Warns Parents

DR. C. N. SISK

Warning Issued Parents To Guard **Against Diphtheria**

Dr. C. N. Sisk Points Out That Dreaded Disease Of Children Is Now Prevalent

By Dr. C. N. Sisk, District Health Officer,

"A mother can have no more heartrending experience than seeing her baby slowly choke to death with diphtheria. This is the season of the year when diphtheria is most prevalent. Our knowledge of diphtheria s most satisfactory in that we know the cause of the disease and it's mode of transmission; we are able to check it's spread, and possess specific pre-ventatives, a precise measure of susceptibility, and a curative agent of great potency. All the agencies for the prevention of diphtheria are of no avail unless parents become interested enough to take advantage of was played on Manhiem Field, at Sulphur Springs, which commendes them at the proper time.

"Diphtheria spreads from person to person through the discharge from the nose and throat. It may be trans-mitted directly by kissing or exposure to droplet infection in coughing and sneezing. It may be conveyed indirectly by toys, pencils, food, fingers, spoons, cups, handkerchiefs, etc., that have been mouthed first by the infected child. Milk may become infected and transmit the disease.
"Most adults have acquired immu-
