 59½, the withdrawn funds will become taxable and will be subject to a 10% penalty. Plus you will have to forfeit six months of earned interest.

WHY SHOULD YOU WANT ONE?

At First Union, your IRA interest rate can be tied directly to the current money market rate. And when you consider that all taxes are deferred, you'll be surprised at how quickly the interest will accumulate. Furthermore, every penny earned by the funds you deposit will be sheltered until you withdraw them at retirement. Your tax-deferred IRA is also an excellent way to supplement other sources of retirement income such as Social Security. And this special new program offers you the assurance of a sound financial future through regular investing.

WHERE TO GET MORE ANSWERS

Stop by any First Union office. We'll be happy to answer any other questions you may have about IRA's. We hope we've helped to clear up some of the confusion regarding this new investment opportunity so when it comes time for you to leap into the new IRA, you'll know what to look for first.
