WILCOX

Over ten years ago Jim Wilcox of Elizabeth city killed Nellie Crossy, his sweetheart and threw her body into the river. He was tried, found guilty of murder in the first degree and was condemned to death. The crowd in the court room applauded the verdict and that was the ground for a new trial. At the second trial Wilcox was found guilty of murder in the second degree and was sentenced to 30 years in the penitentiary.

He has served about ten years of his sentence and an effort is being made to have him pardoned. It is said Wilcox has tuberculosis and will not live long. At the central prison Wilcox runs the dynamo which furnishes the current at every electrocution in the prison. That poor devil no doubt thinks about how near he came to losing his own life at the hands of the law every time he runs the dynamo when some one is strangled in the death chair.—Monroe Enquirer.

MR. HOBBS IN THE FIELD

Sampson county people in Raleigh this week gave it out to the News and Observer that Mr. S. H. Hobbs of Clinton, is in the field for nomination as Commissioner of Agriculture to succeed Commissioner Graham. The news has been looked for. Mr. Hobbs has been prominently identified with farmer's organizations in North Carolina for some years past, and it was at Shelby, two years ago, we believe, that his boom for Commissioner took form and shape. That disposes of one official of the Farmers' Union, and the question will be brought forward as to the claims of a second official for a State office, this official popularly supposed to be Dr. H. Q. Alexander of Mecklenburg. Doctor Alexander's name has been mentioned in connection with one of two offices, but so far as the Observer knows he has made no statement of his inclinations. It is the general opinion, however, that the Farmers' Union will make requisition on the Democratic party for at least two State offices.—Charlotte Observer.

NAME YOUR FARM

Occasionally we get a letter from a farmer on stationery on which is printed his own name and the name of his farm. In some cases we find on the margin briefly stated, what is being made a specialty of on that farm.

OUR EXTRAVAGANCE

Have you ever thought of the waste that our southern people allow to exist with us? Our greatest money crop that amounts to millions of dollars annually to the south is not cared for as much as our northern and western neighbors care for crops that do not compare with our crop, King cotton. It is horrible as we take a look over the country, and especially in the further south to see cotton exposed to the weather, a ground glass and oil mills you can see thousands of pounds going to waste, decreasing in value each day. Now it is no surprise that we are not better off in a financial way. We are the most extravagant people in the United States.

The western farmers have barns for their grain, live stock places to protect their main crop, but all the southern people have the best chance of all the people of the whole country, but we let those go by wanted and then we are always howling hard times.

When our southern people learn to save what God has been so good in blessing us with we will then begin to move faster, and we will then be able to loan funds to other sections of our country instead of us heretofore been frequently calling on other sections of the United States to extend to us the needed financial assistance in order that we might be able to exist with head above board.

We must learn the art of taking care of and saving more if we ever expect to be classed among the best and most successful people on the globe.—Lee County News.

BUSINESS DEPRESSION

Editor Johnson Gives His Opinion of the Real Cause.

One of the philosophers of the town of Thomasville stopped the writer on the streets the other day to tell him some news. "You are hearing a great deal these days," said the philosopher, "about the business depression caused by the collapse of the cotton market, but that is not the bottom of our trouble. We are simply reaping the fruits of our own folly. It is not cotton that has put us where we are but automobiles." There is a great deal more truth than poetry in what this man says. We southern people have been rolling high for the past few years, and our extravagance and reckless living has not been confined to the well to do. Credit has been cheap and we have run it to the limit. Poor men have been doing business on paper like millionaires. A wave of extravagance struck us and we jumped and landed on the beach high and dry at the first abbing of the tide. Anybody with a grain of sense knows that a man with a family to support on a salary of one hundred dollars a month cannot afford to put a thousand dollars in an automobile and spend from \$10 to \$50 a month to run it, and pay his honest debts at the same time. Some of us have been saying "things now and then, but we will be all right at the spirit of spending money was in the air. The poor made the foolish effort of keeping the pace of the rich and walking the dusty highway became almost a discipline. We have now hit the ceiling, and will have time and opportunity to meditate on our folly. After this little flurry we will get down to a solid basis again and it is to be hoped that we have learned our lesson well. We may fool ourselves into the belief that plunging is the proper thing, but we cannot fool our creditors. The medicine we are now taking may be some what bitter, but it will be good for our systems, and whether we like it or not we are obliged to take it. But we need not put it on the low price of cotton, for it is the high rate at which we have lived that gave us the trouble.—Charity and Children.

The editor of your county paper always stands in need of a bushel of potatoes, a sack of water-ground meal, or some such farm product, and would be glad to swap you some nice printed envelopes and paper to match for these things.

It would pay you to do some trading with man, who is doing a lot in his way to help you, so next time you are in town talk it over with him. Before giving the order talk it over with the wife and family, and decide on an appropriate, catchy name for your farm and live up to it.—President Charles S. Barrett in National Field.
