

# COUNTY AGENT W. D. SMITH'S column

her should be working hard at his or her own individual project to make all of the progress possible and any help needed should be asked for. Mr. Crouse and Mr. Smith are very much interested, but it takes a lot of time to visit more than 200 boys and girls individually—not to mention the 3,500 farm homes in the county, as they would like to do.

It will be impossible for the Farm Agents properly to supervise the work of girl club members who select such projects as sewing and cooking. The girls who care for crop or livestock projects, of course may have the same supervision as the boys. If the assistance of a home demonstration agent were available a great many more projects would be possible, as well as contests, club camp, et cetera, which are confined now largely to the boys. From the requests and interest evident to the county agents it is reasonable to suppose that at least 100 girls would be active club members in Haywood county if we had a home agent.

Mr. T. T. Brown, asst. marketing specialist from Raleigh met with the Haywood Wool Board and decided to hold the Wool Pool. The date and price will be given later.

Mr. Brown states that the market looks more favorable later in the season.

## Tomato Plants For Use In Cannery Will Soon Be Ready

T. H. Rogers, field manager of the Haywood County Mutual Canning Association, announced this week that farmers who have signed up for acreage for tomatoes would receive notice soon that half of the plants were ready for planting. He advised getting the land in proper condition. He said: "Broadcast fifty per cent of the fertilizer and work well into the soil. Put the other fifty per cent in the hill. A 5-7-5 fertilizer at the rate of 600 to 800 pounds per acre will give good results."
