HOW HE WILL FIGHT THE BOLL WEEVIL

(Lumberton Robesonian.) Mr. L. H. Townsend, of St. Paul, has a method all his own of getting ahead of the boll weevil. He has 250 acres planted in cotton and says he is going to plant corn in between his cotton rows. He is not going to pay any attention at all to that corn until the fourth of July. If by that time it appears that the pesky boll weevil is going to ruin his cotton, they may take it and be hanged, and he'll make corn; but if it appears that he is going to make enough cotton to fool with, spite'n the weevil, then he will plow up the corn and make cotton. He figures that it will not cost him over ten cents an acre to plant the corn. He is going to take out insurance. It is an experiment the result of which will be interesting to learn.
