

Legislature Observations

—by— ORAL L. YATES

As we enter the eighteenth week of the General Assembly, it is evident that all but a few would-be candidates in the primary next spring are tired and anxious to adjourn sine die, and if this scribe is not badly mistaken, by the time this is in print, we will be on our way home.

Monetary problems, always a taboo for every session of the North Carolina Assembly to solve, are behind the legislature, but remaining to be settled are such complex matters as the biennial school and tax machinery bills, the Page House ap-

proved bill to provide two law enforcement agents in every county and where there are more than ten thousand population, one for each additional ten thousand, or in other words, about three hundred dry agents for the State, to be appointed by the Governor. This has often been called a bill to elect the next Governor of North Carolina.

After an hour's conversation with Lieutenant-Governor A. H. Graham this morning, I think he will in all likelihood make formal announcement by next Sunday of his candidacy for the Democratic nomination for Governor next year, and it is safe to say the Hill-boro lawyer will be regarded by many as being friendly to a State liquor control system, while the opposition will be furnished by the dust-dry Clyde R. Hoey of Shelby.

Among those who will be candidates for Lieutenant-Governor in the June primary next year are Paul D. Grady of Johnston county, Harrison Newman of New Hanover county, W. A. Clark of Edgecombe county, and W. L. Lumpkin of Franklin county.

It was gratifying to learn that

Refreshing Relief

When You Need a Laxative

Because of the refreshing relief it has brought them, thousands of men and women, who could afford much more expensive laxatives, use Black-Draught when needed. It is very economical, purely vegetable, highly effective. Mr. J. Lester Roberson, well known hardware dealer at Martinsville, Va., writes: "I certainly can recommend Black-Draught as a splendid medicine. I have taken it for constipation and the dull feelings that follow, and have found it very satisfactory."

BLACK-DRAUGHT

Louisa's Letter

About Clothes for Your Children. Clothes may not make the man but proper clothes will certainly give him a sense of ease and poise which he would not have if he wore shabby garments.

Any woman knows that her good times are helped considerably by being appropriately and becomingly dressed for the occasion. To be overdressed is more embarrassing than to be in plain clothes when others are in more formal attire. Hence it is a good plan, if one is a new-comer, to find out some of the customs of the place to which one has come.

The most charming woman will be at a disadvantage if she wears an out-of-model gown in the company of a dozen smartly dressed women. She has a great handicap to overcome before she can exert her charm.

Proper clothes are even more important to children. Not the latest fashions but good substantial, nice looking clothes. A sensitive child

suffers torment when he realizes that other children are critical of his bad looking shoes and cheap, ill-fitting garments. It is just not possible for him to do his best work or to be happy during his recreation period if he is dragging inwardly over his or her appearance. Of course a mother can help if she keeps even the faded clothes as nicely as possible and particularly if she is careful of the children's grooming. See that they bathe regularly and shampoo their heads often. Be firm with them about brushing their teeth and keep a good nail brush handy so that their finger-nails can be kept clean. Even old shoes look better with a coat of polish and nicely brushed hair does add to one's appearance.

But give your child as nice clothes as you can afford. It will really pay dividends in their development.

Yours, LOUISA.

May 30th Is Made A State Holiday

RALEIGH.—Seventy years after the close of the Civil War, the North Carolina Legislature has passed a bill accepting the national Memorial Day and making May 30 a legal holiday in the state. Confederate Memorial Day, May 30, has been a legal holiday for many years.

Unofficially, May 30 used to be much observed, but recognition of the day has lessened with the dwindling of the ranks of the Confederate veterans. When the soldiers home here was filled, the Confederates annually carried bunches of flowers, mostly picked from the grounds of that institution, to the Federal cemetery every May 30 and listened to speeches lauding the heroism of those they opposed in the sixties.

Setting off May 30 as a holiday, was not the only move toward liberalism made by the present Legislature. Another one was adjournment taken in honor of Abraham Lincoln.

Farm Problems And Answers

Question—How much grain should be fed to a dairy cow in addition to good pasturage?

Answer—This depends on the maximum production of the animal. The average cow will consume only enough grass in a day to maintain her body in good condition and produce two gallons or about seventeen pounds of milk. For those animals producing more than 17 pounds, a grain mixture containing from 13 to 16 percent of digestible protein should be fed at the rate of one pound of grain to each five to seven pounds of milk produced in a day. This will maintain the animal in good flesh and permit of maximum milk production.

Question—When should alfalfa be cut for hay?

Answer—The first cutting should be made when the flowers are from one-tenth to one-fourth in bloom. Where there is danger of leaf hopper damage the first cutting can be delayed until the last week in May. This will reduce the damage later in the season but sometimes results in a poor quality of hay. Later cuttings should be made when the new growth is well started from the crowns. The last cutting should be early enough to allow the alfalfa to make from four to six inches of growth before winter sets in.

Question—What can I do to stop my chickens from picking out their feathers?

Answer—This trouble is most often caused by a tiny parasite called the depluming mite and can be controlled by dipping the birds in a sulphur-soap solution made by mixing two ounces of flowers of sulphur and six ounces of flaked soap to five gallons of tepid water. Hold the wings over the back and submerge the birds feet first until only the head is out of the solution. With the free hand, ruffle the feathers to insure penetration. The head should be ducked two or three times during the operation. Dip the birds early in the day so as to allow them to become thoroughly dry before going to roost.

Question—How much milk should I add to my poultry feed to produce milk-fed broilers?

Answer—Two pounds of either skim milk or buttermilk should be added to each pound of the fattening ration and fed during a fattening period of 7 to 10 days. The milk and ration is mixed so as to make a sloppy feed that will pour readily from a bucket. During the first two days of the fattening period, feed only as much as the birds will consume in 15 minutes twice a day. After the second day

school machinery act carried a provision for a school book rental for the next biennium. This has long been the views and the desires of this scribe.

As the General Assembly is closing its last week of work here in Raleigh, I will bring to a close this column.

Among those from Haywood county in Raleigh this week were W. A. Hyatt, Mr. Coleman from Canton, and Doyle Alley, President of the Young Democratic organization of North Carolina.

give all they can clean up in 20 to 30 minutes two or three times a day. Only enough water to quench the thirst should be given twice a day during the fattening period.

Question—How can I put an oil finish on my furniture?

Answer—All dust should be removed from the furniture before any finish is applied. A thin coat of a mixture of two parts of boiled linseed oil and one part of turpentine is then brushed on the surface. After this coat is thoroughly dry it is rubbed down with fine steel wool. For light finishes use white shellac and for darker finishes use orange shellac. Shellac coats should be repeated until the wood pores are filled. Rub down each coat thoroughly. After the last application of shellac is rubbed down the surface is then waxed and polished.

Fraud Order Closes U. S. Mails To Sale Of Lottery Tickets

WASHINGTON.—In the biggest single blow it has ever directed at the sale of lottery tickets in this country, the Post Office Department has closed the United States mails against 409 persons in Canada, Cuba and the Irish Free State. The effect of the fraud orders issued against these persons, as well as three post office boxes in Ottawa, will

be to have returned to the sender all mail addressed to them. Not any money orders be drawn or paid to any of them. The order was issued as a part of the Department's drive against the sale in this country of lottery tickets on Canadian and Irish Sweetstake.

SOIL . . . FERTILIZER . . . CROPS . . .

Due to the long wet spell the ground is packed and planting will be late. With the best of tilling much of the soil's plant food will be locked up in clods and unvaluable to the growing crop. We can't take the clods out of your soil but we have taken the clods out of our fertilizer.

There is scientific evidence as well as abundant farm tests which prove that when we PULVERIZE and make BASIC our fertilizer the "added values" created, add at least ONE-THIRD to its worth.

The way to get a good crop from late planting is to push it by heavy fertilization. It would be well this spring to use on-half more fertilizer than usual and in many cases more than that. Nothing will pay better. Fertilizer is cheap and farm products are bound to be high when this crop is marketed. Raise A Lot To Sell.

Use BASIC PULVERIZED FERTILIZER—a patented product—U. S. Patent No. 1,918,900. In the Green Bordered Bag only.

Table with 2 columns: Leading Brands of BASIC PULVERIZED FERTILIZER and corresponding fertilizer types: BASIC TEN-O-FOUR, KNOX TRIPLE "A", KNOX POTATO GROWER, KNOX VEGETABLE SPECIAL PULVERIZED 5-7-5, BASIC MAGNESIA PHOSPHATE
