COUNTRY DEPOSITS UP 137 PER CENT

Demand deposits in country banks (consisting largely of ordinary checking accounts) increased 137 per cent from 1940 to April 1944, according to the Bureau of Agricultural Economics.

FARMERS USE PRISONERS OF WAR

The work done by prisoners of war in the United States either is or related almost entirely to agriculture, forestry or food processing, the Office of War Information reports.

No farmer may house prisoners, and prisoners are sent to farms only when there is work to be done on the farm.

The War Administration does not generally advocate use of prisoners of war on the side with civilians.

Prisoners are always guarded by military soldiers. Approximately 600 prisoners worked on farms in the states last year, mostly in the harvesting peanuts, rice, and sugar cane.

MILAN GAS 43 PER CENT OF 1941

Passenger car drivers now receive only 43 per cent as much gasoline as they used in 1941, the Petroleum Administration for War says.

While Americans have reduced passenger car mileage from peacetime level by about 57 per cent, the English have reduced theirs by 88 per cent.

FAMILIES WANT TO BUILD HOMES

In a recent nationwide survey of consumer requirements, a large number of the families interviewed said they intend to use their savings for buying or building a house before buying durable goods, the War Production Board announces.

Among durable goods covered in the survey, washing machines are now in greatest demand, with electric irons and mechanical refrigerators next in order.

REFUNDS TO INCOME TAX PAYERS

While one million 1943 income tax refunds have been made by the Treasury Department, it will be several months before all of approximately 18 million taxpayers will get refunds to which they are entitled, according to the Commissioner of Internal Revenue.

Each refund, however, will include interest at the rate of 6 per cent per year from March 15, this year, to the date the refund is scheduled.

First attention was given to claims of members of the armed forces. No action is needed on the part of the taxpayer unless he has moved from the address shown on his return, in which case he should send both his old and new addresses to the collector of internal revenue in the district in which the return was filed.

ROUND-UP

Special consideration will be given returning war veterans who apply for rationed farm machinery, WPA announces. A total of 6,098 farm-type wheel tractors were produced during the week ending May 27, which represents the highest wartime production rate yet attained, WPB reports.

Synthetic vitamin C, which promotes healing of wounds, may now be made from sugar beet pulp through a new shorter process worked out by the National Bureau of Standards.

The Office of Price Administration says: New ceiling prices will increase the retail cost of jumbo shrimp about 7 cents a can and large shrimp about 1 cent a can.

The June quota of new passenger cars available for rationing is the shortest supply of automobiles since the beginning of the war.

The new ceiling prices for a 14-ounce can of codfish or haddock flakes will represent an increase of 6 3/4 cents to the individual consumer.

New arrivals for the summer season from Florida are: Mr. and Mrs. Tom Cox, Dr. and Mrs. Hughes and daughters, Mr. and Mrs. Hirstes and Mr. and Mrs. Kit Carson.

DOAN'S PILLS

When Your Back Hurts -

And Your Strength and Energy Is Below Par

It may be caused by disorder of kidneys, that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess waste and other waste matter from the body.

You may suffer nagging backache, rheumatic pains, headaches, dizziness, going up stairs, leg pains, swelling, sometimes frequent and scanty urination, with smarting and burning in urination, that something is wrong with the kidneys or bladder.

There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. It is better to rely on a medicine that has won country-wide approval than on something less favorably known. Doan's have been tried and tested many years. Are at all drug stores. Get Doan's today.

Creep Feeding Makes Beer At War Time Speed

Many feeders of beef cattle are discouraged by the narrow margin between feeder cattle and finished animals, the higher market value of grains, compared with the present market prices of finished cattle, says H. R. Clapp, county agent. As a result, fewer cattle are in feedlots today. This situation demands a streamlined feeding program for those who want to produce beef under present conditions.

Needed beef can be produced at wartime speed on many farms and small ranches by creep-feeding early, good-quality calves, experiments show. Calves that are creep-fed make faster gains on less feed, and usually have desirable market finish by weaning time or after a short period of full feeding.

Average results at the South Carolina Experiment Station for four years show that creep-fed calves gained 80 pounds more by weaning time than those not creep-fed; their slaughter value was \$1.95 per hundredweight higher, and the average profit per calf, above feed cost, was \$8.03.

Convenient location of the creep, so that calves will feed regularly, is important in creep-feeding; and the best location is near water and shade where the cow herd usually "loafs." Elaborate "creeps and feeders are not necessary, but they should be well built and should protect the feed from weather.

A practical mixture for creep-feeding calves up to 4 months of age is, 200 pounds of shelled or cracked corn, or grain sorghum crops and 100 pounds of oats, or coarsely ground barley or wheat. At 4 months, start using a mixture of 800 pounds of coarsely ground farm grains and 100 pounds of cottonseed meal, or cake, or soybean or peanut meal. Hay or other roughage is needed if grazing becomes short, and a mineral mixture should always be available.
