

Go to Church Sunday

"Grace Church in the Mountains" EPISCOPAL
 Rev. Albert New, Rector.
 Sunday, July 28th.
 8 A. M. Holy Communion.
 10 A. M. Instruction for those to be confirmed by Bishop Gribbin on August 18th.
 11 A. M. Sermon by the Rector.
 8 P. M. Miss Mary Barber will speak on "The Holy Land." A musical program will be given. Special offering for the insurance of church and rectory.
 Everybody cordially invited to all our services.

WAYNESVILLE METHODIST

Paul Hardin, Jr., Pastor.
 Services Sunday at the usual hours: Sunday school at 9:45 a. m., and morning and evening worship at 11 a. m. and 8 p. m.
 Mr. Walter Herbert, of Atlanta, Ga., will sing for us Sunday evening. Mr. Herbert, who is often heard over WSB, has sung for us before and we welcome another chance to hear him. He will sing two selections Sunday evening.
 Let us bear in mind the fact that Gipsy Smith, Jr., will be heard in the first of a series of evangelistic services next Wednesday night, July 31st.

Mr. Smith is being brought to Waynesville as much for our friends as for ourselves—summed visitors and friends throughout the community are cordially invited to hear him. The services will begin each evening at 8 o'clock.

ST. JOHN'S CATHOLIC CHURCH

Rev. Howard V. Lane, Pastor.
 Seventh Sunday after Pentecost.
 Morning Mass at 11 A. M. Benedic-

tion of the Blessed Sacrament after the Mass. Sermon, "Daily Prayer." Morning Mass at Franklin at 8 A. M.
 Daily Mass during the week at 7:30. All are welcome to these services.

WAYNESVILLE PRESBYTERIAN CHURCH

Dr. Robert Peter Walker, Minister.
 It is reported of one Waynesville church that all the members attend church at this season, and give a warm welcome to the summer visitors. Well, let us follow the example of our neighbors and every member come Sunday and give the glad hand of greeting to the visiting friends.

The church school begins 9:45 and we have classes for all ages—L. M. we have classes for all ages—L. M.

At the 11 o'clock service, the pastor will speak on "Spiritual Conditioning." Rev. 1:10: "I was in the Spirit on the Lord's Day."

The Christian Endeavor meets at 7 p. m.

The pastor, together with Revs. Geo. Hammond and R. D. Bedinger, will go to Andrews Sunday 8 p. m. to install Rev. R. H. Long as pastor of the Andrews Presbyterian church.

THE WAYNESVILLE BAPTIST CHURCH

H. W. Baucum, Pastor.
 Services for Sunday, July 8 will be as follows:

9:45 Sunday school convenes.
 11:00 Morning worship.
 7:00 B. T. U. Union for all.
 8:00 Evening worship.

The pastor will speak at eleven and eight o'clock.
 Visitors are invited and are welcome to all our services.

Air Stewardess Is Newest Profession

NEW YORK.—She may have adjusted a pillow under your travel-weary head.
 She may have sat opposite you, a fourth hand at bridge.

She may have pointed out the winding ribbon of the Monongahela river, talked about the weather, politics or the theatre—whatever your choice.

You already may have met a member of what has been termed woman's newest profession, an air stewardess.

There are about 200 of them in the United States, plying the sky routes on the large airliners, picked for their youth, charm, airworthy pettiness, and a general savoir faire including ability as trained nurses or conversationalists.

None in the employ of one large line may be more than 25 years old, weigh more than 125 pounds or be married.

Miss Mary Kelly, 22, five-foot-two, eyes of blue, and with blonde curls that peep from under the edge of her uniform hat, finds being an air stewardess "a lot more fun than just nursing." She is a stewardess on the New York-Chicago division of one large line.

Silage Is Valuable To Dairymen, Said

"We have come to recognize silage as one of the best and most economical home-grown roughages for dairy cattle," declares John A. Arey, dairy extension specialist at State College. "Silage is succulent and palatable. It is a good substitute for grass in winter and a valuable supplement to pasture in summer. An acre of corn that will yield ten tons of silage when fed to dairy cows in the form of silage will produce about 400 pounds more milk than if the corn were fed in the dry state. Then, too, the loss of feed sustained during harvesting and feeding operations is almost eliminated when the corn is converted into silage."

Mr. Arey urges dairymen to repair their old silos or build new ones during the latter part of July and through August while the rush of summer work is over and fall work has not yet begun. This will avoid serious delay when the silage crop is ready to cut.

The dairy extension office at State College has plans and bills of material showing how to build the vertical silo and Extension Circular 201 may be secured telling how to dig a trench silo. The trench silo is inexpensive. Studies made last year on 372 new trench silos dug in the state show that the labor cost per ton of capacity was about 50 cents. In some instances, the labor cost was not reported as the farmers said the silo was dug during odd times.

The equipment used in filling the trench silo also costs less than that used in filling the vertical type. However, the vertical type, is probably better adapted to the needs of dairymen with large herds of cattle. The trench silo will be suitable for the man with a few cows and who has had no experience in feeding silage.

Farm Problems And Answers

Question: Are there any forage or hay crops that I can plant in July?

Answer: Yes. The two best ones for this state are cowpeas and soybeans. Plant them at the rate of one to one and one-half bushels of seed per acre. Sudan grass might be planted, seeding at the rate of 20 pounds to the acre; millet, 25 pounds; and sorghum at the rate of 40 to 50 pounds of seed per acre. The continued dry weather during June has caused late planted hay crops to be more important than usual this year.

Question: Should I cull my pullets at this season now that the birds have fallen off in laying?

Answer: It is good business to dispose of your non-profitable birds rather than keep them and add to your feeding cost. At this time of the year, the flock owner should have decided upon the number of birds to be carried over for next year, bearing in mind that the late moulters are the profitable producers. Birds in a moult, or out of egg production at the present time have not, in general, had a long laying season and should be the first to go. Culling is one of the basic fundamentals of poultry profits.

Questions —and— Answers

1. Who was convicted as slayer of the Lindbergh baby?
 2. Who was recently ousted as assistant Secretary of Commerce?
 3. Where is the Liberty Bell on exhibition?
 4. Where was the recent Republican "Grass Roots" convention held?
 5. Who has charge of Chase & Sanborn Amateur hour on Sunday evenings?
 6. How does the moon get its light?
 7. What does Y. M. C. A. mean?
 8. What is the proper name for the wisdom tooth?
 9. What great Bible character was willing to sacrifice his son?
 10. What invention makes high buildings practical and possible?
1. Bruno Richard Hauptmann.
 2. Ewing Y. Mitchell.
 3. Independence Hall, Philadelphia.
 4. Springfield, Illinois.
 5. Major Bowes.
 6. It is reflected from the sun.
 7. Young Men's Christian Association.
 8. Third Molar.
 9. Abraham.
 10. Elevators.

Vulcanizing Rubber
 Soft rubber usually is vulcanized with 5 per cent or less of sulphur, whereas in hard rubber as much as 50 per cent sulphur may be used.

Federal Men Say That "Pure Mountain Cawn" Is Now Almost Thing Of The Past

Chemists of the federal alcoholic tax unit say moonshiners are not making any more "pure mountain cawn" back in the caves of the Southern Appalachians.

They've reported still in business at the same old stand, but the chemists say they've abandoned the painstaking distilling methods of their forefathers for hap-hazard practices that result in quick "trums" and terrible liquor.

The old-time moonshiners, say the chemists, really did make "pure mountain cawn," using sparkling spring water and clean corn mash carefully distilled. The quality of a man's liquor in many communities determined his reputation among his neighbors.

But look what sort of stuff the younger set is turning out! The chemists call it "sugarhead." It's described as a general mixture of water from the most convenient brook, sugar, molasses, just enough grain mash to assure fermentation, and whatever insects or mice chance to fall into the open vats.

"Oh, yes, we find such 'writers' in most of the mash specimens brought to us by the field agents," said a chemist displaying a wary face. "Frequently we find snakes. And once our agents found a dead hog that had fallen into a vat and drowned."

Sugar and molasses and corn-mel cost money. And so the moonshiners can't be bothered with throwing out mash just because insects, reptiles or a hog happens to fall in.

The chemist explained the source of terrible headache familiar to the imbibers of a stuff that passes for "pure mountain cawn."

The first run of the mash through the still, he said, produces a liquor strong in acetaldehyde content, and the last run results in a high percentage of fused oil. Both tend to congest the blood and exert depressing effects on the heart action.

Expert distillers in government-licensed plants know that and so they discard the first and last runs. But the moonshiners, knowing little about

chemical principles lump the poisonous liquor in with the rest, leaving the customers to wonder why the terrific "hangovers."

Aside from that, much of the moonshine is found to contain metallic poison. Many of the still operators do not go to the expense and trouble of obtaining copper stills. Rather, they convert galvanized drums into stills.

"Fortunately, the metallic poison in liquor from such stills seldom is of such quantity as to prove fatal," said the chemist. "But it makes the drinkers awfully sick."

A SAMARITAN

Chicago.—Ronald Albreach, 34, was a good samaritan. His reward, death.

When Otto Thompson discovered he had a flat tire and no jack among his tools, he hailed Albreach's truck. Albreach not only offered to lend him a jack, but got out and began to aid Thompson. While he was working an automobile came along and struck him. Albreach died of his injuries.

CONSTRUCTION OF GAS CHAMBER BEGINS SO

Balough—The construction of a gas chamber at the State Penitentiary is expected to start within two months with completion in three months.

Waynick said the chamber will be used for the execution of the lethal gas method. The equipment will be kept in shape and will be used for execution of the gas method.

The new method of execution will be used for the execution of the gas method. The equipment will be kept in shape and will be used for execution of the gas method.

Steel will be used for the double glass chamber to be installed around the tilting pipe with a view to escape from the chamber in case of an execution.

The new method of execution will be used for the execution of the gas method. The equipment will be kept in shape and will be used for execution of the gas method.
