A Happy Settlement

It was joyous news that the two boards of aldermen of Waynesville and Hazelwood had reached a complete, and satisfactory agreement over water-sewer matters.

When the contracts are formally signed Tuesday night, there will be closed an era of bitter battling back and forth over the price of the two utilities in which the towns were involved.

The action of the two boards will meet with the approval of the citizenship at large, because everyone realizes that the towns have too many things in common to always be quarreling over issues which should be settled in a peaceful, and business-like fashion.

The boards have not announced the terms of settlement of the water bill, and sewer bill, A Childish Attitude. which each town held against the other. Neither has the announcement been made as to the new rate for water which Waynesville sells to Hazelwood, nor the charges Hazelwood will make for use of certain sewer lines to Waynesville.

An advance study of the terms, by this newspaper, leads us to the conclusion that everyone got a fair and square deal, both as to the past, and for the future.

We are confident that the citizens of the two towns will agree with us that the settlement was fair throughout, when details are announced Tuesday night.

We know we share the opinions of citizens of both towns that we are happy this matter was settled this side of expensive court action, and once again, everything is down to a working level of harmony.

The determination of the boards to see that Good To Get Back an era of harmony between the two towns prevails should be participated in by all citi-

to hit some areas of Haywood reminds us once again, that much of the success of farming is still dependent upon Mother Nature. As a rule, Haywood is spared devastating

Brighter Day For Burley

Haywood tobacco farmers have two reasons for being happy and optimistic this week. First of all, the growing season for burley has been exceptionally favorable. After the lingering dry season at the time when burley is supposed to be re-set, the weather opened up, and has been favorable for the production of quality tobacco ever since.

The main cause for jubilation is the prices which flue cured tobacco is bringing on the Georgia market. The 1951 prices are running almost \$3 per hundred above the 1950 price. Based on the Haywood average of a two million pounds, this would mean by comparison, somewhere in the neighborhood of \$60,000 more for Haywood burley this year.

Bringing it on down closer, that amount divided by the 2,000 burley growers in Haywood, would mean about \$300 extra per farmer. A sizeable increase.

Let's hope that the 1951 burley crop makes as good a showing on the market as flue cured has thus far.

Two Safety Awards

Two beautiful safety awards hang in two city halls in Haywood-at Waynesville and at

The awards were presented in impressive ceremonies on Friday, when representatives of the State Highway Commission made the awards to the mayors of Waynesville and Canton for a perfect record on their streets as to fatal accidents during 1950. The awards are for towns of 5000 population, and over.

Such awards are not easily attained, and there were only 16 such awards given in the

Such a goal is well worthwhile, and one in which every citizen should actively participate.

We regret that Asheville still sees fit to drag the Pigeon River road issue into their general discussion of a highway program.

The other day, when a group of Asheville civic leaders met to discuss a road project, the president of the Asheville Chamber of Commerce had to inject remarks about the tion being what it is, Jim Barn- writing, But dog days are right on Pigeon River project. Remarks which would indicate a spirit of continued jealousy biggest trucklines in the nation, out of the dew with that sore toe throughout.

We fail to see where they expect such a selfish attitude is going to get them. We had hoped they would take a broad attitude on with critical eye new roads of his all regional matters, and not act like stubborn area.

It looks like our hopes are in vain, and they that is winging its way through on Kerr Scott's farm in Alamance an excellent idea and I would cerare going to keep right on refusing to act the countryside northward from County; and it is being worked by tainly like to see us exhaust every

> We have found that on the eight other similar trips, the majority of those making the tour thought the best part of the trip was getting back to Haywood county.

By LAWRENCE GOULD MIRROR OF YOUR MIND Consulting Psychologist

Must scientific writing be dull?

Answer: Yes, in the same sense in which a book written in French is "dull" to a person who has only a smattering of that language. For while scientists sometimes do use technical terms when they might use familiar ones, there are many scientific ideas for which ordinary English has no exact words, and for which the non-scientific reader must learn new terms if he is to understand discussions of them. The alternative is a "translation" like this column, and unfortunately no translation can be 100% accurate because, except for such concrete words as "house" or "tree." no two words in different languages convey exactly the

Answer: Probably not much all by themselves, says Dr. Benjamin J. Kouwer, Dutch psychologist. A light of one wave-length probably dose not arouse very different feelings than does one of another. The effect of a color on your emotions depends largely on the ideas which you have come to associate (Copyright, 1961, King Peatures Syndicate, Inc.)

with it and these in turn grow out of the meanings its name has acquired. Advertisers, for example, long since learned to make colors appealing by giving them names which suggest romance or social superiority, such as "ruby" red, or "royal" purple. "Navy blue" conveys a feeling of dependability which "dark blue" does not.

a nursery school help a spoiled child?

Answer: It might, if he is not too much retarded in emotional development to be capable of getting on with other children. But it cannot cure him. A spoiled child is one who has or has had a neurotic mother, and the only way to help him is to help his mother to feel differently toward him and herself, and to treat him differently. Where a nursery school or its staff might be of the most use would be in leading the mother to get help for her own difficulties. Well-adjusted mothers do not have "spoiled children," and the only real cure for a child's emotional problems is to solve his

Military Build-Up Will Be Tough When Shooting Stops About Preparedness h

Special to Central Press

WASHINGTON—Top government officials are worried

than they are willing to admit publicly about the def continuing the present military build-up if the Korean war as No one knows whether Congress can be tapped for appropriate running to 60 billion dollars a year or whether universal training can be started if the shooting stops. It has never be sible to do these things in peacetime being

Nevertheless, the policy of Defense Marshall and all of his top aides is to with the rearmament program toward 1 1953. They already are warning the nation a letdown in the preparedness program. The defense leaders believe that the over ing threats of atomic warfare and world nism will cause the public to reverse it tional stand and support an increase in spending in peacetime.

But they wouldn't be surprised if some plans go awry.

George Marshall • GASOLINE RATIONING - Another trouble spot (Iran) may hit the America where it hurts most-in the fuel tank

Not much is being said at this point, but it is conceded that if Iran's oil supply is cut off from western Europe, States will have little choice but to try to keep the oil flow the western hemisphere.

This could be done, the experts say, only under the st controls. That would mean gasoline rationing in the U.S. Not only do American motorists face the possibility of but also the likely prospect of having to pay higher prices in ever gasoline they can get since shortages and price rises !

● DOPE RACKET—Despite recent seizures of narcotics II agents, the Treasury department estimates that drugs are ported into the U. S. at the highest rate in history. Working with an extremely small staff, the Treasury's

bureau recently seized nearly 2,500 ounces of opium and it tives. But a bureau spokesman says this is only about 10 !! cent of the amount sent into this country illegally each y You can look for a further sweeping crackdown on the dlers. Chances are that Congress will improve funds to es staff of the narcotics bureau and enable it-to expand its of

 DRAFT TESTS—Draft Director Lewis B. Hershey Ist. steps to guard against possible cheating on the student

The Selective Service boss has ordered that the examination tions be changed after each of the tests. This is to prodents who have already taken the exam from briefing others on questions.

Draft headquarters also banned all local draft boards closing results of the tests. The exams will be used by boards to help determine which students will be deferred.

LESS DEFERMENTS-And all young men subject to who failed their first physical because of a minor mental cal allment can expect to face another examination soon Many of the present deferred men are expected to be call service under re-examinations because the new draft law does not carry the stiff physical and mental re-

quirements of the old law. Many draft-age athletes who have been deferred for trick knees, bad ankles and the such may be) called under the new standards.

The Defense department is making use of partially-hand persons as replacements for fully-fit personnel who formed down desk jobs. The able-bodied men will be transferred bat duty.
