*—the phonograph that is featured in Vaudeville's strangest act*

Perhaps you've seen it—Signor Friscoe's "Magic" Xylophone Act.

It's the hit of vaudeville's "Big-Time."

Signor Friscoe's "magic" is an Official Laboratory Model of the New Edison. We have one exactly like it.

Signor Friscoe's instrument is an exact duplicate of this original Official Laboratory [illegible] which cost Mr. Edison [illegible] million dollars to perfect. Our instrument is also an exact duplicate of this famous three million dollar original. We guarantee it to be able to give the same marvelous Re-Creations of music, which Signor Friscoe's Official Laboratory gives in vaudeville.

Come in and test the astonishing realism of this instrument for yourself—in Mr. Edison's Realism Test.

The NEW EDISON

"The Phonograph with a Soul"

You've read how the New Edison has gained its perfection. How in [illegible] tests it has been given, in which [illegible] and artists compared their [illegible] with the Re-Creations by the New Edison. Leading newspapers compiled [illegible] differences between the two.

Has any one suggested to you that these comparison tests are "fakes"—that the artist imitates the New Edison?

Signor Friscoe's performance must [illegible] an assertion positively ridiculous. [illegible] 50,000 people see him [illegible] the xylophone keys. [illegible] aloft—still.

The rippling music continues.

Slowly, the garments [illegible] drop part. The [illegible] Edison stands revealed. [illegible] Signor Friscoe's performance [illegible] Re-Creation it plays. The secret of this extraordinary magic can rest upon only one fact: No one can distinguish any difference between Signor Friscoe's performance and its Re-Creation by the New Edison. Signor Friscoe could not possibly imitate the New Edison, because the xylophone can not be made to imitate any other instrument, as to do so is its handicap.

Signor Friscoe's act is not an Edison enterprise. It merely has been clever enough to use the New Edison for what it is worth. Why don't you?

PRICES

The price of the New Edison has increased but little since 1914. This includes the War Tax.

Mr. Edison has staved off price advances by actually spending more than half of the amount of cost of manufacture.

Because of this exceptionally high quality of materials and workmanship demanded by the Edison Laboratories, and the constant scarcity of both, it may be necessary to advance prices. But rest assured that this will not occur, unless Mr. Edison is forced to it.

Our Budget Plan—the thrift way of spending—will help you buy now. Let us tell you about it.
