Officials Believe Mutual Association Will Be Increased

At a meeting of the representatives of the membership of the co-operative of the Land O' The Sky Mutual Association which was held on Friday, July 12th, at the main office of the association here, the following officers were elected: George A. Brown, Jr., president; W. N. Fain, vice president; and M. C. Honycutt, secretary and treasurer. R. F. Duff, assistant secretary and treasurer and John E. Barr, general manager.

The association has been incorporated under the incorporation laws of North Carolina. At the meeting the following representation was observed: George A. Brown, Jr., and E. B. Rickman, of the Haywood County Mutual Canning Association, W. N. Fain, of Murphy, representing the Mountain Valley Mutual Canning Association, Edgar A. Tuffs, and Mrs. E. G. Pritchett, of Spruce Pine, C. C. Proffitt, of Burnsville, who represented the Carolina Mountain Mutual Association.

The canneries located at Hazelwood, Murphy, Green Mountain, and Cranberry, are now in operation canning green beans, blackberries and huckleberries.

To date the Land O' The Sky Mutual Association has been able to successfully market several hundred hampets of green beans from this section, as well as from Murphy, Green Mountain, Cranberry, N. C., and from Saddy, Tenn. The price that has been received for these beans has been very satisfactory. Sales are daily increasing under the direction of A. G. Roberts, marketing expert of the association.

There are approximately four hundred and eleven growers, who are members of the local association, and with his proper co-operation this number can be increased from year to year, until the association will be an outstanding one in the South, and the brands offered will be known through the Eastern part of the United States, it was said.

In order to build the vegetable industry in the mountain section of North Carolina, much assistance can be given the growers by following the instructions of the field men of the Haywood County Mutual Canning Association as regards the proper stage of maturity when the vegetables should be picked.

The produce trade in the immediate section prefers a bean which is usually called over-matured. However, most of the larger cities, where the biggest portion of the beans of this section will be sold, prefer young tender green beans, and it is that trade that is desired from a commercial standpoint, as most profitable.

At present there are twelve people employed in the handling of vegetables for the fresh marketing at the Hazelwood cannery and as the volume of vegetables increase there will be work provided for more.
