COUNTY AGENTS' COLUMN

Renew the Old Strawberry Bed.
Immediately after the strawberry harvest is over the old bed should be renewed. Reduce the width of each row to about six inches by plowing up part of the row. This may be done by plowing up one side of the row, or by plowing on each side, leaving a strip of plants 6 inches wide. This strip should be thinned of plants, removing as many old plants as possible, leaving the remaining ones around 18 inches apart. Plow up the middles between the strips and continue cultivation throughout the summer. When new runner plants begin to develop, apply a 5-7-5 fertilizer mixture at the rate of 5 to 7 pounds per 100 feet of row or 1 to 2 pounds of a mixture containing equal parts of nitrate of soda and cotton seed meal.

Fertilizing Tomato Plants.
If you intend to have late tomatoes by setting out plants in June you might try this practice of fertilization. Set plants 4 to 5 feet apart. Before setting plants dig a hole where each plant is to be set, drop in the hole a gallon of rotted stable manure, cover with dirt and set plants. Three weeks later work into the soil around each plant at a distance of 3 inches 2 tablespoonfuls of 16 per cent superphosphate.

Insect Control.
Dust cabbage and snap beans with one per cent rotenone dust in order to kill cabbage worms and bean beetles. Start dusting cabbage when you

first observe the white butterflies in the cabbage patch. Dust thoroughly the under side of the bean leaves for bean beetle.

Rotenone dust will aid in controlling the aphids or plant lice feeding on cabbage, collards, broccoli, and other plants.

Partial control of the squash borer and pickle worm may be secured with 2 per cent rotenone by dusting every 10 days the growing tips of the plants and the small blossom bud clusters.

Scatter over the tomato plants at fruiting stage poisoned bran or corn meal made by mixing thoroughly one tablespoonful of Paris green to one quart of bran or meal.

Disease Control.
Home-made Bordeaux mixture consisting of bluestone, hydrated lime, and water will control some of the leaf spot diseases of your vegetables. A 3-gallon quantity of Bordeaux mixture will consist of 4 ounces of bluestone, 4 ounces of hydrated lime, and 3 gallons of water. Dissolve bluestone in the 3 gallons of water and add the lime. Add a little water to the lime to form a thin paste before mixing it with the bluestone water. Commercially prepared Bordeaux may be used by following the directions on the container.

Silver Anniversary Of Farm Extension Work Is Observed

Interesting Program Presented Before Representatives From 13 Clubs And Visitors

Around one hundred women including club members from thirteen home demonstration clubs in the county, and visitors attended the Haywood Spring Federation meeting, which was held in the court room on Saturday afternoon, in observance of the silver anniversary of the work.

Mrs. W. T. Rainer read a paper on "In Recognition of the Silver Anniversary of Extension Service." Mrs. Rainer went back to the very beginnings of the work, of agricultural demonstration, pointing out that it had its origin in 1896 and 1897 when a commercial company tried to colonize a million acres of land in Louisiana. From this point she traced the work until President Wilson signed the bill in 1914 which placed the work under the supervision of the secretary of agriculture.

Mrs. Rainer then took up the extension movement in North Carolina, stating that it was started in 1909, with the first home demonstration work started in 1911. She then showed in interesting detail what had been accomplished under Dr. Jane S. McKimmon, during the past twenty-five years.

One feature of the program was the demonstration flower arrangement given by Mrs. T. Evans Baxter, member of the French Broad Garden Club, of Asheville, who was introduced by Miss Anne Benson Priest, home demonstration agent, of Bun-

Home Demonstration News

Home demonstration schedule for last half of May.

Thursday, May 18, Maggie club will meet with Mrs. C. D. Keitner at two o'clock.

Friday, May 19, Crabtree, Iron Duff, and Rock Spring clubs will meet at the Crabtree school house at two o'clock.

Wednesday, May 24, Cecil club will meet with Mrs. Jim Reece at two o'clock.

Thursday, May 25, West Canton club will meet with Mrs. Lloyd Harkins at two o'clock.

Friday, May 26, Junaluska club will meet with Mrs. W. H. McCracken at two o'clock.

Tuesday, May 30, Clyde Club will meet with Mrs. C. C. Hanson at two o'clock.

On May 12, the District Federation meeting will be held in Bryson City.

On May 13, 4-H County Council meeting will be held in the home agent's office in the court house at Waynesville at two o'clock.

Home Ec. And Vocational Groups Have Annual Picnic

A large group of the members of the local home economics and vocational agricultural department held their annual picnic last week. This year the group went to Waterville and that section of Haywood County. After lunch, which was spread near the present CCC camp, the boys and girls went through the power house located near Waterville. The two groups were accompanied by Miss Louise Edwards, home economic teacher, Miss Ruth Jackson, of Nova Scotia, and Mr. and Mrs. J. C. Brown.

Federation Directors Making Plans For Picnic

The Haywood directors of the Farmers Federation will meet today at one o'clock at the local warehouse, with the organization's president, James G. K. McClure, Jr., to make plans for the annual summer picnic. The Haywood directors are: Arthur Osborne, J. B. Medford, Henry Francis, Nathan Carver, C. S. Green, R. F. Davis, Glenn Boyd, and Dave Boyd.

combe County.

Mrs. Baxter gave several rules for the arrangements of flowers, giving the artistic ideas of the Japanese, but stating that the buxon bouquets of the Saxons were characteristic of the American people and after all belonged to the English speaking nations.

She brought out the fact that it was not necessary to have expensive containers, to gain effects in the home, but rather a study of the rooms and where flowers were needed, with the idea of a fitting arrangement for the spot in the room.

Following the program in the court room, punch and cookies, with the Allen's Creek and Beaverdam clubs, as hostesses, were served in the office of Miss Mary Margaret Smith, county home demonstration agent.

THAT'S OKAY—BUT I'LL BET YOU CAN'T FIND A LETTER IN MY FILE—

Producing an important letter from some files is a feat that would stump a magician.

However, no magic is needed in offices where Tri-Guard files and the Safeguard system are used. They speed up filing and finding with less work and expense... help eliminate errors and delays. Any employee can do the work with little supervision.

In the Tri-Guard file, each guide slides on three rods, one at the bottom and one on each side of the drawer. Top rods act as "sway-check." Guides are kept upright without compression and index, as well as support contents of drawer.

Ask for free illustrated filing chart and more information about Globe-Wernicke products and our service to users.

house with Mrs. K. Allen and Mrs. R. O. Allen as associate hostesses.

Miss Mary Margaret Smith, county agent, gave a demonstration on "Laundering of Household Fabrics and Clothing."

Announcement was made of the Better Homes Check up, Needle work and canning contests. All members were urged to attend the canning demonstration, which will be held in Asheville on June the 8th.

The club leaders gave reports as

follows: Home Beautification, Mrs. Henry Francis; Clothing, a report of Miss Melver's recent school and demonstration in the county, by Mrs. Hiram McCracken; Crafts, in copper, by Mrs. Harley Allen; Home improvements, by Mrs. Orville Farmer; Poultry, Mrs. Harvey Beach; Gardens, Mrs. K. Allen; Health, Mrs. R. O. Allen. Miss Shirley Muse read an article on "Sleep is Beauty Magic."

Mrs. Hiram McCracken, president of the club, presided. The meeting was opened with assembly singing and the reading of the club collect.

At the close of the meeting a special hour was enjoyed with the hos-

AT SIX WEEKS OF AGE feed

FUL-O-PEP GROWING MASH

Well grown, vigorous pullets will make fine layers next fall. Make certain yours will develop into big framed, rugged birds that can stand the strain of heavy egg production.

When you separate your pullets from the cockerels put them at once on Ful-O-Pep Growing Mash and Ful-O-Pep Coarse Chick Feed. This is a combination that supplies what the growing birds require. This develops them normally and smoothly into big, well feathered birds with plenty of vigor and vitality—and the capacity to give plenty of eggs.
