

News and Comment From Raleigh

CAPITAL LETTERS

By THOMPSON GREENWOOD

OUT—R. O. Self, clerk of the Utilities Commission, has resigned (?), just as this column predicted he would do two weeks ago. Self had held the job for about 25 years, had done good work, but now he is out.

If everything runs true to form, H. J. Rhodes, assistant Attorney General, or Charles Flack, the Governor's private secretary, will succeed Self in this good (\$5,000) position.

RAIL—Sooner or later that bottom rail will work its way to the top. This is not only true of fences, it is true of politics and politicians.

Those who watch the tides of politics ebb and flow thought they saw a sparkle of the new order in North Carolina when W. P. Horton, of Pittsboro, was made national committeeman instead of Governor J. M. Broughton. The next move made W. B. Umstead, of Durham, chairman of the State Democratic Executive Committee. Umstead then made LeRoy Martin secretary of the committee.

The new leaders took their time, as a new position came along they filled it. Nothing was said about anything until LeRoy Martin was named secretary, and then things started popping, for everybody knows that Martin and Governor Broughton are not what one would call "fast friends."

WRITERS—Tom Bost last week began writing items about the "new order" for his paper, the Greensboro Daily News. Lynn Nisbet, who represents the North Carolina afternoon papers, got out a long story for his papers last Wednesday a

week ago. "Under the Dome", Raleigh News and Observer column, began commenting on the trend. In all last week, Bost had three articles on the "new order."

Nisbet said that Broughton is out of it as far as North Carolina political maneuvering is concerned at this time. Bost remarked that the Horton-Umstead-Martin machine had replaced the Gardner-Ehringhaus-Hoey setup.

As this column has been saying off and on for the past four months, there is a new day for North Carolina government in the offing. It all adds up to one thing—sooner or later that bottom rail gets on top and don't forget it.

ETHERIDGE—Talk around Raleigh is to the effect that Bruce Etheridge, long-time director of the Department of Conservation and Development, and the quiet, gray fox of North Carolina appointee politics, may be moved out of his position next year. If he goes, Bill Sharpe, director of the State News Bureau, may go too. Oscar Pitts, prison man, who rumor has it, brought out Judge Wilson Warlick against Gregg Cherry, will likely not remain in Raleigh as a State employee, according to reports. W. Z. Betts, of the division of Purchase and Contract, may be out of a position, too.

But nobody really knows what will happen when Cherry moves to Raleigh. It's all conjecture.

CONVENTION—The State chapter of the International Association of Public Employment Services—the IAPES—are already laying plans for their big convention this fall, and you may expect fireworks of a high order if something new planned is adopted. They will meet in Waynesville in October.

R. C. Godwin, now of Raleigh, but formerly of New Bern, is the president of the State chapter. He is a Veterans representative in the United States Employment Service. If you want to know anything about the employment plans for your son, sweetheart, or husband after the war, get in touch with him.

MEADOWS—One of the shrewdest men in North Carolina is Leon R. Meadows, former president of Eastern Carolina Teachers College. Although the Pitt County Grand Jury has returned a true bill against him, charging the embezzlement of \$18,636.34, he has not yet been convicted. The trial will be interesting. Reporters and auditors say they have never seen a calmer man under pressure than L. R. Meadows. If there was not so much evidence against him, talking to him would satisfy any

one of his innocence.

SHARK—That loan shark guy we told you about two weeks ago is now behind the bars, and so are his assistants. It seems now that he wasn't so much of a "loan" shark as a "borrow" shark. He borrowed much more money than he loaned out, gave worthless checks, it is alleged, and conducted his business in a rather sloppy manner, to say the least.

NOTICE OF TRUSTEE'S SALE OF LAND
STATE OF NORTH CAROLINA
COUNTY OF HAYWOOD
Under and by virtue of the power of sale contained in a certain deed of trust executed by J. E. Medford and wife, Ada Medford, on the 1st day of June, 1936, to secure certain indebtedness therein described, which said deed in trust is duly recorded in the office of the Register of Deeds of Haywood County, North Carolina, in Book No. 40 on page 175, and default having been made in the payment of said deed in trust as therein provided, and demand having been made on the undersigned trustee by the holder of the notes.

Now, therefore, I the undersigned trustee will on the 18th day of September, 1944, at 12 O'clock, Noon, at the courthouse door in the city of Waynesville, N. C., offer for sale and sell to the last and highest bidder for cash, to satisfy said deed in trust, all the following described property to-wit:

Lying and being in Beaverdam Township, Haywood County, N. C., adjoining the lands of Mrs. Aderan Schenk, the Church property and others, and bounded and more particularly described as follows:

Beginning at a stake in the Penland Old line, now the Jesse R. Smathers heirs line, and a corner between the Phillips and Mingo old tract, and runs with said Phillips and Mingo old line, N. 86 deg. 45' W. 157.4 feet to a stake that stands 72 1/2 feet S. 86 deg. 45' E. from Mack Haley's N. E. corner; thence N. 3 deg. W. 9 feet to a stake in the south margin of the public road; thence with the south margin of said road, with its curve, 185 feet to a stake that stands 82 1/2 feet N. 4 deg. E. from the beginning corner; thence with the Penland and Phillips old line S. 4 deg. W. 82 1/2 feet to the place of beginning. Excepting from the east end of the above boundary a right of way eight feet wide.

This the 16th day of August, 1944.

Parkway Right Of Ways Taken

State Highway Commission Obtains Privileges To Over 150 Miles On Route.

The State Highway Commission has obtained right-of-way privileges to more than 150 miles of the Blue Ridge parkway route through Western North Carolina, Chairman Charles Ross said recently.

Construction work on the parkway was suspended shortly after the war began but work on securing right of ways has continued in preparation for a resumption of paving when hostilities end, Ross said.

Approximately 250 miles of the scenic route through Virginia, North Carolina and Georgia are located in this state. Under terms of the construction program the state obtains the right of way and the Federal government does the construction.

A policy of obtaining rights of way from 800 to 1000 feet wide so as to preserve natural growth and scenic possibilities, are being continued, Ross said.

BIRTHS

Private and Mrs. Robert Craig Bradshaw of Clyde, announce the birth of a daughter on August 26, at the Haywood County Hospital.

Mr. and Mrs. Frank Rogers of Hazelwood, announce the birth of a son on August 28, at the Haywood County Hospital.

Mr. and Mrs. Lowe Allen of Allen's Creek, announce the birth of a son on August 30, at the Haywood County Hospital.

Mr. and Mrs. Ben Moody of Maggie, announce the birth of a son on August 31, at the Haywood County Hospital.

Private and Mrs. Joe Brown of Canton, announce the birth of a daughter on Sept. 1, at the Haywood County Hospital.

270 Head Cattle Sold At Clyde Stockyards

Two hundred seventy head of cattle were sold during the weekly sales Thursday at the Haywood mutual stockyards at Clyde.

Cows brought \$5.20 to \$8.40 per hundredweight; heifers, \$6.30 to \$10.70; steers, \$7.50 to \$9.60; calves \$7.50 to \$14.75; bulls, \$6.80 to \$9.10.

Suggests Increasing Poultry Feed Before Hot Weather

If your layers have produced heavily during the winter, it's Leslie Black's guess that they're lacking in body weight in the spring. And Black, who is extension poultryman at Rutgers university, says that to produce at their maximum in months to come, laying hens should be encouraged to eat a little more before hot weather comes and appetites wane.

"Perhaps this can be brought about merely by increasing the daily scratch grain feeding," he says. "On the other hand, it may mean a small amount of moist mash, preferably at mid-day. Don't overdo moist mash feeding, however, as overfeeding usually results in decreased daily feed consumption. Three to five pounds per 100 birds daily is about right."

"When moist mash is fed, it should contain extra vitamin-rich feeding oil, at the rate of one quart per 1,000 birds daily. If moist mash is not fed, the oil can be mixed with scratch feed, a quart to 25 to 30 pounds of grain. Place this on top of the mash hoppers just prior to the regular night grain feeding."

"With the reappearance of green grass, it will also pay to start clipping greens for the layers," Black reminds poultrymen. "Three to five pounds of fresh clippings per 100 birds daily will prove a welcome addition to the ration and will supply needed vitamins and minerals."

Prevent Spread of Bean Diseases to Save Crops

Blight and anthracnose can be destructive to beans in the garden, causing such severe spotting of the pods as to render the crop worthless. Both thrive in rainy, humid weather. The organisms causing these diseases are carried within the seeds, and cannot be controlled by chemical seed treatments.

Young plants grown from affected seed often show black or brown sunken spots on the cotyledons, or halves of the bean that come up, or on the stem where the first true leaves appear. A white, yellow, or pinkish, sticky ooze may appear on these spots. This contains the disease organisms.

Later, anthracnose can be recognized by blackened dead veins on the underside of the leaves. Blight may show as irregular brownish spots on leaves, sometimes with yellow or reddish margins.

To control the diseases, prevent spread of the organisms from diseased to healthy plants by wind driven rain, splashing water, insects, man and other animals. From the time the first leaves appear, plants which exhibit the described symptoms or whose cotyledons and young leaves are misshapen and stunted, should be destroyed. Two or three early-diseased bean plants left in a garden can result in total loss of the crop.

Rubber Defects

Very early in the history of natural rubber, it was recognized that it possessed inherent deficiencies which limited its usefulness. However, during the past several decades numerous materials have been discovered which when compounded with rubber overcome or greatly reduce its natural defects. Outstanding among these materials are the accelerators of vulcanization which speed up the combination of sulphur with rubber during vulcanization, resulting in greatly improved products. Other materials known as antioxidants or age resistors greatly retard the deterioration of rubber caused by the oxygen of the air. Among other materials which may be cited are those which act as softeners, fillers and reinforcing agents.

Insurance Payments

New York City with \$184,620,000 in life insurance payments led the 20 leading cities in population in life insurance payments, followed by Chicago and Philadelphia. Pittsburgh led the cities in its population group with Buffalo and Boston second and third. Newark, Cincinnati and Rochester were the leaders among cities of like population. Syracuse, Dayton and Providence led the 200,000 to 300,000 cities, while Hartford, New Haven and Richmond took honors in the 150,000 to 200,000 group. Utica, Trenton and Albany led the 100,000 to 150,000 cities; Harrisburg, Schenectady and Binghamton the 75,000 to 100,000 group. Per capita life insurance payments in cities with more than 50,000 population average nearly twice the national average, \$38.28 to \$20.23.

Time and Motion

A trained methods and timeliness engineer studies, perhaps, a factory workplace. He lists the shortest elements into which the job can be divided, makes a drawing of the workplace, equipment and material and an inspected unit of production. These individual elements are timed with a stop-watch in proper sequence a number of times and each is carefully checked to determine whether it may be eliminated or simplified. Equipments and materials used are checked for suitability. Corrected method and materials are put into use and the worker is instructed in their operation. These new elements are time and a "standard" performance is established. A time and motion study has been made.

Evelyn Craig School of Dance To Open Sept. 8

The Evelyn Craig School of Dance will be opened again for the 1944-45 session on September 8, according to Miss Craig, teacher. This will be the fourth year of this popular school of dancing instruction for young children.

Miss Craig, who has studied dancing for a number of years, is a student of the Marguerite Hyatt School of Dance of Asheville and has also studied with various teachers in New York.

Students are being enrolled now for the coming term and those wishing to enter their children are asked to contact Miss Craig.

Nine Boys Become Eighteen During Month of August

Nine boys became eighteen years of age during the month of August in the Waynesville area and are subject to call for active duty under the selective service system, having registered after their birthdays during the month.

In the group are: Charles Woody, Lake Junaluska; Handy Wilson Kirkpatrick, Lake Junaluska; James Allen Hartsell, Hazelwood; Loyd McKinley Sutton, Maggie; Charles Edward Brooks, R.F.D. No. 1, Waynesville; William Orion Davis, Jr., Waynesville, R.F.D. No. 1; Herman Conard, Waynesville, R.F.D. No. 1; Fred Boone Caldwell, Waynesville, R.F.D. No. 2; Edwin Rogers Boone, Waynesville, R.F.D. No. 1.

ADMINISTRATOR'S NOTICE

NORTH CAROLINA, HAYWOOD COUNTY.
Having qualified as Administrator of the estate of Harley C. Crawford, deceased, late of the County of Haywood, N. C., this is to notify all persons having claims against said estate to exhibit them to the undersigned at Asheville, Route 3, N. C., on or before the 15th day of August, 1945, or this notice will be pleaded in bar of their recovery. All persons indebted to said estate will please make immediate payment. This the 14th day of August, 1944.

FRANK J. CRAWFORD,
Administrator of Harley C. Crawford.
No. 1381—Aug. 17-24-31-Sept. 7-14-21.

BUY WAR BONDS AND STAMPS

ARE YOU MISERABLE

on "SUCH DAYS" from suffering distress of

periodic FEMALE WEAKNESS

Take heed if you have

- ✓ Cramps
- ✓ Backache
- ✓ Headache
- ✓ Nervous, Restless,
- ✓ Tired "Dragged Out" Feelings

—on such days
—all due to functional periodic disturbances

On "certain days" of the month if you suffer from the above distress—start at once—try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. It's one of the most famous and most effective medicines you can buy for this purpose.

Pinkham's Compound is what doctors call a uterine sedative because it has a soothing effect on one of woman's most important organs. Pinkham's Compound not only relieves monthly pain but also accompanying nervous, restless, tired feelings of this nature.

HELPS BUILD UP RESISTANCE
A fine thing about Lydia Pinkham's Compound

is that taken regularly—it helps build up resistance against such symptoms. And there's positively no opiates or habit forming drugs in Pinkham's Compound. This great medicine is made from nature's own beneficial roots and herbs (plus vitamin B). Here's a medicine that helps nature and that's the kind to be used.

Thousands upon thousands of girls and women have reported truly remarkable benefits. Pinkham's Compound certainly must have very beneficial qualities to have endured for almost a century and still be in such great demand. Also a fine stomachic tonic! Follow label directions. Worth trying!

Lydia E. Pinkham's VEGETABLE COMPOUND

Come in and See this

WARM MORNING COAL HEATER

Holds 100 Lbs. of Coal

It's the only heater of its kind in the world! Patented principles of construction produce steady, even heat . . . save work . . . save fuel. Burns any kind of coal . . . lump, nut or slack . . . also wood. Magazine semi-automatically feeds fuel as needed. Holds fire several days in mild weather without re-fueling.

Makes coke out of bituminous coal . . . then burns coke without smoke or soot. NO CLINKERS. Low in cost . . . exceedingly economical to operate.

Come In—Let Us Show You!

Costs Less to Buy — Much Less to Use

One Year To Pay

—also in—
Cabinet Model

—See these fine Heaters before you buy
