Doctors On Trail Of Oxygen Intake To Prolong Life

ST LOUIS-(UP)-Better health and longer life for middle-aged people may be achieved by maintaining the proper level of oxygen consumption in the body.

Physicians, working at St. Louis City Infirmary in co-operation with Washington University believe old people may be able to ward off the so-called "old age" diseases if the proper level is achieved.

On the basis of their study of 1.000 persons, the investigators think the ideal oxygen consuming rate occurs during the first ten years of life. The rate then falls until the age of 24 and remains stable until age 45.

Then, according to their findings, is when the trouble begins They speculate that a dropping rate of oxygen consumption indicates threat of a degenerative dis-

When the rate begins to climb again after age 45, the doctors believe, it may be due to the body' fight against a degenerative ailment such as cancer or heart dis-

The gerontologist physicians who study aging processes of the body - therefore try to maintain oxygen consumption at the 24 year age level With special diets and medical care they already have reported "some progress".

ARGENTINE INVESTIGATES TWO YUGOSLAV DIPLOMATS

An Argentine chapter may yet be written to the story of two Yugoslav diplomats who were ousted from Chile Wednesday on charges of directing economic and pulitical sabotage Argentina is checking up on the

case and President Juan Peron is reported to be personally interested in the affair One of the Belgrade diplomats-

involved in the case-was stationed at the Chilean capital, Santiago. The other, attached to Marshal Tito's diplomatic staff in Argentina, arrived at Chile a few days ago reportedly bringing instructions for Communist activities. Shortly after that both of them were escorted to the Argentine-Chilean frontier and now are inside Argentina.

The Chilean government, explaining the ouster order, claims the diplomats were involved in Main St. fomenting industrial strife and directing political propaganda aimed at the United States.

What the New National Guard means to you ...

A Message from the President of the United States

Today the new National Guard gives

We owe our existence as a nation to the tradition of service of our citizens. It was an army of citizen soldiers which George Washington led to victory in the American Revolution. At the end of that war, the first Congress asked General Washington to give his views on what the military policy of the new nation should be. This was his answer:

"... every citizen who enjoys the protection of a free government, owes not only a proportion of his property but even of his personal services to the defense of it."

You'll find the few hours each week that you spend with your local Netional Guard unit pleasant and profitable. Pay is based on new Army pay scale. Veterans can obtain the same rank held upon discharge. And

every man an opportunity to give that personal service to his country and at the same time to advance himself. In National Guard units all over the country thousands of veterans and other ambitious young men are finding the opportunity to study and learn the things that help them advance in their civilian jobs. They are finding the fellowship that is part and parcel of America. They are participating in a sports and recreation program that keeps them fit. And they are receiving the training that helps keep America strong.

Because of the National Guard's importance to our national defense I have proclaimed September 16th as National Guard Day and have directed that a nationwide recruiting campaign be conducted to fill its ranks.

Hang Munaam

now young men 17 years old may join the National Guard. For complete information
