School On Burley Grading Will Be Held In Haywood

Three Specialists Will Be In County November 12 and 14th To Conduct School

Better grading methods, a recognized need of tobacco growers, will be taught in Haywood County on Saturday and Monday, November 12 and 14 by the Extension Service of State College, in cooperation with the North Carolina Department of Agriculture and the United States Department of Agriculture.

L. T. Weeks, assistant tobacco specialist of the Extension Service; W. P. Hedrick, of the N. C. Department of Agriculture, and John E. O'Hara, of the U. S. D. A., will conduct the schools. County farm agents of the Extension Service will arrange the time and place for the schools.

On November 15 the school will be held in Jackson and Swain.

Apple Trees

Our stock of first class apple trees are now ready for the market. All varieties, early and late: Red and Yellow Delicious, Staymen, Rome Beauty, York Imperial, Limbertwigs, June, Early Harvest, and others. Five trees for a dollar. Sixteen dollars by the hundred. Or why not come to the nursery for your choice of trees, and bargain prices.

We have been in business more than forty years.

FOR EVERY ANIMAL ON THE FARM

Sugared Schumacher Feed is a great utility feed. Every ration used on the farm can be built on it whether for the milking herd, dry stock, breeding stock, beef cattle, horses, sheep, swine and for growing young stock—since all these require generous quantities of carbohydrates.

Quaker Sugared SCHUMACHER FEED

is a blend of corn, oats, wheat and barley products, plus minerals and molasses. It supplies the nutrients every farm animal requires for good growth and condition and can be had in meal or cube form.

COUNTY AGENTS' COLUMN

NOTICE TO TOBACCO GROWERS

All tobacco growers in Haywood county who have not already reported their tobacco sales for the crop years 1936 and 1937 are urged to report these sales on or before Saturday, November 5. These reports should be made at the county agent's office or at meetings scheduled to be held in the townships the last of this week.

These reports are necessary so that marketing cards may be made out for tobacco growers who have tobacco for the year 1938. If these reports are filed on or before the above date,

there may be a delay in getting the cards to the growers in time for their use when the market opens.

Persons who are unable to file these reports in person are requested to have someone make this report for them.

Warehouse bills for the crop years 1936 and 1937 should be presented. Where bills are not available, farm record books may be used. When neither is available, the producer should make an estimate of the pounds sold in each of the two years.

Growers are urged to attend to this matter without delay.

Timely Suggestion On Killing Hogs

How long must a hog be kept from feed before killing?

Do not give the animal any feed at all for 24 hours before killing, but they should have plenty of water at all times. It is easier to get a good bleed when the system is not gorged with food and the meat always cures better when the small blood vessels are free from food particles and blood. The animals should not be excited or over-heated before killing as this produces a feverish killing and causes the meat to sour while in cure.

More Second Crop June Apples Found In Clyde Rt. 1 Area

Second crop June apples seem to be growing throughout the section, especially on Clyde Route One.

This week, W. L. Bradshaw of that section, brought in a box of almost ripe second growth June apples. Most of them are just a little smaller than the average grown in the summer. There are several bunches with 4 apples each.

Mr. Bradshaw reported that two trees bore second crops. These trees were planted by him 15 years ago.

"It is the second time in 40 years that I recall seeing second-crop apples," he said. "Forty years ago, I remember seeing two small ones on my father's tree."

Mr. Bradshaw had no explanation to make, other than perhaps a wet summer, and a late dry fall brought about the unusual freak of nature.

The apples are on display at The Mountaineer.

ONE PER CENT

Out of nearly 5,000 tobacco allotments made in Columbus county only 190 growers have felt that they had cause for appeal. This is less than one-half of one per cent. Of the appeals heard 67 were reviewed and changes made in 13 cases.

NOTICE OF BOND ELECTION

A special election will be held in the Town of Waynesville at the usual polling places on the 17th day of November, 1938, at which time there shall be submitted to the voters of the Town of Waynesville for their approval, an ordinance authorizing the issuance of Twenty-five Thousand Dollars in bonds for the purchasing of property and the erection of a municipal building, and levying of a tax for the payment of the principal and interest.

Done by order of the Board of Aldermen of the Town of Waynesville, this the 25th day of October, 1938.
HERDWIG A. LOVE,
Clerk.

No. 515—Oct. 27-Nov. 3.

ZEBULON WEAVER

The friends of Congressman Weaver wish to bring to your attention his record. He has served his district with dignity and efficiency, and has contributed to the economic and industrial welfare of all the people, regardless of class or group.

HUGE BUSINESS

Agricultural co-operative marketing and purchasing associations are doing a gross business of \$2,750,000-000 annually, according to Dr. G. W. Forster, of State College. Membership and business of the purchasing co-operatives have more than doubled in the past 10 years.

STERILITY CURE

The synthesis of alpha tocopherol, a substance equivalent to Vitamin E, that has been successful in curing sterility in rats and which is declared to have tremendous practical importance in curing sterility in farm animals or even humans, has been accomplished by a group of University of Minnesota chemists.

BIG DIFFERENCE

The area north of Washington and east of Pittsburg eats nearly two-thirds of all the lamb consumed in the United States, yet this area purchasing only 5 per cent of the nation's lamb crop, says L. I. Case, extension sheep specialist at State College.

LITTLE CHANGE

Prices of apples and pears are generally higher than a month ago, but prices of most other fruits have relatively little change, says H. R. Niswonger, State College extension horticulturist.

MORE CATTLE

Because of increased yields of hay due to applications of phosphate and limestone, Mitchell county farmers are adding additional cattle. This has been done without material increase in pasture acreage as pastures formerly over-grazed are now able to carry more animal units.

There has been a drop of 30 per cent in traffic fatalities this year compared with the same period last year.

Home Demonstration News

To preserve nut kernels and keep them from becoming rancid, can them as you would fruits. They can be kept fresh and tasty by being placed in an airtight container in a cool, dry place away from light.

The container will also protect the nuts from insects. The flavor of nuts is largely dependent on the oils they

contain, although in some cases nuts there are also special flavoring substances. In most nut oils readily becomes rancid and a disagreeable flavor found in stale nuts. The vacuum-packed containers in which nuts are sold up commercially help preserve acidity.

Kernels of nuts gathered at home can be packed in jars from which the air is exhausted in a boiling water bath in canning fruits. Select well developed, fresh nut kernels, free from bits of shell. Sterilize half-pint jars and allow them to dry. Fill with the nuts and partially seal. Place in a hot water bath that comes up about two inches on the side of the jars and let them remain in it while the water boils for 30 minutes. Complete the sealing and store in a cool, dark place.
