

Telephone subscribers now receive more for the money they spend for telephone service than for any comparable service or commodity.

## 2 Million Dollars For North Carolina

**M**ORE than \$2,386,000 will be expended for additions, extensions and replacements to North Carolina's telephone service during the year 1926.

This is one of the largest telephone construction programs ever undertaken in North Carolina during one year. It follows closely our policy of building in advance to keep pace with the growth and progress of the State.

It is estimated that more than 6,800 new telephones will be added to the Bell System in North Carolina this year.

Such enormous additions and expansion makes the service indispensable to every community and more valuable to every individual user.
