Condensed Statement of **The First National Bank** Dunn, North Carolina

Methyl alcobol, commonly know as wood alcohol, was first discovered in 1812 by the research chemist,

Taylor. It is formed by the destructive Bistillation of wood. Also, it can be made from formaldehyde, intention ally or accidentally. You observe the statbilities of gysthetic booch made from alcohol that has been "spiled" with formaldehyde or other postona by government order, to make it un fit for beverage purposes. Interication from wood alcohol (
