SHOES—Airplane Stamps 1 and 2, good indefinitely.

DRY CELL BATTERY PRODUCTION GROWS

Progress by the dry cell battery industry in its renewed effort to increase production was reported by Army and WPB representatives at a recent meeting. At the same time, the industry was urged to make no effort in effecting further increases, since production is still about 28 per cent below minimum military and civilian requirements.

SHOE STAMPS GOOD INDEFINITELY

Removal of time limitations that restrict the use of special shoe stamps is announced by OPA. The new provisions apply to all special shoe stamps, except that those issued to Mexican border residents must still be used by consumers.

Kidneys Must Work Well—

For You To Feel Well

24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood.

If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at night, swelling.

Why not try Doan's Pills? You will be using a medicine recommended the country over. Doan's stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get Doan's today. Use with confidence. At all drug stores.

DOAN'S PILLS

within 30 days. Previously, some special shoe stamps—such as those issued as extra rations—had to be used within time limits. The provisions affect only special shoe stamps and in no way involve the validity of regular war ration shoe stamps, either for consumer or trade use.

TSK! TSK! WE'RE LOSING THE WAR

Germany's supreme optimist and Goebbels' prize pupil turned up in a prison camp where an Aussie stood guard. The Nazi was invited to listen to radio news reports, the Australian News and Information Bureau says. The news the Nazis heard was strictly wonderful. This was his report to his fellow prisoners: "In 1940 we overwhelmed and defeated the British, but most of them got away through Dunkerque. The Fuehrer has allowed them to land in France again. This time they shall not escape."

INDUSTRY NEEDS 250,000 WORKERS

With cotton textile production lagging, the industry has been faced since May 1 with a need for hiring nearly a quarter of a million workers by November 1, in order to expand its output to meet fully the estimated demands for cotton products, the War Manpower Commission says. As yet, WMC said, only a small number of cotton textile plants have made manpower utilization surveys or sought this service in order to determine the specific causes of labor turnover.

ROUND-UP

OPA says: If you smoke imported cigars, you will be glad to learn that dollar-and-cent ceiling prices for importers, and wholesalers, and at retail for practically all brands have been established. Consumer prices on Swiss cheese are being reduced nationally by an approximate average of three cents a pound, while the price at the factory level for the product is being increased by an estimated weighted average of 3 1-4 cents a pound, through a reduction of more than 6 cents a pound at the wholesale distributive levels. Authority for all retailers of meat to pre-cube steaks from top or bottom rounds of utility and cutter and canner grades of beef has been granted. Rationing controls have been removed from spiced green tomatoes.

Gets Flying Cross

1ST LT. ZEMRIE V. SIZE-MORE, 23, son of Mr. and Mrs. O. S. Sizemore, of Waynesville, bombardier on an Eighth Air Force B-17 Flying Fortress, is seen above receiving the Distinguished Flying Cross for "extraordinary achievement" while participating in more than a score of heavy bombing assaults on vital Nazi targets in Europe.

The presentation is being made by Col. Edgar M. Witten, of Fortage, Pa., combat wing commander in the 3rd Bombardment Division, which was cited by the President for its England-Africa shuttle bombing of a Messerschmitt plane plant in Regensburg, Germany, last summer.

Lt. Sizemore also holds the Air Medal with four Oak Leaf Clusters. He entered the service in March, 1942, prior to which he was employed as a welder in a war production plant.

Larry H. Cagle And Pfc. R. M. Chafin Meet

Larry H. Cagle, CM second class, USNR, and Pfc. Robert M. Chafin, brothers-in-law, recently met in the Pacific war theater, according to the former's wife, Mrs. Iris Chafin Cagle.

Cagle, CM 2/c, has been serving with the Seabees and has been in the Pacific two years this month. Pfc. Chafin has been overseas since March of this year.

BIRTH ANNOUNCEMENT

Lt. and Mrs. William R. Nash of Lexington, Ky., announce the birth of a daughter, Anna, on July 31. Mrs. Nash is the former Miss Frances Dunn, daughter of Mrs. Bon Atkinson.

-TIMELY- Farm Questions and Answers

QUESTION: How can I build an inexpensive, yet practical egg storage room?

Answer: Edward W. Glazener, assistant county agent in charge of poultry in Chatham county, reports that Palmer Fox of Siler City, route 1, has dug a 10 by 12 foot cellar under his feed room. Fox has noted that whereas the temperatures ranged from 20 to 100 degrees during the year in the feed room, the temperatures in the egg cellar varied from 40 to 75 degrees. The difference between the high and low temperatures in the cellar was 35 degrees as compared with 80 degrees in the feed room. "Fox realizes that keeping eggs as near 60 degrees as possible is essential for good hatching," says Glazener.

Question: Can I gauge the fertility of soil by the weeds that are growing on it?

Answer: Yes, say specialists at State College. On poor land you will find such weeds as bear grass, bitterweed, bracted plantain, poverty grass, poverty cat grass, buckhorn, cinquefoil, golden rod, green brier, mustard, oxeye daisy, pine-weed, rabbit clover, rough button-weed, sand spur, sheep sorrel and yellow weed.

Question: What are the best varieties of small grains for the upper Piedmont section of North Carolina?

Answer: We suggest that you write the N. C. Crop Improvement Association, State College, Raleigh for a copy of Agronomy Information Circular No. 136. This publication gives results of official variety tests on wheat, barley and oats by the Agricultural Experiment Station. The tests were conducted at Swannanoa, Greensboro, Fallston, Rocky Mount, Raeford and Richlands.

Question: How would you prevent coccidiosis in the poultry flock?

Answer: Extension poultry specialists at State College suggest that you do not crowd your chickens; floor the houses; and clean them often. The litter should be kept dry at all times. You can begin with a small amount of litter, stir it daily, and add a small amount of litter every few days. Put water and food containers on low wire platforms. Keep chicks confined to the house, or house and wire sunporch, until broiler or

Wife Preservers

Bating-filled quilts may be washed by hanging them on a line and washing them down with a hose, using warm water. Soap sopped places, rubbing the soap well in with the hands. Rinse with clear water; pat out excess water by gently pressing the quilt between the hands, and leave on line until completely dry, shaking gently occasionally.

Services To Be Held At Cove Creek Church

Edgar Rathbone will preach at the Congregational Holiness Church at Cove Creek on the second Sunday afternoon, in Sept. (10th) following the Sunday school. An invitation is extended to the public to attend. The Sunday school is held at 2:00 o'clock each Sunday afternoon, with Mrs. Fannie Howell serving as superintendent. Rev. Joe Daniel of East Marion, is pastor of the church.

frying size. Then, move them to a clean range that has had no manure on it for two years and house in movable range shelters, moving the shelters about once a month.

Question: Would you wait until after frost to harvest sweet potatoes?

Answer: No, say Extension horticulturists at State College. They recommend that the crop be dug before frost damages the vines because, if potatoes are not dug immediately after a frost, they will not keep well in storage. Therefore, it is best to harvest ahead of the frost. They also suggest that you treat the potatoes as if they were eggs in the harvesting operation, because bruises cause considerable losses in storage. Save No. 1 potatoes to plant next spring instead of strings.

Comfort for Cows
Dairy cows in the winter stable are more comfortable if the temperature is kept at about 50 degrees.
