# A LETTER TO THE **COTTON FARMERS**

The world's consumption of American cotton for the last three years amounted to 41,000,000 bales. The American crops for the same three years amounted to 37,786,000 bales. In these three years of war the consumption of cotton has exceeded production by 8,214,-000 hales. Consumption is expected to materially increase this year. Cotton is absolutely necessary to the prosecution of the war as well as to the clothing of the nations of the earth. It is being substituted as to the clothing of the nations of the earth. It is being substituted for many other uses for which material is growing shorter each year. War. These facts, no doubt, are causing our government to make many regulations in the handling of this very important crop of the South. This year our Food Administrator directs that cotton must be han-

This year our rood Administrator directs that cotton must be nan-died in an efficient manner at the gins and, therefore, requires that all ginners must operate under licensed instructions. The seed must be cleaned of lint. No dirt or other foreign matter shall be put into seed that are sold on the market. Gins must also be equipped to give ade-quate service in the saving of time to the farmers.

We have spared no time or cost in equipping our gin plant for operating to the very best interest of the farmers and the government, therefore, in the interest of winning the war.

We can gin 200 bales in a day, will return all your available lint in bale, buy your seed at accurate full weight—no guess—and will have on hand at all times, cotton seed meal for exchange on seed.

We have the most up-to-date ginning plant in the world. according to recognized authority. We are located conveniently, on paved street —no mud—and only two blocks, with paved streets, from the cotton yard of the biggest and best market situated on the A. C. L. Railroad.
