

THE DUNN DISPATCH

VOLUME IX.

DUNN, NORTH CAROLINA, SEPTEMBER 19, 1922.

NUMBER 48

BROWN-DYER CO. TO BRING SHOWS TO FAIR AT DUNN

Heat Aggregation To Be Principal Amusement Attraction Along Midway

SPACE IN EXHIBIT HALLS GOING LIKE HOT CAKES

Health Conference Tournament And Other New Features Attract Much Attention—Chief Marshall Wants Assistants—Advertising Matter Being Distributed.

The Brown-Dyer shows, the greatest carnival aggregation to travel the Southern Fair circuits this year will furnish all amusement features along the great midway of the fair at Dunn this year. This was announced yesterday by Ellis Goldstein, business manager of the Harnett County Agricultural Fair Association, who conferred with managers of the mammoth shows while he was in the North a few days ago.

Ratification of a tentative agreement made between Mr. Goldstein and the show company was made Wednesday night by telegram.

The Brown-Dyer shows are the largest ever to have visited Dunn. One solid train of cars is required to transport its tents, menageries and other attractions. It will arrive here over the Atlantic Coast Line on Sunday morning preceding Tuesday, October 10, when the fair is to open.

Work on other features of the fair is progressing nicely. The child health conference, to be held under the direction of Miss Harris, community health nurse, promises to be one of the most attractive features of the fair. Through this conference every child below school age in the entire Dunn District will be given an opportunity to be examined for whatever defects he or she might have.

Mr. Goldstein, who last week stated that a tournament would be held during fair week, is more than satisfied with the program made on this feature. The surrounding country has expressed a desire to enter the lists. The winner of this tournament is to choose and crown the queen of the fair, who with her court will open the fair each morning and have access to all shows on the midway.

Dick Taylor, chief marshal is working hard to line up at least fifty marshals to assist him during fair week. Each marshal must have a horse. Mr. Taylor desires that all who care to become marshals communicate with him at once.

COTTON CONSUMPTION SHOWS AN INCREASE

Census Bureau's Figures For August Issued; Statistics For The South

Washington, Sept. 15.—Cotton consumed during August amounted to 527,404 bales of lint and 60,825 bales of linters, compared with 466,548 of lint and 55,424 of linters in July this year and 467,059 of lint and 52,108 of linters in August last year, the census bureau announced here.

Cotton on hand August 31 was as follows:

Held in consuming establishments, 1,025,994 bales of lint and 116,891 of linters, compared with 1,215,108 of lint and 134,507 of linters on July 31 this year and 1,005,064 of lint and 100,623 of linters on August 31 last year.

Held in public storage and at compresses 1,314,549 bales of lint and 30,534 of linters, compared with 1,488,085 of lint and 54,587 of linters on July 31, this year, compared with 1,185,964 of lint August 31 last year.

Exports totalled 273,308 bales, including 4,490 males of linters compared with 373,732 including 9,100 of linters this year, and 347,887 including 7,883 of linters in August last year.

Spindles active during July this year numbered 32,496,824 compared with 31,975,269 in July this year and 32,930,755 in August last year.

Statistics for cotton growing states follow:

Cotton consumed during August 336,628 bales compared with 304,966 in July this year and 277,608 in August last year.

Cotton on hand August 31 was held as follows:

In consuming establishments 408,961 bales compared with 523,368 on July 31, this year and 396,889 on August 31 last year.

In public storage and at compresses 1,277,735 bales, compared with 1,938,877 on July 31, this year and 3,462,377 on August 31, last year.

A shave and a hair-cut make a fine disguise for some fellows.

INTEREST IN ELECTION CENTERS ON VOLSTEAD

St. Paul, Minn., Sept. 18.—Congressman Andrew J. Volstead, father of the prohibition enforcement act, will be opposed for reelection in the November election by the man who defeated him in the primary two years ago.

This contest in the seventh Minnesota congressional district rivals in interest the three-cornered fight for the United States senatorship, in which a woman—Mrs. Anna Dickle Ottesen—has been setting the campaign place for her two male opponents.

Prohibition is not an issue in the contest involving Volstead, for he will be opposed by the Rev. O. J. Kvale, of Benson, who declares himself "as dry as Volstead with a little to spare." Mr. Volstead has the endorsement of the Republican district convention, while both the Democratic and the farmer-labor conventions endorsed the candidacy of Rev. Kvale. In 1920, as the candidate of the non-partisan league seeking the Republican nomination, Rev. Kvale neared out Mr. Volstead in the June primary by 17,369 votes to 15,059. Then charges of violation of the state corrupt practices act against Rev. Kvale was sustained, the nomination was declared vacant, and the Republican district committee selected Mr. Volstead as the Republican candidate.

With the approach of the fall election that year, the Kvale faction circulated petitions that enabled him to file as an independent and in a three-cornered race—a Democratic candidate having entered—Volstead polled 36,822 votes; Kvale 35,970, and the Democratic candidate, 5,268.

This year, with Kvale bearing the Democratic endorsement, it will be a finish fight between Kvale and Volstead and the question lies in which strength the old Non-partisan—now farmer-labor—organization has been able to retain.

At least you've got to get into the automobile; it probably has a high hill but out of business.

Some men wouldn't trade the privilege of taking off their shoes after supper for a membership in the best club in town.

KOHLLOSS DIVIDES MEN OVER STATE

Six Counties To Be Assigned To Each Set of Three Prohibition Agents

Radical changes in the distribution of his force of 54 field deputies so as to cover all parts of the State alike was announced Thursday by R. A. Kohloss, federal prohibition director. Heretofore nearly the entire force has been concentrated in the Western half of the State, one man being placed in a number of counties while raiding parties containing as many as ten agents have been sent from place to place in order to cover territory where there are no agents.

Both of these conditions will be eliminated under the new scheme, which will be put into effect immediately. The general scheme is that the deputies shall be divided into forces of three and each force be assigned a territory of six counties. Commenting upon the charges that an automobile containing a woman had been shot by one of his deputies, Director Kohloss asserted that of 24 automobiles seized by his forces during the month of August 23 contained women.

The report for the month shows that federal officers seized and destroyed during the month 149 illicit stills, 71,510 gallons of malt liquors and a large amount of other liquors, the total value of the destroyed property being \$8,6452. Other vehicles in addition to the 24 automobiles ran the value of the property seized and not destroyed up to \$2,823, the automobiles being valued at \$6,453.

During the month of August, federal agents made 107 arrests and recommended 211 arrests, the average arrests being slightly more than two per officer.

SLOW AS B. FORD

Eugene Field was always a cheerful debtor, and E. H. Kohans tells the latest story of his cheeriness in this regard.

William E. Curtis, of whom Field borrowed 150 some years before, came to Chicago from Washington. He called on the poet and reminded him of his debt. Next day Field printed this paragraph in his column:

"William E. Curtis, the well-known correspondent of the Chicago Record, is in the city for a few days looking after some of his permanent investments."

NARROW RANGE IN PRICES OF COTTON

War Cloud in The Near East Depressing Factor; Crop Estimates Go Lower

New Orleans, Sept. 17.—The range of prices in the cotton market this week was rather narrow, the trading positions moving over 77 to 97 points from the highest to the lowest. During a good part of time there was a fairly even balance of influences which prevented wide price movements.

The main depressing factor was the war cloud in the Near East, while the main supporting factor was the increasing depression to contend that the present crop will hardly amount to more than 10,000,000 bales. Highest prices were reached at the middle of the week when the trading months were 59 to 36 points over the close of the preceding week; lowest prices were reached on the closing session when they were 46 to 65 points under.

The close was at net losses of 46 to 59 points. October traded as high as 21.58, fell off to 20.61 and closed at 20.67. In the spot departments prices lost 38 points on middling, which closed at 21.00 cents against 18.50 on the close of this week last year.

Fear of the spreading of fighting in the Near East was mainly responsible for the ease in the end of the week, but, at the same time, sellers were held within the bounds by the weather disturbances in the west Gulf of Mexico and the apparent threat that it might extend up into Texas over Sunday by too much rain in the Southern half of the belt and by the appearance of a hurricane in the West Indies. Crop accounts of the week were nearly altogether unsatisfactory as they indicated further forced maturity of the plant, premature opening of bolls and a rapid winding up of picking in many sections of the belt, which was accepted as confirming the close.

Spot markets of the South did a steady volume of business of fairly large proportions. In the early sessions, it was claimed that the basis was easier, but later and especially toward the close it was claimed in many sections that the basis was hardening again and that owners of spots were not so ready sellers as formerly. Picking and ginning were reported to be making rapid progress in all sections of the belt with a vast amount of cotton open in the fields.

This coming week foreign political news again may be a very prominent influence, but weather conditions will have to be watched closely because of unsettled conditions. Rains or windstorms probably would have a marked bullish effect on the trade. Hurricane movements will be of absorbing interest. Reports from the interior regarding the progress of the crop will be of increased importance because this coming week will practically end the September and final condition period of the season.

Michigan Republicans overwhelmingly repudiated Newberryism when they went to the polls and cast a vote of 2 to 1 against Senator Townsend the defender of an apologist for Newberry. The anti-Newberry vote, however, was divided between the three opponents of Senator Townsend who in this way secured a renomination by a plurality under 25,000. Senator Townsend received in fact only 27 per cent of the vote.

Chairman Cordell Hall of the Democratic National Committee pointed out in a signed statement that this break is an assurance that the great majority of Michigan Republicans will join with all good citizens at the polls next November to make permanently effective their verdict in the Michigan primaries.

In Massachusetts Senator Lodge, after thirty years of service in the Senate, ran behind the Republican candidate for Governor, and although renominated by a large majority over his opponent, about 70,000 Massachusetts Republicans voted for his opponent as a protest against continuing Lodge in public life. At this rate Massachusetts Democrats are encouraged to believe they can accomplish his defeat in November.

COTTON RECEIPTS SATURDAY BREAK LOCAL RECORDS

806 Bales Sold On Open Market And Record Co-operatives

MORE THAN 300 BALES OF THIS YEAR CROP SOLD

Tom Royal And Fore Have Hard Time Selling Large Quantity Broke In Town—Co-ops Reached 200 Bales In One Day At Warehouse.

Cotton is king, the price being boll weevils, and floods are forcing the price down. A monarch who once again broke the record.

Last Saturday the record of the fleecy staple broke the largest crowd of shoppers in Dunn on a single day in over two years. Trading between two merchants had all been done through crowd.

Bank deposits in the morning. Sling stations had been closed both afternoon and night.

Until late in the afternoon Tom Royal and his hand-picked negro truckmen had all been unable to handle the great quantity of cotton.

Carried to the warehouse and forty trucks loaded by the time the sun set and 5 in the afternoon.

Heat and hard work caused the men to fall out.

In addition to the 806 bales of cotton sold on the open market, the co-operatives handled 200 bales of cotton.

716 bales were sold on the open market and at the oil mill.

So far the open market has sold over 3,000 bales of this year's crop—a greater number than has ever been sold so early in the season as this. Many of the farming selling here last week have never sold here before. All were satisfied with the prices given and with the treatment accorded them.

Tom Royal believes that the open market will handle more than 20,000 bales of this year's crop.

MRS. N. A. TOWNSEND NAMED VICE-CHAIRMAN

She Will Have Direction Over Democratic Women's Activities In Harnett County

Mrs. N. A. Townsend yesterday was appointed vice-chairman of the Harnett County Democratic Executive Committee by E. L. Godwin, chairman of the committee.

Mrs. Townsend will work directly under the State vice-chairman, Miss Mary Henderson, of Salisbury, who has charge of the political activities of Democratic women in North Carolina. One of her first undertakings will be to get a large crowd of women voters to Lillington to hear Governor Cameron Morrison's speech on Thursday, October 5, which will mark the opening of the Democratic campaign in Harnett county and central Carolina.

Mrs. Townsend's duties will be identical with those of Chairman Godwin except that her efforts will be confined solely to the direction of the woman's department of the executive committee.

HIGH SCHOOL HEADS TO CONFER IN RALEIGH

A two-day session of High School principals from eighteen counties will be held in Raleigh Friday and Saturday September 29-30.

Principals will attend from Wake, Durham, Person, Granville, Harnett, Johnston, Vance, Franklin, Warren, Wilson, Nash, Wayne, Lee, Anson, Cumberland, Orange, Chatham and Richmond.

In addition to routine matters which will be brought to the attention of the principals by members of the staff of the State Department of Education there will be a discussion of such topics as "The Teaching of Vocational Subjects in High Schools," "Teacher Training," "The Financial Side of The High School Work," "The Problem of High School Athletics," "Should the School Day be Lengthened," "To What Extent Should Supervised Study be Introduced?" "The Junior High School," "What They Are and What They Should Be."

BUSINESS SHOWS BETTER RECOVERY

Soft Coal Output Increasing and Anthracite Coal Mining Being Resumed

New York, Sept. 17.—By the Associated Press.—Reports received in financial and business quarters during the past week indicate that the heavy industries are making a rather better recovery from the effects of the strikes than had been anticipated. Soft coal output is running close to 10,000,000 tons a week and supplies of this commodity are such that the steel industry, which falls in the lowest class of priority, is now receiving sufficient fuel to run at sixty per cent of capacity instead of the 50 per cent of two weeks ago. More blast furnaces are being blown in and the trade expects all of August's losses in this respect to be made good promptly.

Leading Factor.—The limiting factor in steel work operation is now in fact not a shortage of fuel but scarcity of the kind of freight cars needed to carry the industry's products.

With soft coal mining in a boom and with anthracite mining in the process of resumption, the roads are carrying the largest amount of freight in nearly two years. Car loadings for the week ended September 2 totaled 920,000, an increase of 41,000 tons over the previous week. Part of the gain is due to the accelerated movement of soft coal; nevertheless, the volume of general merchandise, which also has continued to gain, has present traffic has been exceeded only during short periods in the autumn of 1921.

The supply of soft coal is reaching the peak point. With the partial resumption of the shipmen's strike, with grain in pending forests and with other crops and with a general economic condition should be better than it has been for some time.

MAYNARD WON LOCAL FAME IN TREE CLIMB

The late Lieut. Belvin W. Maynard, known as the "Flying Parson" whose tragic death last Thursday grieved friends throughout the nation, climbed the first round on the ladder of local fame, while a barefoot lad, attending Dell school, at Delway, Sampson county, according to a story related by old friends Sunday.

Near the school there was a 70 foot pine tree, and during a recess period, several of the students dared Belvin to climb this tree and place the American flag at the top.

Without a moment's hesitation, young Maynard climbed the tree, placed the flag at the very top, skinned down, skimming his shins to some extent.

Thus began Maynard's climb to local fame, and in 1919 he climbed to national fame when he made his famous trans-continental airplane flight.

"And with all his fame, he was just the same," said one life long friend and companion. He never lost the common touch, another reported, and, with all his renown, he was the same Belvin Maynard to his friends as he was before he stepped into the glare of the calcium.

His first experience with a gasoline engine, as narrated by friends, occurred when a dad. He bought one of those old fashioned motor trucks, equipped with wheels similar to those on buggies.

He and a companion started off in the machine, going briskly down the road for about two miles, when the engine died dander than Hector.

Both boys were dressed in their Sunday duds, but "they got out and got under," and it was not long before their spick and span clothes resembled the overalls of an automobile mechanic.

Maynard asked his companion: "What do you think the machine is worth?" and the other replied: "I don't think it's worth the two suits of clothes we have ruined on it."

But Maynard finally convinced the mechanic and the other boys that the machine was worth the price.

The occasion of his marriage to Miss Emie Goodson, daughter of Mr. and Mrs. John F. Goodson, of Mt. Olive.—Morning Star.

DABNEY WARNED OF WEEVIL PERIL

Former State Chemist Urged Texas To Halt Movement Of Pest

If, twenty-five years ago, the State of Texas had taken the advice of Dr. Charles W. Dabney, Jr., on means of fighting the boll weevil the South might have been spared the fearful cost of the weevil's operations.

Dr. Dabney at the time he wrote the Governor of Texas and urged precautionary measures against the pest was assistant secretary of the United States Department of Agriculture. He was at one time North Carolina State chemist and was one of the members of the Wetmore Club, one of the influential factors in bringing about the establishment of the State College of Agriculture and Mechanical Engineering.

Dr. Dabney's letter, which was addressed to Hon. David B. Calhoun, then Governor was as follows:

"What are the chances that the Legislature will pass a general law on the subject of injurious insects and diseases of plants during this session? During my recent visit to Texas I found that the boll weevil was exciting a great deal of interest, and while in some places the loss of the top crop through midsummer drought had prevented any great spread, still, in the vicinity of Victoria and Searo, there had been an undoubted spread of forty or fifty miles along railroads. Dr. Howard tells me that he sent you March 6th a copy of Bulletin 59 of the State Board of Horticulture of California containing a full account of the present law and regulations of that State. He considers this to be the best law on the subject now in operation and I believe that you could not do better than to base your law upon it. Of course, the California law relates solely to horticultural pests, whereas yours will have to be broad enough to cover the insect and fungus diseases of all crops. The main features, as you, of course, realize, should be: 1st, a provision for the appointment of commissioners in each county upon the application of certain citizens of that county; and 2nd, these commissioners should be empowered to enforce remedial work, in levy penalties, or studied this insect in all of its bearings, that it will be a constant fact upon the property. If there should seem to be any opposition to a general bill of this sort these provisions could be embodied in a bill relating specifically to the cotton boll weevil. It is the opinion of the experts in the Department, who have carefully studied this insect in all of its bearings, that it will be a constant fact upon the property, the cost to be assessed upon the cotton crop of the State at

CITY BOARD ACTS FAVORABLY FOR MUNICIPAL HOTEL

Attorneys Are Directed To Prepare Bill For Introduction In State Legislature

TOWNSEND PARK SITE ALSO TO BE ACCEPTED

Two Chamber of Commerce Projects Given Kindly Treatment By Board of Commissioners—Town To Spend Several Thousand Dollars Improving Park.

A municipally owned hotel to cost approximately \$100,000 was practically made certain last night when the board of town commissioners directed Clifford and Townsend town attorneys, to draft a bill to be presented to the next session of the State Legislature whose passage will permit the voters of Dunn to express their will in the matter of leasing lands for the project.

The board also received favorably N. A. Townsend's offer to donate a park site of six acres contiguous upon the town's promise to create upon it a creditable park. Mr. Townsend was asked to furnish the board with specific information as to what he would require and was told that the board would be glad to comply with any reasonable requirement. It is estimated that improvements required by Mr. Townsend will cost not more than \$2,000.

The chamber of commerce agreed in both of these matters. The hotel project is wholly a chamber of commerce project. Led by A. L. Newberry a committee has been working for months to have a hotel constructed here. Mr. Newberry has been the most energetic of the group and has been active in the project.
