

# Uncle Abe AS HE SEES THE HUMAN SIDE O' LIFE

**"THE BEWTFUL" ON SAT. NITE**  
I stood on Main at nite fall,  
As I watched the crowds go by;  
Twas an October nite, an' the street  
was bite—  
"The Bewtful on p'rade," sez I.

See the kyars an' k-yars in the line—  
up—  
Five hundred I think, mout nigh;  
An' fokes steppin' along with a laff an'  
a song—  
"The Bewtful," thawt I.

Here's Handwood fokes by the  
duzen—  
Now Saunook an' Allen's pass by;  
An' from Rateriff too we see quite a  
few—  
But in all thar's narry a sigh!

Then Iron Duff, Fines Creek, ol' Crab-  
tree . . .  
In town jis' to see—an' to buy;  
Jonathan, Ivy Hill, Joonalusky—  
others still,  
Seemin' with each other to vie.

Who sez, "Nothin' doin' in Waynes-  
ville."  
Is rather a failure er a lie;  
Tuz last Sat. nite I saw this purty  
site,  
A yow-yal thing here—that's why.

Yes, sir-ee! Unkle Abe coodn't git  
waited on at one stand an' had t' go

to an-oth-er. Then I saw Bob Clark,  
The "Cirkylator," goin' in an' out at  
the barber shops tryin' to git a  
shave . . . sed he gest he'd haff to go  
to Hazelwood. "They Say" sed  
that fokes sot in each other's laps  
at the picktur show, doubled up see?  
I haint seed Jim Massie to ax if this  
is so; but I don't think it is . . . caze  
I no John Fisher woodn't let 'em act  
vulgar like that.

**"LORD A MERCY!"**  
Hit's bein' whispered aroun' town  
among the fare seeks that hoop  
skurts an' braces air comin' back in  
stile, or hoop skurts an' bussels, ma-by  
'tia. They've alveddy bin seed in  
Asheville, also on Skott's Cr, in Jack-  
son Co. So, Mr. Editor, hit jist looks  
like we're doomed here in The Bewt-  
ful an' Haywood. I kno Waynes-  
ville will welkum hoop skurts & braces  
—or bussels, caze Waynesville wim-  
men like to be up to date. They'll  
ware nee-hi, strate-jackets, bare  
skins, ostrick fethers, or fig leevess . . .  
ennything to be in fashun.

I had thawt that I'd like t' see  
hoop skurts & bussels kum back—jist  
to see how it wood feel to live back  
'bout 75 an' a hundred yeers ago; but  
aiter the things got so close on me  
(that is, if reports air troo) I changed  
my mind. I think now I'd mutch  
prefer to look at 'em in an ol' pick-

## "Upside-down" Girl Grows Up

Alyce Jane McHenry

Three years ago Alyce Jane McHenry received considerable news-

the stomach from her chest cavity to its correct position. Today,  
Miss McHenry, perfectly normal, has blossomed into a charming  
young lady and now seeks a dramatic career either on the stage or  
in the movies. She is shown in New York.

### THE PHYSICIAN'S

# MICROSCOPE

— and What it Helps  
to Cure  
and Prevent

Many diseases are due directly to germs, which can  
be studied and identified under the microscope.

For instance, diphtheria germs can only be identi-  
fied under the microscope. Then the patient is  
given Antitoxin, and life thereby quickly saved.

Tumors removed and studied under the micro-  
scope can be identified as harmless tissue or pos-  
itively ascertained to contain cancer cells. When  
discovered in time, it is often possible to prevent  
further spread of this dread disease.

Tests of blood and bodily secretions, under the  
microscope, tells the trained physician without a  
doubt, of the presence of typhoid, malaria, tubercu-  
losis, syphilis and many other germ diseases.

Only a few illustrations wherein humanity is indebted  
to the department of scientific medicine known as  
pathology and microscopy. Medical research and  
practice would be greatly handicapped without them

**OBEYING ORDERS**  
During Fleet exercises, a small  
floating object passed one of the bat-  
tleships, and the officer of the watch  
asked the lookout what it was.  
"Only a piece of wood, sir," came  
the reply.  
"What!" roared the officer. "Only  
a piece of wood! How do you know  
there isn't a submarine under it?  
Don't you know your duty yet?  
You're there to report everything  
you see, not to think!"  
A short time passed and then the  
look-out hailed the officer.  
"Nine seagulls passing overhead in  
formation," he shouted.—Answers.
