The Public Locked Out

Unless Sam P. Weems, superintendent of the Blue Ridge Parkway changes his mind, there is little likelihood that the public will get to ride over the 5-mile section from Wagon Road Gap to Eridges Camp Gap any time Soon. +.,

The Mountaineer questioned Mr. Weems about opening the 5-mile link to motorists during the six weeks that the foliage is so colorful in that area. Since that particular section of the Parkway affords such a panorania of the Pink Beds, Pisgah, Cold Mounain, Looking Glass Knob and other scenic pots, we felt the Park Service would be justified in opening the Parkway for about six weeks.

Mr. Weems' arguments for not opening the road may sound plausible as coming from a Farkway official, but his reasons appear t.ival, considering that this is the only section the Parkway west of Asheville, it seems ich a pity to deprive the public of its use 1 r even six weeks during the year-and we e en suggested that the gate be open be-1 seen nine and five daily.

SPEAKING OF "GREMLINS"

Trying To Make Mother Nature Talk

We have been interested in the past few days of the attempt by scientists to get mothe nature to reveal several of her best secrets. Down in Winston-Salem, where an acute shortage of water prompted city fathers to get "man-made" rain to fall over the parched area, planes were sent aloft with a cargo of dry ice to be dumped into the clouds in an effort to produce rain. The clouds were not the rain-producing kind, and the project was not carried to completion.

Down in the West Indies aviators and scientists flew into the head of the raging hurricane in an effort to find out what was going on at the center of the howling storm. The four-motored plane made the trip, but those aboard were frightened almost to death at the close escape they had with the elements

A description of what went on aboard the plane reads like the imagination penned by some fanatic. Winds blowing at 140 miles an hour; huge waves sending spray hundreds of feet, and cross currents of air tossed the giant aircraft about like a cork on a stormy sea.

About all they are definite they learned about the storm is that they do not want to make a return trip into the heart of a hurricane.

Man will eventually find the answer to many of mother nature's now unrevealed secrets, but there are some things she is rather slow in telling and the rain and storms are two of them.

According to the Twin-City newspapers, which are editorially dry, the top men in the illicit liquor racket there are called the "Big Boys" and they supply 100 or more bottle dealers. The expose further explains the system followed:

"The Big Boys buy federal licenses to deal HOW THS WAR SPURRED in liquor. The license costs \$27.50 per year MAJOR CHANGES and is bought in Greensboro," through the office of the Collector of Internal Revenue. Do wives have more respect for husbands who discipline them?

Answer: A number of women correspondents claim this, a few even going so far as to say the discipline may include spanking. But what such wives actually do is to carry over into adult life the attitudes of childhood, since children do have more respect for a parent who will make them "toe the line" when necessary. To a child, the ability to punish is the final proof of power-the person who punishes you must bestronger than you are, and thus is someone you can depend on to protect you if you keep his favor.

The assignment of a ranger-patrolman to t is section of the Parkway for the 6-week 1 riod requested would largely remedy all ... the objections raised by Mr. Weems.

While Mr. Weems states that an objection-. Je dust condition would develop, we call i is attention to the fact that the roadbed of the Parkway is much superior to the approach . om Candler by the Pisgah motor road, and such superior also to N. C. 284 which citizens , ad visitors alike travel daily in Haywood.

We have no quarrel with Mr. Weems or ny other Park Service official, but it looks ery much to those of us west of Asheville bat we are on a merry-go-round with respect o the Parkway and that we are getting no .vhere.

This newspaper further feels that our sugjestion that the 5-mile section be opened Juring daylight hours for six weeks is a reasonable one. We further feel that adequate patroling could easily be done during such a short period, and that it would be a gesture on the part of the Park Service indicating that they had not entirely forgotten this end of the state. -

Construction on the Wagon Road Gap section of the Parkway was started in 1940, upon the specific request of President Roosevelt. after a conference with Hon. Josephus Daniels, who had just visited this area. Harold L. Ickes, then secretary of the Interior, gave the order, and work continued until halted by the war. Then the locked gates were placed across the road, barring public use. The Parkway in the area represents an expenditure of about \$750,000.

We call this situation and this section of the Parkway to the attention of the new State Park Commission. We think that Chairman Charles Ray and his fellow-commissioners should go to work immediately to have the Wagon Road Gap section open for fall, and even spring periods, until consruction is completed. We further feel that construction between Wagon Road Gap and Beech Gap should be completed at the earliest possible date.

There's a practical side of this question, and we trust Mr. Weems sees that side soon, and acts accordingly by opening the road this

fall

it runs at least 700 gallons a week."

As is the case in Hickory, the whiskey can people be ordered by telephone and delivered to any address within a few minutes time.

The Journal and Sentinel expose further charges that three leading Twin-City bootleggers are selling an average of 1,140 gallons of tax-paid liquor per week-which reduced to fifths is 5,700. These fifths retail at an average of about six dollars per bottle which would indicate an annual volume of co crop is the best in history of the \$1,778,400 for three of the Big Boys. That is county, according to Howard Clapp, almost as much whiskey as the Wilson coun- county agent. ty ABC stores sold last year.

Liquor Dealer stamp which costs \$27.50 annually, a person who is selling tax-paid whiskey is thereby protected from federal interference, although he is operating in prohibition territory.-Hickory Record.

Army Strength Ebbs

The United States Army is currently about 100,000 men below its authorized strength of 1,070,000, and its strength continues to ebb as month by month it falls below its quota of enlistments.

Part of the decline in personnel is attributed to higher standards for enlistment. Secretary of War Kenneth C. Royal said recently that the Army is accepting only slightly more than half of the applicants for enlistment, with higher intelligence requirements accounting for a substantial percentage of the rejections.

But whatever the reason, the United States needs to be seriously concerned about the sapping of its military strength. The authorized strength is on a conservative peacetime basis, and anything less than that means the nation is woefully weak in an unsettled world.

Congressmen should consider these facts when the matter of universal military training comes up in the next session of the legislative body .- (Concord Tribune).

Church Being Married Miss Kathryn Queen left during

By GARRY CLEVELAND MYERS, PLD

THE other day Mrs. Myers and attended a wedding in a little coul try church hear our home. We h known the bride and her family for many years and the groom for 3 eral years. So had the church-fiof other neighbors and friends war witnessed that marriage.

Mrs. Mc Thirty-five years ago, ers and I were married in this sur little rural church-I have told y we have nine grandchildren now and then also the folks gathered wish us well in our venture. A co ly number of the same persons tended both weddings.

First Wedding

Incidentally, I learned that was the first wedding in that chu which is nearly a hundred year-Since then there have been man I hope we started something : In recent years there have been a average of three or four marriant of young couples of this community in this church. Sometimes th guests are all invited, sometimes i is just a community occasion. Any way the church at these wedding is as much crowded as at funeral From what I can gather, a weddin in a rural Protestant church is n a very frequent practice the nation over. I wish it were.

To date the couples married in this church have stuck together. While one hardly would claim that being married in a church has guaranteed permanence of mai-riage, something is to be said in favor of such practice. All church weddings I have observed seem to have a peculiar solemnity. There s strong religious emphasis. The strikes not a strike aby superior. effect on all attending, especially on chui
