Covering Local Political Fronts

(Continued from page one)
Eleven are Sundays, and according to the weather editor, there will be nine rainy days, which leaves only sixty days to get out and make the rounds.
There are two ways of figuring how many people you'll have to contact to cover the ground thoroughly. There are about 13,000 voters registered as Democrats, and 2,000 as Republicans.
In the 1940 primary, approximately 7,600 Democrats voted. To see those in 60 days, would mean cornering about 125 a day. That would not count all those seen at church and funerals on Sundays.

Of course on the nine rainy days, one can see a lot of people around the court house, but the crowd would be made up largely of other candidates and the same group who hangs around the front door day after day. So not much progress could be made on rainy days.
Since practically every office will be involved in the election this year, there is a wide choice to select from, if you have a hankering to become a candidate.
Among the offices to be voted on includes:
United States Senate.
Congressman.
Resident judge.
Solicitor.
Chairman board of commissioners and two members.
Three members of school board.
State senator.
Representative.
Register of Deeds.
Sheriff.
Clerk of Court.
Tax Collector.
Coroner.
Surveyor.

From the looks of the list above, there will be plenty of candidates, and plenty of political news and excitement for the next eighty days. This column will be devoted each week to the news, and not to promote the candidacy of any person or faction.
