spoons each of salt and sugar. Pack in jars and process 3 hours if corn is included, if not 90 minptes will be sufficient.

Corn-Put in muslin bag and blanth five minutes-counting time after water begins to boll, keeping bag well under water. Cut off cob. fill jars loosely-then pour boiling water get the needs of winter isn't to within one inch of the top of jar -which space should then be filled with tomato juice, which preserves the corn, but does not discolor. Add one teaspoon of salt to eacr quart Process three hours-If possible can corn immediately after gathering.

> Tomato Juice-Quarter or half tomatoes according to size-do not peel-put in vessel and let simmer on back of stove-advisable to use asbestos mat under kettle-When the pulp is thoroughly done run through small mesh seive or juicer-To each quart of juice add one teaspoon each of salt and sugar. Process fifteen minutes.

Tomatoes-Blanch and skin-pack tightly in jars-being careful when water is added that no bubbles are left-add one teaspoon of self quart of hot water poured over packed jar-Process 23 minutes.

And if at the end of one of your canning days-you feel all tired and achey-and you find yourself getting cross-just take yourself a hot bath to which a couple of table-poons of salt has been added-tell your husband it's his time to put the children to bed-You need some rest-While canning may not be as strenuous as it was in our grandmothers time-it's still no pienie.
