Make Safety First Resolution For New Year

"If you would be thrifty, practice safety in 1950," is a New Year's Resolution suggested this week by County Agent Wayne Corpening.

Such a resolution, the county agent pointed out, can be carried out by the whole family to the benefit of all. Furthermore, it is thoroughly practical and can mean the difference between profit and loss for the new year.

Making and keeping New Year's safety resolutions is much more than a pastime; it is a means of assuring the happiness and well-being of farm families everywhere. The National Safety Council suggests that if each member of every farm family makes and keeps one good safety resolution in 1950, noticeable progress will be made toward reducing the tremendous toll that accidents take in agriculture.

Following are a few suggested resolutions for farm families to make for 1950:

- 1. We will continually check the farm to locate and remove hazards.
2. We will at all times observe all safety rules in the operation of machines.
3. We will encourage our friends to work, play, and drive safely.
4. Regardless of the emergency, we will not permit young children

to operate or ride upon farm machinery.

- 5. We will observe due caution when working with or around animals.
6. We will keep guns unloaded and out of reach of children.
7. We will handle poisons and explosives carefully and keep them labeled and out of reach of children.
8. We will encourage year-round participation in farm safety activities by the organizations to which we belong.

Include Dry Milk In Your Food Planning

Dry milk can be used to good advantage in meal planning, say nutrition specialists. Use it in beverages, breads, soups, main dishes and desserts.

Dry milk is easy to carry home and takes little storage space. Non-fat dry milk has all the nourishment of fresh skim milk. Whole dry milk has, in addition, the fat and the vitamin of the cream part of whole milk.

Dry milk products make it easier to get more milk into family meals, especially helpful in families where children or others do not drink enough milk.

One pound of milk powder and four cups of water make one quart of liquid milk. In the same proportion 1/4 cup of milk powder and 1 cup water make 1 cup of liquid milk.

One pound packages of both nonfat dry milk and whole dry milk now are carried by grocery stores.

Clothing specialists say the latest style in skirts may be long or short, tight or full, pleated, gathered or dressed up with trimmings, flaps or other fancy extras. But for work around the house or yard, the wise housewife will choose a skirt designed for safety, comfort and convenience. A skirt which is moderately wide but not full is safest for work around the house. Skirts are somewhat shorter this year—and that is all to the good for working convenience and safety.

A gored skirt, the specialists suggest, may be cut wide enough around the bottom to allow for walking, or running when necessary, also for climbing and stooping. Yet it is fitted about the hips so that it stays in place and does not get in the way. In contrast, a full skirt like a dirndl has a way of billowing out when you bend over so that it may be stepped on in going down a ladder to wash windows, or in stooping to low shelves. A tight skirt which is close around the bottom restricts steps, may catch and pull uncomfortably and unsafely, often just when the wearer is in a hurry. Sashes, bows, flaps and fancy loose pockets are accident hazards because they may catch on door knobs or hooks.

Italian Red Wine No Drink For Irish

CHICAGO (UP)—Judge Nuncio J. Bonelli asked Joseph Fattori, 52, and his wife, Bridget, 41, about three false police calls and one false fire call to their home. "We had been drinking some fine Italian red wine—home-made," said Mrs. Fattori in a Dublin brogue. "You have to be an Italian to drink that stuff," Judge Bonelli replied with an authoritative air. He ordered her and Fattori to sign \$1,000 peace bonds.
