## JUDY WILL TACKLE

### THE WYOMING BULLS

#### WITH BELLS ON

HOLLYWOOD — Okay, Wyoming! So your State Representative W. Jeffrey wants California automobiles to carry red flags and bells when they cross your state.

Judy Canova, the bitingly satirical, is all set. She has been already equipped as Jeffrey asks for a trip she plans to take to July into Wyoming.

A bill prepared by the Wyoming Republican committee that at a time accidents require that drivers carry red flags and bells.

Judy, who has been called the Queen of the Quips although she has never been in those mountains, can go along with a gag. With a bag full of her mouthful of facts, she says:

"I'll have red flags on my car if they'll make him happy."

But Judy, who has threatened that she'll go along with a gag, with a bag full of her mouthful of facts, she says:

"The complaints about California drivers? Why, say you take drivers out to the open spaces like they have in Wyoming, they

travels on the main highway, it's a real road. In the event of an accident, the car is a real road. And she's been called a real road.

That was in Jackson, Fla., about the time she and her sister came and her brother Zeke left. Judy, who has been called the Queen of the Quips, she says:

"I'll have red flags on my car if they'll make him happy. But Judy, who has threatened that she'll go along with a gag, with a bag full of her mouthful of facts, she says:

"The complaints about California drivers? Why, say you take drivers out to the open spaces like they have in Wyoming, they

travels on the main highway, it's a real road. In the event of an accident, the car is a real road. And she's been called a real road.

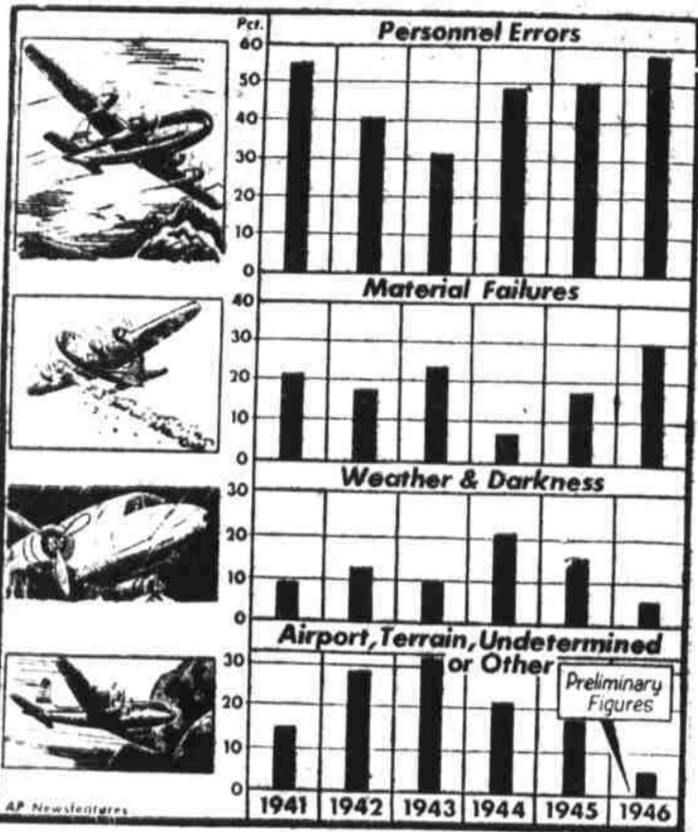

"I'll have red flags on my car if they'll make him happy. But Judy, who has threatened that she'll go along with a gag, with a bag full of her mouthful of facts, she says:

## AERIAL DEBUT OF THE JET-ASSIST AIRLINER

ON ITS INITIAL FLIGHT over San Diego, Cal., is America's first high speed twin-engine airliner using jet exhaust propulsion to increase cruising speed. The 40-passenger plane has an air-conditioned and pressurized cabin, self-contained stairway and fine upholstery. It can fly at 300 m.p.h. (International Soundphoto)

## What Causes Air Crashes

AP Newsfeatures Reporting on the safety records of 17 airlines which have operated since 1939, the CAA disclosed that eight never have had a passenger fatality. The largest airline had accidents in six different years. The next three largest had fatal accidents in three different years. Three others had accidents in two years, and two had accidents in one year.

Analysts regard that record as support of the present method of basing safety factor on the number of passenger-miles flown. The carriage of one passenger one mile is a passenger-mile.

The aident-free airlines are, with one exception, the eight smallest operators in terms of passenger-miles. The clear indication is that accidents occur in proportion to volume of travel and that the safety factor must be related to the volume.

PRESS GAG BOOMERANGS WITH RUMORS UNBIDDED RANGOON, Burma.—Police Commissioner F. F. Wemyss recently issued an order that no information concerning police activities should be released to the press except through his police publicity officer, who would be available for one hour every day from noon to 1 p.m.

The order boomeranged. The following day four Rangoon newspapers published stories that Wemyss—who was and is very much alive and well—had committed suicide. Bengath the report the papers carried a note explaining that Wemyss' own order prevented them from checking the accuracy of the report.

## Eve Curie, Publisher, Now Touring America

By TED FARAH AP Newsfeatures

NEW YORK—Eve Curie, chief, dark-haired daughter of the co-discoverers of radium, has arrived in America for her first post-war visit with a new feather in her cap.

She has become a newspaper publisher in Paris. Miss Curie, in partnership with Philippe Barres, son of the French author Maurice Barres, has been acting as publisher, editor and sometimes special writer for Paris-Presse, an afternoon paper with a circulation of 400,000—second largest in France.

In doing so, she enters a new phase of a career that has seen her in the guises of concert pianist, music critic, play adapter, lecturer on French problems, war correspondent, member of the Fighting French forces and author of a biography of her famous mother.

"Paris-Presse is completely independent," she explained in an interview. "We are not tied to any political party. We have no big banker behind us."

The French press, she said, started from zero after the liberation. The old newspapers had been destroyed through collaboration. It was possible to establish a newspaper without needing "an enormous amount of capital."

Although there still is governmental licensing and control of newsprint, Miss Curie said this is due to scarcity. She believes the controls will vanish with increased supply.

She said, as far as she could observe, the government has not used this power to suppress opinion.

"There are papers of all shades of political opinion in France now, completely without censorship. They do not hesitate to say what they like about the government."

The first modern European settlement in Greenland dates from 1721. Denmark had the highest export per capita of any country in the world in 1939.

EVE CURIE

## Talmadge Backers Promise Power Comeback In 1948

ATLANTA—Never-say-die members of the Herman Talmadge faithful, deploring his "raw deal" ouster by the State Supreme Court, predicted almost to a man today that Talmadge would be reinstated as governor in 1948 by the greatest vote majority in Georgia's history.

House Speaker Fred Hand of Pelham, declared that Talmadge's election was assured to prevent "the backwash" of Communist influences in Georgia which started with the 1917 Red revolution in Russia.

"This isn't just an issue of Herman Talmadge for governor," he asserted. "It's an issue involving the backwash of the Communist resurgence in Russia that tends to spread into our state."

He said that Talmadge had been martyred in the eyes of his "Wool Hat" followers and predicted they would rally behind him in the greatest numbers ever.

## YOUNG RACKETEERS

"A drum, a pair of roller skates, a loud tin horn and a cap pistol—why did you ask for that stuff for Christmas?" Willie wanted to know. "To make money," replied George, the youngest—and smartest—member of the Smithers clan. "To make money?" "Yes," explained George. "Mother will pay me not to beat the drum, dad will pay me not to leave the skates on the upstairs landing, sister's beaux will bribe me not to blow the horn behind the living room sofa and grandma will make it worth my while not to shoot off the cap pistol. Pretty slick, don't you think?"

Diner—I don't like the looks of this mackerel. Waiter—Well, if it's looks you're wanting, why not get a goldfish?

## They Don't Rattle

A farmer with a fine stand of hazelnut trees was bedeviled by trespassers during the nutting season. He consulted a scientific friend, and upon his advice placed at conspicuous points the following notice: "Trespassers, take warning! All persons entering this wood do so at their own risk, for although common snails are not often found, the Corylus Avellana abounds everywhere about here, and never gives warning of its presence."

He was troubled no more with trespassers. "In case you don't know, Corylus Avellana is the botanical term for hazelnut."

## Esperate Measures

Watson's wife was well known in the little suburban community for her numerous shopping forays into the city. These costly excursions were a source of dismay to Mr. Watson, especially when his fellow commuters chided him about it. Then came the day the dignified Watson boarded the commuter's special with a pair of his wife's shoes under his arm. They were destined for the repair shop. A neighbor, viewing them skeptically, quipped: "Rather a drastic measure, eh Watson?"

## Real Justice

An Alabama man charged with the stealing of a calf made the following statement: "I was always taught to be honest, and most always have been, but when I see the calf I calved, I never wanted a calf so bad in all my life." The jury returned the following verdict: "We are satisfied that Steve stole the calf, but as the feller that owned the animal is a considerable of a slouch, we agree to clear Steve and make slouch pay the costs."

## OVER SIZE

He—Have you read this new book? She—Yes. He—What do you think of it? She—To be perfectly frank, I think the covers are too far apart.

## Marathon Runner

Little Girl (innocently to new pastor)—Will you please see how many times you can run around the garden? Pastor (surprised)—I couldn't, my child. But why do you ask? Little Girl—Oh, because dad said you were so long-winded.
