STIRSCRIPTION	DATES

One Year, In Haywood County. Six Months, In Haywood County 2.50 One Year, Outside haywood County

All Subscriptions Payable In Advance Entered at the post office at Waynesville, N. C., as Second Class Mast Matter as provided under the Act of March E, 1879, November 20, 1914.

Six Months, Outside Haywood County

Obituary notices, resolutions of respect, cards of thanks, and notices of entertainment for profit, will be charged for at rate of one cent per word.

THURSDAY, NOVEMBER 4, 1943 (One Day Nearer Victory)

Kept In Haywood

We noted with pleasure that more than half of the registered Herefords offered at auction at the annual sale sponsored by the Haywood Hereford Breeders' Association were bought by Haywood farmers and will be kept in this area.

Such purchases give assurance that there will be better cattle in Haywod County next year and that interest in improving the stock of the county continues despite present conditions.

'Ain't It Hell'

The following editorial from the Raleigh News and Observer should make all of us stop and think before we are ever again guilty of complaining about our lot as civilians in the present conflict:

"The fighting men in the malarial jungles in the Pacific, facing the shot and shell of Nazis in Italy, meeting bitter foes in the battles of the sky and facing death from U-boats cannot understand the complaints some people at home make about rationing and the like. A war correspondent reports this comment by a giant fighting man overseas, talking about some complaining home folks:

steaks! The cops bother 'em about gas for vacation and football trips. They're plum out of chewing gum! Liquor's short! John L. says some of his miners get only six bucks a day while shipbuilders get ten or fifteen! Ain't it hell?"

A Wise Plan

Since we have been so firm in our opinion about taking eighteen-year-old boys in the service, we were much gratified during the week to see that President Roosevelt has looked ahead and wants the country to give these boys, whose education was cut short, another chance.

President Roosevelt would like for the qualified veterans of this war to have additional educational advantages after peace, up to three years at the expense of the government. In his report to Congress he said that the nation was "morally obligated to provide training to equip service personnel for gainful pursuits in peace time and also that the nation would need trained men and women.

"We must replenish our supply of persons qualified to discharge the heavy responsibilities of the post war world," he said, "we have taught our youth how to wage war, we must also teach them how to live useful and happy lives in freedom, justice and decency."

We all know that when the war is over and the service men and women are discharged, the demand for jobs will be a terrific problem facing the government, for in a sense it will be the responsibility of the government, that took them from their peace time jobs and put them in the armed forces. We also know that many of the younger men left before they had completed school, or had any training for their future life's work. We may have to help bear the burden of taxation to pay for this program, but it seems only fair to the teen-agers who are now fighting that we may keep forever the American ideals of government and living, to give them training.

A Weak Spot

We hear a great deal about paper shortages. We know from experience that there is need to conserve paper, but from the amount of propoganda that could be rightfully termed non-essential that comes into this office, one might be inclined to think that the public had been asked to make use

Now far be it from us to criticize our government at this critical time, but we have a suggestion to make to Uncle Sam. He might start house cleaning at home. Everyone knows that there is great need for "paper work" at a time like this, but also that much that is put out in propaganda is unnecessary.

Sometimes we salvage some of the propaganda sheets for "copy paper", but it does not even do very well for that, as it often makes it hard, with type showing through, on the eyes of the linotype operator as he sets up our copy.

But government bulletins flow through the land "like milk and honey in a land of plenty", with, though we regret to say it, many of them unread, and missing the point of the cost and effort of sending.

Planning For the Future

A short time ago suggestions were made by a prominent citizen of Waynesville and other sections regarding a program for the entertainment of visitors to be carried out by the town officials.

Regardless of how intent we are on win- get ready to make use of them . . ning this war, and how we stand in our unity we find they have completely esof effort in this direction, we must look caped our memory. . . . Now we ahead. The suggestions that one form of admit at the start that there was entertainment be taken care of annually, who wrote "Because" . . . for the seemed to us a fine idea. It would not work simple fact that for over ten years age, and somewhat diffident about a hardship on the finances of the town to do a little each year on this vital need, if Waynesville is to compete with other com- swelling notes of the song have ing more and things being searce munities as a resort.

As we recall a small park in town for the throwing of horse shoes and other sports, municipal swimming pool, and tennis courts, were among amusement features of the proposed program. If this could be managed by the city fathers, with one feature built each year, by the end of the generally accepted duration, we would be ready to entertain our visitors in the manner that other towns are now doing.

If these forms of entertainment were needed before the war, they will be absolute necessities when peace comes, and the traveling public is seeking relaxation and amuse-

"Ain't it hell! They can't get T-bone Correct War Perspective

In case you did not see it, we reprint here the following editorial from the Christian Science Monitor. It gives a wholesome perspective to the war, and a touch of reality that often we civilians at home are apt to fail to get:

It is to be hoped that President Roosevelt's latest order empowering the OWI to present a more realistic picture of the war will have the support of the Army and Navy.

Facilities for gathering the news and distributing it were never better, yet the impression grows that Americans are getting a distorted view. It looks too easy.

Some American soldiers in Australia pointed this out recently in an issue of their newspaper when they complained of the G. I. who appears in the ads, fresh from the barber shop and the tailor's iron. Even beside a palm tree in Guadalcanal, his shoes are shined and he looks bronzed and husky. He dines only with Powers models, and his jeeps and planes have knee action, hydromatic gear shifts and air conditioning.

The war, insist the boys, is not quite what the strategists in the fox holes of the advertising agencies make it seem.

Nor is the war so one-sided as the picture released by the Army and Navy would indicate. American men and American ships and material get blasted, too.

Among those perturbed by this incomplete picture of the war, and the tendency the smallest items . . . and it seems it has to make people on the home front feel that Americans never get hurt, or that it is "all over but the shouting," is Elmer Davis, chief of the Office of War Information. Apparently, he has gotten this viewpoint over to the President. The results will befitting wardrobe . . . and things be observed with much interest.

OPA has allowed the wholesale ceiling price of sausage to go up! And now it's the little pig who jumps over the moon.

Bonds alone wont buy Victory, but they'll give her wings.

Being able to understand anyone is nothing for a college student to boast about.
