Owen, Field Agent of the Bureau of Animal Industry, working in co-operation with the State Department of Agriculture, has conducted comprehensive campaigns in Beaufort, Edgecombe and Nash Counties. This is the beginning of the effort to control hog cholera. Eighty-one addresses have been made and some of these were illustrated with the stereopticon lantern. About 5,838 people have attended these meetings, besides those who were at the serum demonstrations.

Johnson is SENTENCED. Fayetteville, Feb. 11.--James H. Johnson, a wealthy farmer of Cumberland county and a former member of the Legislature, who two weeks ago was found guilty in the records' court of violating the prohibition law in selling less than two gallons of wine and allowing the same to be opened on his place, on whom Recorder Cook Cook continued judgement at the time, was today sentenced to three months on the county roads on each of the two counts by Recorder Cook. He appealed to the Superior Court and gave bond. Johnson is now under suspension of sentence and \$500 bond imposed last year by Judge Rountree for the same offense.

from cholera. Two of the three hogs had high temperatures at the time of treatment.

A very valuable but costly lesson was learned by one man who had a herd of twenty-four hogs. Serum belonging to the county was administered to eleven of those hogs, two of which were treated with serum alone and three were given the usual cautious treatment died. The co-operator was advised to treat the remainder of his herd and to keep the treated ones separate from the untreated. He lost seventeen out of the twenty-four when he failed to do this.

Each county in the State will be visited in this campaign and the work will be carried right into the heart of the rural districts and school around where the farmers dwell.
