This is 2-4 of 1 cent to 2 1-2 cents above the gold parity price, which is about \$1.29 1-4 cents an ounce. Little business is

being transacted here and the quotations are largely nominal.

YOU AND YOUR MONEY

By JOHN M. OSKISON.

Six members of the President's cabinet, eminent heads of the Council of National Defense, have offered a cure for the high cost of living. It is a good old time-tried cure.

"Our common duty now, fully as much as in the war, is to work and to save," they say. And they quote the President as follows:

"Only by increasing production and by rigid economy and saving on the part of the people can we hope for large decreases in the burdensome cost of living which now weighs us down."

"Work, save, co-operate, produce!" Thus ends the report of the council. The words make a good slogan for you and me.

"Goods and not money are the means of life," say these six cabinet members. Before the prices of things you and I use can go down the supply must be increased. That is an elementary truth. The purchasing power of the dollar is governed by the relative supply of dollars and things we buy.

Just now we have too many dollars and too few goods. We are bidding against one another for the limited supply of houses to live in, clothes to wear, automobiles to drive, and food to eat. The fellow who has the actual thing we want can boost his price until all but the richest of us drop out of the bidding, and the rich man's bid becomes the standard of that thing's value.

The remedy is to stop bidding for a while and get into the game of producing. We've had to withdraw about three millions of our young men from productive work for periods ranging from one year to nearly three. For a longer time we have had to supply (three of the great countries of Europe with most of their foodstuffs and a vast quantity of other materials. No wonder we find ourselves short!

Now our young men are back on the job. The call from Europe is already much reduced and will grow less and less as the demobilized soldiers of France, England, and Italy get back to their home farms and factories.

Personally I know the feeling of irritation that is being expressed by some two millions of Americans who have come back to God's country from a land of no butter, little sugar, scant fuel, and high prices only to find prices still higher! I know why they think the profiteers are too busy, why they want to kick something over.

But I also know what the six men in the President's cabinet say concerning the remedy is true. It isn't a magic remedy; it won't bring down food prices and rent within twenty-four hours. Work is wearisome, and saving requires self-denial. When you are irritated it is hard to co-operate with capital.

Can a workless world be comfortable? The answer from Russia, where the experiment has been tried for three years, is "No." Can the individual profit except by honest effort? Not for long.

Work, save, co-operate, produce.
