Poultry Flocks Healthier

Improved memods of fighting disease are paying off in higher profits for poultrymen. Twenty-five years ago-before concerted efforts were made to reduce flock lossespoultrymen thought they were doing all right when they were able to raise 60 to 75 per cent of a brood of baby chicks. Today, however, efficient poultrymen are saving 90 per cent of practically every broad and realizing better profits as the

The Gran Chaco of Paraguay is still in the Wild West stage.

During Venezuela's rainy season, species of egret, heron, lbis, swork, and other wading birds escape land enemies by nesting above protective floods. In exchange, they accept the hazard of the razor-

Venezucia's Wading Birds

toothed piranha, or cannibal fish. When wind or rain dislodges an egg or young of the nesting birds, a vicious horde of piranhas rushes to the spot where the victim falls into the water, and in seconds 16 is devoured.
