Plane Comes Calling - Right Through Front Door

Two-engine Air Force plane ran out of gasoline and made an emergency landing right on the porch of a farm house near Charlotte. Lt. B. A. Seagraves, the lone occupant of the plane, was not hurt, but he walked out of the wreckage. Two women in the rear of the house were not hurt. Lt. Seagraves was flying from Atlanta, Ga. The plane sheared off its wings on small trees in the yard. (AP Wirephoto).

Understanding Needed For Cold War

MAN, Okla. (UP)—The reason for international difficulties is America's failure to understand the Russian philosophy of our philosophy. Dr. Stuart Tompkins, professor of history at the University of Oklahoma, Tompkins is a book on Russia under

the auspices of the Rockefeller Foundation.

One trend in Russia thought Tompkins points to is the people's belief, as far back as 1825, that secret police were necessary to maintain order.

"Even the most highly educated Russians agree it is necessary to have a police-patrolled state," he said.

GMC Reveals Many Changes In Trucks

Advance details of changes that will be incorporated in its 1950 truck line, were revealed today by GMC Truck & Coach Division of General Motors.

Largest exclusive producer of commercial vehicles, GMC in 1950 will feature stepped-up horsepower in its light and medium duty engines, as well as a member of cab, chassis and engine advancements. The horsepower of the 228-cubic-inch engine will be increased from 94 1/4 to 96, that of the 244 from 100 to 110 and the 270 from 104 to 120.

Ford Trucks Now In 175 Models

The new 1950 Ford truck models are now being displayed by Ford dealers in all parts of the country, J. D. Ball, manager truck and fleet sales department, Ford Division, Ford Motor Company, announced today.

The 1950 line, Mr. Ball said, offers more than 175 models, a considerable increase over the 1949 line-up, representing the largest selection of trucks in Ford history.

Featured in the 1950 model trucks are 21 engineering, design and manufacturing advancements contributing to more efficient, economical performances and lower maintenance costs.

Takes Bride to England To Spend Her Money

HOLDREGE, Neb. (UP)—Milton Barker, a World War II veteran, took his British bride home for a trip, to spend her money.

Barker, his wife Irene, and his two-year-old son, were making the entire trip "at his wife's expense."

Here's the reason. When Irene came to the United States, British currency laws wouldn't allow her to take any money out of England. That's why they went back to spend the money over there.

Louisville, Ky., was named for Louis XVI, the luckless monarch executed during the French Revolution.

Couple, 79 and 86, Have Whirlwind Romance

SPINDALE, N. C. (UP)—Mrs. Willie Carnelia Gibson, 79, and Jefferson David Queen, 86, met on a Monday and Tuesday night a week later they were married.

It was the sixth marriage for the bride and the third for the bridegroom.

"I understood that Mr. Queen was looking for a cook, so I came up to see him and just stayed," explained the new Mrs. Queen blushing.

FROG WAS A BLONDE

KNOXVILLE, Tenn. (UP)—Mrs. Lillian Rader sued for divorce, charging that her husband told her he was going "frog hunting" but that she discovered him in a car with another woman.

GOOD PART BROKEN

MILFORD, N. H. (UP)—Judson Hall, 75, whose wooden leg starts below the knee, was struck by an automobile that broke his leg just above the knee.

Many Enterprises Using Ford Motors

Industrial engines manufactured by the Ford Motor Company form the foundation upon which hundreds of independent business enterprises in all parts of the country have been established.

These engines are produced in the same plants and on the same high standards of engineering and manufacturing that have characterized the building of millions of Ford passenger car and truck engines for nearly half a century.

Through the application of these engines to an ever-widening range of usefulness, Ford is providing power for steadily expanding sections of industry and agriculture.

FIVE MODELS PRODUCED

Five models of industrial engines are produced. Two are V-8's of 337 and 239 cubic inch piston displacement. Two are six-cylinder engines of 254 and 226 cubic inch piston displacement, and the fifth is a four-cylinder engine of 120 cubic inch piston displacement.

The needs of industry and agriculture are particularly well served by these power plants because they are compact, flexible and durable. Horsepower per pound

ratios are exceptional and this is an important advantage in power units of this type.

After a virtual disappearance lasting nearly half a century, the rare roseate spoonbill now is returning by the hundreds to old nesting grounds in the U. S. gulf coast region.

THE OLD HOME TOWN

See the quality

Before you look at that amazingly low price tag, look at Ford's "Fashion Car" styling. It's more beautiful than ever. Run your finger over the baked-on enamel. It's "built to live outdoors." Feel the long-lived upholstery. Look where you will—you'll see Ford's quality.

Hear the quality

Ride herd on Ford's 100-horsepower V-8 engine. Sure, Ford's the liveliest power in its field, yet it never raises its voice. New super-fitted pistons, new "hushed" timing gear, new camshaft for quiet valve action and Ford's new silent-spin fan result in power that whispers while it works.

Feel the quality

Feel Ford's easy "Finger-Tip" Steering... feel the 35% easier action of King-Size Brakes... get the solid "feel" of Ford's 13-way stronger "Lifeguard" Body now "sound conditioned" for silence. Feature after feature will show you why Ford's the one fine car in the low-price field.
